*Critical Views on Teaching and Learning English Around the Globe* José Aldemar Álvarez V.,Cathy Amanti,Shireen Keyl,Erin Mackinney,2016-01-01 This volume takes a critical look at teaching and learning English across the globe. Its aim is to fill a gap in the literature created by the omission of the voices of those engaged in the everyday practice of teaching and learning English; those of students, teachers, and specialists. Three unique characteristics give this book broad appeal. They include - its inclusion of the perspectives and experiences of students and educators involved in the everyday practice of English language teaching and learning - its inclusion of the experiences of students and educators in both core and non-core English-speaking countries - its basis on original, qualitative studies conducted by scholars in different parts of the world including Europe, the Middle East, Asia, and the Americas Of particular interest to applied linguists, scholars from diverse fields such as English as a Foreign/Second Language, English as an International

Language, anthropology and education, English education, sociolinguistics, and bilingual education will also find value in this book. Written in accessible language, it can be used in such courses as Applied Linguistics, Second Language Classroom Contexts, Bilingualism and Multilingualism, English Around the World, Research Methodologies in Second Language Acquisition, and Research in Second Language Pedagogical Contexts. In addition, by focusing on presenting research experiences that adopt several epistemological and theoretical approaches, the book provides teachers of research with a great tool to examine varied applications of qualitative methods, data collection, and analytic techniques. Thus it could also be used for courses in Field Research and Qualitative Methods.

ENDORSEMENT: “As a scholar and educator who has consistently explored the social implications of the teaching and learning of English, I applaud this book’s concern with documenting the previously unheard voices of language learners and teachers around the world. The book is unique in the manner in which it focuses on the everyday experiences of marginalized English teachers and learners in various contexts around the globe. It also is unique in the manner in which it brings together researchers, teachers and learners to qualitatively investigate a great diversity of local language learning contexts. This book is a must read for anyone concerned with the current spread of English and its implications for individuals not typically foregrounded in language learning and teaching research.” — Dr. Sandra Lee McKay, Professor Emeritus, San Francisco State University, USA

**Learning english through ICT tools** Silvia Sánchez Calderón, 2020-06-01 The present book has been written for teachers and students of English as a second language (L2, henceforth) and considers the three educational levels, namely, school, college and university. They will find it as a useful resource since it provides readers with insights, suggestions and approaches to implement the so-called Information and Communication Technology (ICT, henceforth) tools to develop the four language skills, namely, reading, writing, listening and speaking, along with a grammar knowledge. More specifically, this book will contribute to help L2 English teachers in designing creative and motivating lesson plans in which L2 English students will learn English through the use of ICT tools while developing several competences such as the digital competence, the learning to learn (that is to say, they learn by doing), autonomy and an active role given they are

responsible for their own learning. In this student-centred approach, the teacher is a guide and a facilitator of resources. The resources described in this book will foster L2 English teachers and L2 English learning to consider that lesson plans are more effective when the teacher has determined the learning and teaching objectives for both ICT and English. A detailed explanation regarding how each ICT tool functions is provided in the corresponding chapters so that L2 English teachers are able to build standing selection criteria when applying each ICT tool in the classroom.

Usage and Potential of Language Learning Apps Luca Diehl, 2020-03-16 Bachelor Thesis from the year 2019 in the subject English Language and Literature Studies - Linguistics, grade: 1,3, University of Trier, language: English, abstract: The goal of this thesis is to find out how often language learning apps are already used and to analyze their potential for the upcoming years, i.e. whether they might be able to supplement or even replace traditional language classes one day. The study presented in this thesis consists of two parts: an analysis of the term language learning app, their user numbers and their teaching methods in order to be able to find their strengths and weaknesses and a survey conducted among students of the University of Trier in which they were asked about their past usage of language learning apps, as well as their attitudes and opinions towards language learning apps in general, including their opinions about the potential of language learning apps. Not long ago, mobile phones were only a means of communication and it was hard to imagine that one day they could fulfil literally hundreds of tasks. Today, thanks to mobile apps, they can be a map, a book, a video game and even a spirit level all at once. One of their most valuable new features, though, are educational apps.

They allow users to learn anything from coding to chemical elements to languages and have been changing the educational landscape ever since. Language learning apps have been especially disruptive. No other type of educational apps is used as often as they are. Today, apps like Duolingo and Babbel have more than 100 million active users, with their numbers increasing by the day. They offer courses in languages from Spanish to Hawaiian and are no longer limited to vocabulary teaching only.

*ENGLISH FOR EVERYDAY SPEAKING* Sutanto Leo, It is said that school leavers in Indonesia are not able to speak English confidently. They have no courage to speak, even though they actually feel that they have something to say in their mind. They are afraid to make mistakes when speaking because they never feel happy with their English grammar and vocabulary at school. *English for Everyday Speaking* is directed at those who have learned English and have no courage to speak but want to practice their spoken English. This book is not only suitably used by high school students, university students, language centers, English course learners and English speaking club members as a main course book for speaking, but also for employees, workers, staff, teachers, employers or members of a family as a core handbook for language practice during their leisure time. **Integrating Technology And Humanity Into Language Teaching Book 1** Dien Novita ... [et al.], 2021-08-12 The 2020 ICOLTEC has been successfully held by English Language Education Department of Universitas Islam Indonesia in November 11-12, 2020.

Despite the Covid-19 pandemic, our virtually held international conference and workshop have managed to invite significant numbers of local, national and international presenters who have generously shared their high-quality papers and research findings through our conference platform. Hence, we are greatly indebted to them. During the past two years, the world of education has tremendously shifted from the conventional traditional classrooms to fully digital learning due to the COVID-19 pandemics. This abrupt and unprepared change has consequently impacted on how classrooms are forced to be conducted in distance mode with the sudden changes of learning media, learning materials, teaching strategies, and teachers' roles in teaching and learning processes. Stakeholders are to mitigate at no given time at all to prepare for the online learning facilities, let alone create engaged and fun learning activities. The experimental studies using digital learning applications have provided more empirical evidence of their effectiveness in language learning. Teachers who are considering using what learning application that may work well for their students may consider these media. This book has enriched the classroom action research in EFL contexts resulting in positive views on the mobile application for learning both inside and outside the classrooms. Although this book is still far from being complete, it does provide classroom practices of technology use for learning.

The book has been divided into four convenient units of Grammar, Pronunciation, Conversation and Vocabulary. Each chapter covers one main area of learning English - explained with examples. Carefully selected and graded exercises have also been included throughout the book to give readers ample practice and a complete understanding of the subject. In short, the book follows the modern functional approach to the study of English. So readers, it is definitely a one-stop solution for speaking English!
