Lewis and Clark's Compass John Micklos Jr, 2021
The Louisiana Purchase in 1803 nearly doubled the size of the United States. The U.S. suddenly went from consisting of 17 states along the Atlantic coast to claiming land as far west as present-day Montana. The U.S. government knew little about the terrain there. Was there a water route to the Pacific? President Thomas Jefferson sent William Clark and Meriwether Lewis to find out. With nothing to guide them but a compass, what would Lewis and Clark discover? Readers will find the answer to this question and how an artifact can tell us about U.S. history.

The Natural History of Plants Anton Kerner von Marilaun, Francis Wall Oliver, 1894 Excerpt from *The Natural History of Plants: Their Forms, Growth, Reproduction, and Distribution* Although the authors of the *Flora* had no such purpose in view, their works furnished the starting-point for a real history of the vegetable world. A comparison of the *Floras* of neighbouring regions shows that certain plants inhabit a greater, others a lesser area; that the boundaries of the species confined to a distinct district coincide with territories

inhabited by various races of mankind; that the boundaries of this and that species coincide and stand in relation to various climatic and other conditions.
