**Collecting Flashlights** Stuart Schneider,1996 Let There Be Light. Borrowing from the bible, the Eveready Co. used this phrase on the cover of its 1899 catalog, along with a hand from the heavens pointing a flashlight at the earth. Those were the beginning years of the flashlight, originally promoted to help sell batteries and growing to become an essential safety product in every American household and automobile. Never before has there been an extensive treatment of the flashlight from an historical and collectible point of view. In this beautifully illustrated full color volume, Stuart Schneider brings a fascinating world to light. With flashlights ranging from the purely practical to the elegantly stylish, to the playthings of children, the reader will begin to appreciate the beauty of their design and their inventiveness. 458 color photographs illustrate the book, each accompanied by an informative caption and the value of the model in today's market. Histories of many companies and important information for collectors is also included.

**How Things Work** Louis A. Bloomfield,2015-12-15 How Things Work provides an accessible introduction to physics for the non-science student. Like the previous editions it employs everyday objects, with which students are familiar, in case studies to explain the most essential physics concepts of day-to-day life. Lou Bloomfield takes seemingly highly complex devices and strips away the complexity to show how at their heart are simple physics ideas. Once these concepts are understood, they can be used to understand the behavior of many devices encountered in everyday life. The sixth edition uses the power of WileyPLUS Learning Space with Orion to give students the opportunity to actively practice the physics concepts presented in this edition. This text is an unbound, three hole punched version. Access to WileyPLUS sold separately.

**Fluorescent Proteins** Kevin F. Sullivan,2007-12-14 This new edition of Fluorescent Proteins presents current applications of autofluorescent proteins in cell and molecular biology authored by researchers from many of the key

laboratories in the field. Starting from a current review of the broad palette of fluorescent proteins available, several chapters focus on key autofluorescent protein variants, including spectral variants, photodynamic variants as well as chimeric FP approaches. Molecular applications are addressed in chapters that detail work with single molecules, approaches to generating protein fusions and biosensors as well as analysis of protein-protein interactions in vivo by FRET, fluorescence polarization and fluorescence cross correlation techniques. A number of approaches to in vivo dynamics are presented, including FRAP, photoactivation, and 4-dimensional microscopy. Behavior of spindle components, membrane proteins, mRNA trafficking as well as analysis of cell types in tissues and in development are detailed and provide models for a wide variety of experimental approaches. In addition, several chapters deal directly with the computational issues involved in processing multidimensional image data and using fluorescent imaging to probe cellular behavior with quantitative modeling. This volume brings together the latest perspective and techniques on fluorescent proteins and will be an invaluable reference in a wide range of laboratories.

To Protect and Serve Norm Stamper,2016-06-07 The police in America belong to the people -- not the other way around. Yet millions of Americans experience their cops as racist, brutal, and trigger-happy: an overly aggressive, militarized enemy of the people. For their part, today's officers feel they are under siege -- misunderstood, unfairly criticized, and scapegoated for society's ills. Is there a fix? Former Seattle Police Chief Norm Stamper believes there is. Policing is in crisis. The last decade has witnessed a vast increase in police aggression, misconduct, and militarization, along with a corresponding reduction in transparency and accountability. It is not just noticeable in African American and other minority communities -- where there have been a series of high-profile tragedies -- but in towns and cities across the country. Racism -- from raw, individualized versions to insidious systemic examples -- appears to be on the rise in our police departments. Overall, our police officers have grown more and more alienated from the people they've been hired to serve. In *To Protect and Serve*, Stamper delivers a revolutionary new model for American law enforcement: the community-based police department. It calls for fundamental changes in the federal government's role in local policing as well as citizen participation in all aspects of police operations: policymaking, program development, crime fighting and service delivery, entry-level and ongoing education and training, oversight of police conduct, and -- especially relevant to today's challenges -- joint community-police crisis management. Nothing will ever change until the system itself is radically restructured, and here Stamper shows us how.
