Essential Readings in Light Metals, Volume 2, Aluminum
Reduction Technology Geoff Bearne, Marc Dupuis, Gary
Tarcy, 2017-03-02 ONE OF A FOUR-BOOK COLLECTION
SPOTLIGHTING CLASSIC ARTICLES Landmark research findings and
reviews in aluminum reduction technology Highlighting some of
the most important findings and insights reported over the past
five decades, this volume features many of the best original
research papers and reviews on aluminum reduction technology
published from 1963 to 2011. Papers have been organized into
seven themes: 1. Fundamentals 2. Modeling 3. Design 4.
Operations 5. Control 6. Environmental 7. Alternative processes
The first six themes deal with conventional Hall-Héroult electrolytic
reduction technology, whereas the last theme features papers
dedicated to nonconventional processes. Each section begins with
a brief introduction and ends with a list of recommended articles
for further reading, enabling researchers to explore each subject in
greater depth. The papers for this volume were selected from
among some 1,500 Light Metals articles. Selection was based on a
rigorous review process. Among the papers, readers will find
breakthroughs in science as well as papers that have had a major
impact on technology. In addition, there are expert reviews
summarizing our understanding of key topics at the time of
publication. From basic research to advanced applications, the
articles published in this volume collectively represent a complete
overview of aluminum reduction technology. It will enable
students, scientists, and engineers to trace the history of
aluminum reduction technology and bring themselves up to date
with the current state of the technology.

Sixteenth International Seaweed Symposium Joanna M. Kain (Jones),Murray T. Brown,Marc Lahaye,2012-12-06 The papers presented in this volume reflect continuing worldwide interest in marine algae and range from results using cutting-edge laboratory techniques to simple but important field observations. Many of the contributors frequently publish in their own languages.

Tailored Light 2 Reinhart Poprawe,2011-01-22 The present book covers the application technology of lasers, focusing more on the vast range of processes than on individual applications, in order to motivate and enable future innovations. The physical basics are presented in the first half of the book. The following examination of application categories and their processes is documented by experts from their practical points of view but always refers back to the underlying physical principles. In this

way, readers are free to choose their own individual level of depth in understanding this globally relevant field of innovation.

Light Scattering Reviews 2 Alexander A.

Kokhanovsky,2007-04-29 This book is to continue the Light Scattering Reviews series devoted to modern knowledge and milestones in both experimental and theoretical techniques related to light scattering and radiative transport problems. It gives a valuable picture of recent developments in the area of remote sensing and radiative transfer. The work has capabilities to further facilitate studies in light scattering media optics and be of importance for researchers across various scientific fields including astronomy, meteorology and geophysics.

Steps to Facilitate Principal-Investigator-Led Earth Science Missions National Research Council,Division on

Engineering and Physical Sciences,Space Studies Board,Committee on Earth Studies,2004-05-21 Principal-investigator (PI) Earth science missions are small, focused science projects involving relatively small spacecraft. The selected PI is responsible for the scientific and programmatic success of the entire project. A particular objective of PI-led missions has been to help develop university-based research capacity. Such missions, however, pose significant challenges that are beyond the capabilities of most universities to manage. To help NASA's Office of Earth Science determine how best to address these, the NRC carried out an assessment of key issues relevant to the success of university-based PI-led Earth observation missions. This report presents the result of that study. In particular, the report provides an analysis of opportunities to enhance such missions and recommendations about whether and, if so, how they should be used to build university-based research capabilities.
