Tuttle Learning Chinese Characters Alison

Matthews, Laurence Matthews, 2011-12-20 This user-friendly book is aimed at helping students of Mandarin Chinese learn and remember Chinese characters. At last—there is a truly effective and enjoyable way to learn Chinese characters! This book helps students to learn and remember both the meanings and the pronunciations of over 800 characters. This otherwise daunting task is made easier by the use of techniques based on the psychology of learning and memory. Key principles include the use of visual imagery, the visualization of short stories, and the systematic building up of more complicated characters from basic building blocks. Although Learning Chinese Characters is primarily a book for serious learners of Mandarin Chinese, it can be used by anyone with an interest in Chinese characters, without any prior knowledge of Chinese. It can be used alongside (or after, or even before) a course in the Chinese language. All characters are simplified (as in mainland China) but traditional characters are also given, when available. Key features: Specially designed pictures and stories are used in a structured way to make the learning process more enjoyable and effective, reducing the need for rote learning to the absolute minimum. The emphasis

throughout is on learning and remembering the meanings and pronunciations of the characters. Tips are also included on learning techniques and how to avoid common problems. Characters are introduced in a logical sequence, which also gives priority to learning the most common characters first. Modern simplified characters are used, with pronunciations given in pinyin. Key information is given for each character, including radical, stroke-count, traditional form, compounds, and guidance on writing the character. This is a practical guide with a clear, concise and appealing layout, and it is well-indexed with easy look-up methods. The 800 Chinese characters and 1,033 compounds specified for the original HSK Level A proficiency test are covered.

Learning Chinese Patricia Duff, Tim Anderson, Roma Ilnyckyj, Ella VanGaya, Rachel Wang, Elliott Yates, 2013-03-01 The acquisition of Mandarin Chinese, one of the most important and widely spoken languages in the world today, is the focus of this innovative study. It describes the rise of Chinese as a global language and the many challenges and opportunities associated with learning it. The collaborative, multiple-case study and cross-case analysis is presented from three distinct but complementary theoretical and analytic perspectives: linguistic, sociocultural, and narrative. The book reveals fascinating dimensions of Chinese language learning based on vivid first-person accounts (with autobiographical narratives included in the book) of adults negotiating not only their own and others' language and literacy learning, but also their identities, communities, and trajectories as users of Chinese.

Easy Way to Learn Chinese Through English in 30 days Shelly Verma, SHELLY VERMA is a Guest-Lecturer at University of Delhi and also a Chinese language faculty at Bhartiya Vidya Bhawan. She did Post Graduation in Management (Marketing & HR) from All India Management Association. Simultaneously she did Advanced Diploma in Chinese language from Department of East Asian Studies, University of Delhi. She has also completed an Advanced Diploma in Chinese language from Bhartiya Vidya Bhawan. She also did B.Ed. from MDU, Rohtak. Her keen interest in Chinese language made her qualify HSK Level 5. After completing her studies in Chinese language, she was selected by CBSE as a Master trainer of Chinese language. Later, she taught Mandarin in

various institutes and international schools. With an experience of almost 8 years, she went to Taiwan for an Advanced Teacher Training programme.

Her purpose of writing this book is to meet the needs of a layman interested in learning Chinese language with basic grammar and sentence constructions in the shortest possible time. This book covers basic to intermediate Chinese grammar for sentence formation, greeting people, time, family, business communication, commonly used vocabulary, conversations- in hotel, at the airport, at the railway station, in the market, during telephone calls, etc. Chinese characters, Romanization and English sentences are given in each lesson to make it easier for the students to communicate with confidence.

Hacking Chinese Olle Linge, 2016-03-26 Learning Chinese can be frustrating and difficult, partly because it's very different from European languages. Following a teacher, textbook or language course is not enough. They show you the characters, words and grammar you need to become proficient in Chinese, but they don't teach you how to learn them! Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be even more aware of what you need to do, what you're doing at the moment and the difference between them. Here are some of the questions I have asked and have since been asked many times by students: How do I learn characters efficiently? How do I get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning

Chinese into a busy schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and help myself learn in a better way, but I can help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook: you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently missing in my study. - Geoff van der Meer, VP engineering This publication is like a bible for anyone serious about Chinese proficiency. It's easy for anyone to read and written with scientific precision. - Zachary Danz, foreign teacher, children's theatre artist About me I started learning Chinese when I was 23 (that's more than eight years ago now) and have since studied in many different situations, including serious immersion programs abroad, high-intensity programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language, taught entirely in Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website,

Hacking Chinese, where I write regularly about how to learn Mandarin.

Learning Chinese in Diasporic Communities Xiao Lan Curdt-Christiansen, Andy Hancock, 2014-07-15 This book brings together new theoretical perspectives and bilingual education models from different sociopolitical and cultural contexts across the globe in order to address the importance of sociocultural, educational and linguistic environments that create, enhance or limit the ways in which diasporic children and young people acquire the 'Chinese' language. The chapters present a variety of research-based studies on Chinese heritage language education and bilingual education drawing on detailed investigations of formal and informal educational input including language socialization in families, community heritage language schools and government sponsored educational institutions. Exploring the many pathways of learning 'Chinese' and being 'Chinese', this volume also examines the complex nature of language acquisition and development, involving language attitudes and ideologies as well as linguistic practices and identity formation. *Learning Chinese in Diasporic Communities* is intended for researchers, teacher-educators, students and practitioners in the fields of Chinese language education and bilingual education and more broadly those concerned with language policy studies and sociolinguistics.

Chinese Made Super Easy Joscelyn Quek, 2013-06 A superb guide for learning Chinese. Suitable for young and

adult beginners. Selling very well since it was published in 2004. Fast and easy to learn systematic, effective and interesting.

Teaching and Learning Chinese in Global Contexts Linda Tsung, Ken Cruickshank, 2010-11-11 Although there is an extensive literature on the teaching of English as a Second or Other Language, there is very little published research on the teaching or learning of Chinese in similar contexts. This book is the first to bring together research into the teaching and learning of Chinese as a foreign language to non-native speakers, as a second language to minority groups and as a heritage/community language in the diaspora. The volume showcases the contribution of researchers working in such areas as language teaching and learning, policy development, language assessment, language development, bilingualism, all within the context of Chinese as a Second or Other Language. This is an exciting extension of teaching research beyond the traditional TESOL field and will be of interest to researchers and practitioners working in applied linguistics and Chinese language education worldwide.
