What English Language Teachers Need to Know Volume III MaryAnn Christison,Denise E. Murray,2014-03-05 What English Teachers Need to Know, a set of companion texts designed for pre-service teachers and teachers new to the field of ELT, addresses the key question: What do English language teachers need to know and be able to do in order for their students to learn English? These texts work for teachers across different contexts (countries where English is the dominant language, one of the official languages, or taught as a foreign language); different levels (elementary/primary, secondary, college or university, or adult education); and different learning purposes (general English, workplace English, English for academic purposes, or English for specific purposes). Volume I, on understanding learning, provides the background information that teachers need to know and be able to use in their classroom. Volume II, on facilitating learning, covers the three main facets of teaching: planning, instructing, and assessing. Volume III, on designing curriculum, covers the contexts for, processes in, and types of ELT curricula—linguistic based, content-based, learner-centered, and learning-centered. Throughout the three volumes, the focus is on outcomes, that is, student learning. Features • Situated in current research in the field of English language teaching and other disciplines that inform it • Sample data, including classroom vignettes • Three kinds of activities/tasks: Reflect, Explore, and Expand

What English Language Teachers Need to Know Volume I Denise E. Murray,MaryAnn Christison,2019-02-01 Designed for pre-service teachers and teachers new to the field of ELT, What English Teachers Need to Know Volumes I, II, and III are companion textbooks organized around the key question: What do teachers need to know and be able to do in order for their students to learn English? In the Second Edition of Volume I, Murray and Christison return to this essential question and call attention to emerging trends and challenges affecting the contemporary classroom. Addressing new skills and strategies that EFL teachers require to meet the needs of their shifting student populations who are impacted by changing demographics, digital environments, and globalization, this book, which is grounded in current research, offers a strong emphasis on practical applications for classroom teaching. This updated and expanded Second Edition features: a new chapter on technology in TESOL new and updated classroom examples throughout discussions of how teachers can prepare for contemporary challenges, such as population mobility and globalization The comprehensive texts work for teachers across different contexts—where English is the dominant language, an official language, or a foreign language; for different levels—elementary/primary, secondary, university, or adult education; and for different learning purposes—general English, workplace English, English for academic purposes, or English for specific purposes.

Primary School English-Language Education in Asia Bernard Spolsky,Young-in Moon,2013-03-05 In Asia, English is no longer a foreign language but a key resource for education, government, business and the general public. Whereas thirty years ago, British and American experts believed that the best way to improve the quality of English teaching was to cancel any programs below the secondary level, Asian nations as well as European are now introducing English in primary school. But there are major obstacles to overcome: the training of enough local teachers or the hiring of English speakers, the preparation of suitable teaching materials, the development of useful tests, and the design of workable curriculums. The chapters in this book, written by leading English-teaching professionals in seven Asian countries and originally delivered at the 2010 annual conference of Asia TEFL which took place in Hanoi, Vietnam, describe and analyze national policies and how they are implemented. The coverage is wide: China with its huge number of students learning English, Japan working to make the transition from elementary to secondary school seamless, Singapore continuing to use English as medium of instruction for its multilingual population, Korea developing English education policies to recognize the increased role of English alongside the national language, India building on its colonial past to make English an economic resource, Vietnam fitting English into a program of national rebuilding, and Taiwan spreading its English teaching outside the national capital. This is not a report of the views of outside experts, but of local experiences understood by local scholars of international standing. Policy makers, educators, researchers and scholars will be able to gain valuable insights from Asian experts.

Learning English in Japan Takunori Terasawa,2018 Multiple discourses circulate Japanese society surrounding the relationship between Japanese people and the English language. For example, 'Japanese people are the worst English speakers in Asia, ' 'Japanese women love the English language' and 'learning English leads to increased income and career opportunities.' From a sociological perspective, this book tests the veracity of these discourses, using social statistical data. The aim here is to paint an accurate picture of society to assist the argument for evidence-based policy in English language education, and to challenge the myths about Japanese people and the English language propagated by various interest groups, including the government and the business community. This important book reveals that the English language discourses that exist in Japan today are largely based on misconceptions, pointing to the urgent need to challenge the education policies based on such falsehoods. "**The Words Came Down!**" Emelie Lowrey Parker,Tess Pardini,2006 As teachers everywhere find more and more students with limited English in their classes, many are asking: How can I include ELL students in every aspect of the day? Beginning with designing a classroom that welcomes students and creates appropriate conditions for learning, Emelie Parker and Tess Pardini go on to detail a workshop format for reading, writing and content-area studies. The workshop structure allows teachers to differentiate instruction to include all students, and affords students ample opportunities to collaborate with others as they learn to speak, read, write, and comprehend while also engaging in active learning of the curriculum. The authors provide numerous examples of ways that teachers can become proficient in knowing each child and orchestrating instruction to meet individual needs. Throughout *The Words Came Down!* oral language is emphasized in a continuum from teacher modeling and demonstration to situations in which student-to-student communication is essential. The authors show that when children's attempts at communicating are accepted and celebrated, they will learn to communicate with each other comfortably and spontaneously whether on the playground or working on a science experiment. In addition, this helpful guide offers a variety of approaches to assessment, and demonstrates the importance of engaging families as partners in learning English and content.

Graded Lessons in English Alonzo Reed,Brainerd Kellogg,2018-10-08 Graded Lessons in English By Alonzo Reed and Brainerd Kellogg The teacher is recommended, before assigning any lesson, to occupy the time of at least two or three recitations, in talking with his pupils about language, always remembering that, in order to secure the interest of his class, he must allow his pupils to take an active part in the exercise. The teacher should guide the thought of his class; but, if he attempt to do all the talking, he will find, when he concludes, that he has been left to do all the thinking.
