Donations to Clarity Noah Baird, 2011-07-04 The plan was simple: hoax bigfoot, then sell tours to bigfoot enthusiasts. The plan wasn't brilliant, and neither were Harry, Earl, and Patch. The three chemical-abusing friends only wanted to avoid the 9 to 5 rat race, but their antics attract the attention of a real bigfoot. When the misogynistic Earl is mistaken for a female bigfoot by the nearsighted creature and captured; it is just the beginning of their problems. The U.S. Government has a plan to naturalize the mythical creatures living within the U.S. borders. The problem is the plan needs to be carried out carefully. You can't just drop little green men and Sasquatch in the middle of Walmart without warning Ma and Pa Taxpayer. The naturalization program is not ready to be set into motion, and the rogue bigfoot is bringing too much attention to itself, including a feisty investigative reporter who uncovers the truth of the government conspiracy and two bigfoot researchers. No longer able to contain the situation, government agents are tasked with eliminating the bigfoot and all witnesses. Between bong hits and water balloon fights, Harry and Patch come up with a plan to save Earl and the lovestruck bigfoot. Where do you hide a giant, mythical creature? In an insane asylum, because who is going to listen to them? Along the way, the three friends learn Star Wars was a government training film for children, the truth behind Elvis meeting President Nixon, and the significance of the weight of the human turd.

Flash Anastasia Salter, John Murray, 2014-09-12 How Flash rose and fell as the world's most ubiquitous yet divisive software platform, enabling the development and distribution of a world of creative content. Adobe Flash began as a simple animation tool and grew into a multimedia platform that offered a generation of creators and innovators an astonishing range of opportunities to develop and distribute new kinds of digital content. For the better part of a decade, Flash was the de facto standard for dynamic online media, empowering amateur and professional developers to shape the future of the interactive Web. In this book, Anastasia Salter and John Murray trace the evolution of Flash into one of the engines

of participatory culture. Salter and Murray investigate Flash as both a fundamental force that shaped perceptions of the web and a key technology that enabled innovative interactive experiences and new forms of gaming. They examine a series of works that exemplify Flash's role in shaping the experience and expectations of web multimedia. Topics include Flash as a platform for developing animation (and the "Flashimation" aesthetic); its capacities for scripting and interactive design; games and genres enabled by the reconstruction of the browser as a games portal; forms and genres of media art that use Flash; and Flash's stance on openness and standards—including its platform-defining battle over the ability to participate in Apple's own proprietary platforms. Flash's exit from the mobile environment in 2011 led some to declare that Flash was dead. But, as Salter and Murray show, not only does Flash live, but its role as a definitive cross-platform tool continues to influence web experience.

The Donation Myles Edwin Lee, 2008-03-05 The Donation is a medical thriller that dramatizes the shortage of organs available for transplantation. It asks what if organ donation became a choice as a means of means of execution for prisoners on death row? How would it affect the donor pool? Would prisoners realize one last chance for redemption, to give something back to society? And what about the physicians who find themselves cast in the role of executioners as they convert executions into surgical procedures, against the guidelines of the American Medical Association and their own Hippocratic oath that urges them to do no harm? A surgeon's role is to bring order out of chaos. The chaos begins when a celebrity patient, Joseph Spencer, discovers he needs a heart transplant. While in the pre-operative holding area, Spencer sees his donor in an adjacent bed. Not only does he see him, he recognizes him.

His sedation makes it impossible for him to protest what for him is an unimaginable horror, and he loses consciousness, unable to abort the procedure, even though to do so could cost him his life. Spencer survives the procedure but becomes suicidal. The transplant surgeon, Ross Fairing, discovers that he and his team have been unwitting co-conspirators in the death of the donor who had no business on an operating table, let alone be in a hospital. He confronts his own consternation that a courageous and innovative operation has created an ethical conundrum that could destroy his transplant program and his career. And how does a shocking revelation at the end of the book, a revelation that turns a tragedy driven by one man's grief, into an affirmation of life, release Spencer from his suicidal torments, and return him to the world of the living? Morality and medicine collide with the criminal justice system in *The Donation*, a medical thriller that illuminates the organ donor shortage, one of the most pressing issues in medicine today

Spiritugraphics Brad Benbow, Phil Daniels, 2022-08-16 In *Spiritugraphics*, authors Brad Benbow and Phil Daniels explore, through research and case studies on some of the top brands and companies, the question of whether or not faith influences consumption and to what extent it influences our day-to-day purchasing decisions with the goal of helping companies reach this deeply connected segment of the marketplace. Does a person's faith affect what they buy and don't buy? What about where they make their purchases? Are consumers shopping differently today versus three to five years ago? These and other key questions were posed to women of all age groups in a national behavioral study executed by America's Research Group between December 2020 and January 2021. In Brad Benbow and Phil Daniels' groundbreaking book, *Spiritugraphics: The Influence of Faith on Consumption and*

Why It Matters to Your Brand, you will discover keen insights into topics important to marketers like: How much does “Made in America” affect shoppers of faith? In spite of current culture change, political correctness and consequences of expressing diverse thought, 42.4% of female Christians in the US say that “American-made” is very important. Does “holiday” vs. “Christmas” really matter to people of faith? According to the research, 60% stated that any retailer promoting “Christmas” rather than “Holiday” (or other references) had a significant advantage with them compared to their competitors. Marketers and brand managers have long operated under the framework of demographics, psychographics, and sociographics. Authors Benbow and Daniels present a new set of data points to be considered: Spiritographics. Ultimately the book provides ten key “Spiritographics” that you and your company/brand should pay close attention to if you want to reach this highly engaged and deeply connected segment of the marketplace.

Japan's Book Donation to the University of Louvain Eline Mennens, 2022-10-10 With more than 3,000 titles in almost 14,000 volumes, the 1920s Japanese book donation to the University of Leuven/Louvain constitutes an invaluable time capsule of Japan's pre-modern culture in all its diversity and richness. A century on, the time is right to take a new look at its contents, as well as its history and the political, social and cultural context surrounding the donation. To commemorate its centenary, the Katholieke Universiteit Leuven (KU Leuven) and the Université catholique de Louvain (UCLouvain) have joined forces to set up a special exhibition under the title "Japan's Book Donation to the University of Louvain. Japanese Cultural Identity and

Modernity in the 1920s" (October 2022–January 2023), at the University Library of KU Leuven. The present book has been compiled for the occasion of the exhibition, to serve as a durable guide to the magnificent book donation and its historical background, and as a reference for further research in the future. In five essays by historians of politics, media, culture, and arts of Japan, it offers a richly illustrated overview of the history of the donation and its wider historical context, providing illuminating insights into the vibrant 1920s in Japan, its politics, society, and popular culture. The reader is further invited to explore a sample of 65 remarkable and rare items from the donation, which were carefully selected for inclusion in the exhibition and are provided here with a detailed description. Moreover, the reader is introduced to 41 representative items, including visually captivating commercial and political posters related to Japan's modernity in the 1920s, which represent mass culture, progress, and tensions, and highlight both imperial ambitions and a willingness to contribute to international cooperation.

Photosystem II T. Wydrzynski, Kimiyuki

Satoh, 2006-01-27 The most mysterious part of photosynthesis yet the most important for all aerobic life on Earth (including ourselves) is how green plants, algae and cyanobacteria make atmospheric oxygen from water. This thermodynamically difficult process is only achieved in Nature by the unique pigment/protein complex known as Photosystem II, using sunlight to power the reaction. The present volume contains 34 comprehensive chapters authored by 75 scientific experts from around the world. It gives an up-to-date account on all what is currently known about the molecular biology, biochemistry, biophysics and physiology of Photosystem II. The book is divided into several parts detailing the protein constituents, functional sites, tertiary structure, molecular dynamics, and mechanisms of homeostasis. The book ends with a comparison of Photosystem II with other related enzymes and bio-mimetic systems. Since the unique water-splitting chemistry catalyzed by Photosystem II leads to the

production of pure oxygen gas and has the potential for making hydrogen gas, a primary goal of this book is to provide a molecular guide to future protein engineers and bio-mimetic chemists in the development of biocatalysts for the generation of clean, renewable energy from sunlight and water.
