*Le calcul mental, c'est un jeu* Roger Rougier,1997 L'objectif de ce cahier est d'entraîner les enfants au calcul rapide, logique et évidemment juste, en les plaçant devant des situations simples et amusantes. Dans les premières pages, ils doivent compter de manière traditionnelle , puis ils sont amenés à substituer aux opérations connues un mode de calcul plus individuel, afin d'exercer leurs propres qualités d'analyse et de raisonnement. Au fil des exercices-jeux, présentés de manière récréative, les enfants structurent progressivement les lois du calcul rapide. Ils seront prêts à les appliquer lors de situations analogues : l'anticipation immédiate d'un résultat leur évitera ainsi des erreurs grossières. Les principales notions abordées : lecture de nombres, quantité, séries, suites, addition - somme, soustraction - différence, produit - facteurs, approche de la télévision. L'entraînement au calcul mental est capital pour développer l'esprit mathématique chez les jeunes enfants. Ce cahier en construit une véritable pédagogie.

**Learning Alsatian through English** NA NA,2016-09-23 A new comparative reference guide for English speaking learners of Alsatian German. This comparative multilingual dictionary is based on the main similarities between the two languages and will show how English speakers can take advantage of the resources of English and thus learn basic Alsatian through English. Owing to striking similarities between Alsatian and English, English speakers can put their knowledge of everyday English to good use when learning basic Alsatian.

**An Algebraic Introduction to Complex Projective Geometry** Christian Peskine,1843 In this introduction to commutative algebra, the author chooses a route that leads the reader through the essential ideas, without getting embroiled in technicalities. He takes the reader quickly to the fundamentals of complex projective geometry, requiring only a basic knowledge of linear and multilinear algebra and some elementary group theory. The author divides the book into three parts. In the first, he develops the general theory of noetherian rings and modules. He includes a certain amount of homological algebra, and he emphasizes rings and modules of fractions as preparation for working with sheaves. In the second part, he discusses polynomial rings in several variables with coefficients in the field of complex numbers. After Noether's normalization lemma and Hilbert's Nullstellensatz, the author introduces affine complex schemes and their morphisms; he then proves Zariski's main theorem and Chevalley's semi-continuity theorem. Finally, the author's detailed study of Weil and Cartier divisors provides a solid background for modern intersection theory. This is an excellent textbook for those who seek an efficient and rapid introduction to the geometric applications of commutative algebra.

**Labostat – Guide de validation des méthodes d'analyse** FEINBERG,2012-02-01 Unique en son genre dans sa conception et dans son contenu, Labo-Stat - Guide de validation des méthodes d'analyses présente une nouvelle stratégie de validation selon une démarche raisonnée fondée sur le profil d'exactitude. Les techniques statistiques adaptées y sont explicitées sous une forme didactique et les solutions possibles ainsi que les limites éventuelles de diverses normes existantes sont largement développées et illustrées d'exemples concrets directement exploitables. Les applications numériques, sous forme de feuilles de calcul modèles pour des tableurs et des petits scripts, sont téléchargeables en ligne. Complétée par les explications de cet ouvrage, elles permettent au non-statisticien d'accéder aisément à une interprétation graphique des résultats. Labo-Stat a été conçu pour pouvoir être facilement utilisé sur la paillasse du laboratoire et permettre à tout un chacun, responsable, ingénieur, chercheur, technicien ou étudiant, de s'approprier les techniques indispensables pour déboucher sur une conclusion claire et sans ambiguïté et mener la validation des méthodes dans un souci de contrôle des coûts.

**Authorship in Nabokov's Prefaces** Jacqueline Hamrit,2015-01-12 Whereas literary criticism has mainly oscillated between “the death of the author” (Barthes) and “the return of the author” (Couturier), this work suggests another perspective on authorship through an analysis of Nabokov's prefaces. It is here argued that the author, being neither dead nor tyrannical, alternates between authoritative apparitions and receding disappearances in the double gesture of mastery without mastery which Derrida calls ‘exappropriation’, that is, a simultaneous attempt to appropriate one's work, control it, have it under one's power and expropriate it, losing control by loosening one's grip. The intention of this is to approach, through one's experience of reading and interpreting, the experience of self-effacement and impersonality pertaining to writing (cf. Blanchot). Prefaces are considered to be suitable places for the deconstruction of the classical image of Nabokov's arrogance through the unearthing of his reserve and vulnerability. This work provides an account of the mere intuition (which, therefore, does not pretend to be a conclusive and definitive interpretation) of another image of Nabokov whose undeniable talent for deception seems in accordance with a need for discretion and secrecy.

Material Histories of Time Gianenrico Bernasconi,Susanne Thürigen,2020-12-16 The historiography of timekeeping is traditionally characterized by a dichotomy between research that investigates the evolution of technical devices on the one hand, and research that is concerned with the examination of the cultures and uses of time on the other hand. Material Histories of Time opens a dialogue between these two approaches by taking monumental clocks, table clocks, portable watches, carriage clocks, and other forms of timekeeping as the starting point of a joint reflection of specialists of the history of horology together with scholars studying the social and cultural history of time. The contributions range from the apparition of the first timekeeping mechanical systems in the Middle Ages to the first evidence of industrialization in the 18th and 19th centuries.

*Calcul moral* Jean-Pierre Cléro,2011-04-20 Dans ce livre de philosophie de l'éthique, essentiellement appliquée à deux domaines, la médecine et les professions juridiques, l'auteur montre comment et pourquoi la carte utilitariste doit toujours être essayée dans l'argumentation pratique, de concours avec une conception ordinairement plus personnaliste. Le cheminement est celui d'une philosophie critique : une théorie de l'espace et du temps, une théorie des principes et une théorie des concepts en éthique sont censées répondre aux contradictions qui apparaissent dans des situations où l'éthique est en jeu. Bien au-delà du kantisme, cette philosophie se mue en théorie des fictions, dans le prolongement et en complément de ce qui avait été commencé sur le terrain privilégié des mathématiques dans Les raisons de la fiction (Paris, 2004). Toutefois, si nécessaire que soit la philosophie sur le terrain de l'éthique, elle doit apprendre à se défier d'elle-même et corriger une ambition professorale qu'elle est tentée d'exercer à l'égard de quiconque prétend se passer d'elle. Il s'agit, en effet, bel et bien de clarifier la place de l'argumentation, du raisonnement et du calcul dans les affaires éthiques, et de mettre en scène le recours nécessaire à des fictions.

*In the Margins of Deconstruction* M.C. Srajek,2012-12-06 Although this book is a study of the work of Emmanuel Levinas and Jacques Derrida, it would be mistaken to refer to it as a comparison. The book develops a framework which might aide the reader of Levinas and Derrida in determining the scope and significance of their respective projects as far as a discourse of the sacred is concerned. It does so by emphasizing their status as philosophers whose thought correlates but does not compare. Within this correlation, without obscuring either their differences or similarities, we can see a common framework that consists of the following elements. First, it is clear from what and how Derrida and Levinas have written that the general import of their work lies in the area of ethics. However, in many ways it would be justifiable to say that their work is not about ethics at all. Neither of them proposes a moral theory; neither is interested in discussing the question of values vs. social norms, duty vs. virtue and other issues that might pertain to the area of ethics. To be sure, these issues do come up in their work, yet they are treated in a peculiarly different way. For Derrida and Levinas, ethics is not so much an inquiry into the problems of right and wrong but an inquiry into the problem of the ethical constitutedness of human beings.
