

Left Right Or Wrong

Roy Pateman

Left, Right, Wrong Robin Wales, Clive Furness, 2023-07-28 Public services are in crisis. NHS backlogs, police forces in disarray and a housing crisis growing ever worse. Whole areas of our national infrastructure are in a mess including energy, water and rail.

Voice of Reason Ronn Owens, 2004-02-06 Publisher Description

Left Right and Wrong Roy Pateman, 2006-01-30 In all human societies the right is dominant. For about fifty centuries about ninety percent of the world's population has been right-handed. Throughout history the left hand and arm has been regarded as inferior in power, dexterity and dignity. The book discusses the causes of left-handedness and the penalties (and sometimes) benefits of spending one's life with a dominant left hand. It looks at the dominance of the right in religion, politics and superstition. Half of the book deals with some 800 of the most famous and infamous left handers throughout history. It includes many lesser known facts and fallacies about a very important minority who have achieved much in spite of the sinister interpretation that has sometimes been placed on the fact that they favor their left hand

Nothing About Heaven Jason Bright, 2015-07-27 Imagine that someone tells you that when you put blue and yellow together this makes green, and you did not know or believe this to be true! Then you are handed a diary which inside has the formula of how to mix blue and yellow together, you follow the formula and actually get green, then what?

What's Wrong with the Europe Union and How to Fix It Simon Hix, 2013-04-23 The European Union seems incapable of undertaking economic reforms and defining its place in the world. Public apathy towards the EU is also increasing, as citizens feel isolated from the institutions in Brussels and see no way to influence European level decisions. Taking a diagnosis and cure approach to the EU's difficulties, Simon Hix tackles these problems with distinct clarity and open-mindedness. What the EU needs, Hix contends, is more open political competition. This would promote policy innovation, foster coalitions across the institutions, provide incentives for the media to cover developments in Brussels, and enable citizens to identify who governs in the EU and to take sides in policy debates. The EU is ready for this new challenge. The institutional reforms since the 1980s have transformed the EU into a more competitive polity, and political battles and coalitions are developing inside and between the European Parliament, the Council, and the Commission. This emerging politics should be more central to the Brussels policy process, with clearer coalitions and identifiable winners and losers, at least in the short term. The risks are low because the EU has multiple checks-and-balances. Yet, the potential benefits are high, as more open politics could enable the EU to overcome policy gridlock, rebuild public support, and reduce the democratic deficit. This indispensable book will be of great interest to students of the European politics, scholars, policy makers and anyone concerned with the future of the European Union.

Estimating the Policy Position of Political Actors Michael Laver, 2003-12-16 This book gives an up to date reference on the state of the art in this highly important methodological area, which is central both to theoretical models of party competition and to empirical accounts, whether these are case studies or comparative analyses. It looks at subjects including tracking estimates of public opinion and party policy intentions in Britain and the USA; the policy space of party manifestos; and party platforms and voters' perceptions. Its panel of respected contributors reviews the refinements which have been made to established techniques as well as considering the potential and early successes of computer coding.

Living in an Asymmetrical World Anne Maass, Caterina Suitner, Jean-Pierre Deconchy, 2014-04-03 There has recently been a renewed interest in the role of spatial dimensions in social cognition, and how vertical and horizontal trajectories are used to represent social concepts such as power, agency, aggression, and dominance. Most of this work surrounds the idea that abstract concepts are intrinsically linked to our sensory and motor experiences, including habitual interactions with the environment such as reading and writing. *Living in an Asymmetrical World* makes an original contribution to the field by addressing a hot topic from a somewhat unusual perspective, bridging five decades of research on horizontal bias related to writing direction. Previous work by Jean-Pierre Deconchy is examined and integrated with current theory, and the importance of deep thinking, on field observations, multiple methodologies and creative procedures are proposed as crucial elements for future social psychology. The book's revival of this approach to science will open up new perspectives for future research and will be of key interest to academics and researchers in the areas of social, cognitive and cultural psychology.

Problems in Value Theory Steven B. Cowan, 2020-02-06 *Problems in Value Theory* takes a pro and con approach to central topics in aesthetics, ethics and political theory. Each chapter begins with a question: What Makes Actions Right or Wrong? Does Morality Depend on God? Do We Need Government? Contemporary philosophers with opposing viewpoints are then paired together to argue their position and raise problems with conflicting standpoints. Alongside an up-to-date introduction to a core philosophical stance, each contributor provides a critical response to their opponent and clear explanation of their view. Discussion questions are included at the end of each chapter to guide further discussion. With chapters ranging from why the government should never wage war to what is art and does morality depend on God, this introduction covers questions lying at the heart of debates about what does and does not have value.

Democracy, Intermediation, and Voting on Four Continents Richard Gunther, Hans-Jürgen Puhle, José R. Montero, 2007 This book presents the results of systematic comparative analyses of electoral behavior and support for democracy in 13 countries on four continents. It is based on national election surveys held in old and new democracies in Europe (Germany, Britain, Spain, Greece, Italy, Portugal, Bulgaria), North and South America (the United States, Chile and Uruguay), and Asia (Hong Kong) between 1990 and 2004. It is methodologically innovative, notwithstanding the fact that its core concern with political intermediation (i.e., the flow of political information from parties and candidates to voters through the mass-communications media, membership in secondary associations, and direct, face-to-face contacts within interpersonal networks) was first introduced to the study of electoral behavior by Paul Lazarsfeld and his collaborators in the 1940s. In addition to

reviving that long-neglected analytical framework, this book breaks new ground by systematically exploring the impact of socio-political values on electoral behavior. It also analyzes the role of political intermediation in forming basic attitudes towards democracy (which are crucial for the consolidation of new democracies), and, in turn, channeling those orientations into various forms of political behavior. Some of the findings presented in this volume are dramatic, and clearly reveal that these channels of information are among the most powerful factors influencing the development of political attitudes and partisan electoral behavior. So, too, are socio-political values in some countries (particularly the United States). This volume is the first book-length product of the now 18-country Comparative National Elections Project.

Blockheads! Adam Pautz, Daniel Stoljar, 2019-02-12 New essays on the philosophy of Ned Block, with substantive and wide-ranging responses by Block. Perhaps more than any other philosopher of mind, Ned Block synthesizes philosophical and scientific approaches to the mind; he is unique in moving back and forth across this divide, doing so with creativity and intensity. Over the course of his career, Block has made groundbreaking contributions to our understanding of intelligence, representation, and consciousness. *Blockheads!* (the title refers to Block's imaginary counterexample to the Turing test—and to the Block-enthusiast contributors) offers eighteen new essays on Block's work along with substantive and wide-ranging replies by Block. The essays and responses not only address Block's past contributions but are rich with new ideas and argument. They importantly clarify many key elements of Block's work, including his pessimism concerning such thought experiments as Commander Data and the Nation of China; his more general pessimism about intuitions and introspection in the philosophy of mind; the empirical case for an antifunctionalist, biological theory of phenomenal consciousness; the fading qualia problem for a biological theory; the link between phenomenal consciousness and representation (especially spatial representation); and the reducibility of phenomenal representation. Many of the contributors to *Blockheads!* are prominent philosophers themselves, including Tyler Burge, David Chalmers, Frank Jackson, and Hilary Putnam. Contributors Ned Block, Bill Brewer, Richard Brown, Tyler Burge, Marisa Carrasco, David Chalmers, Frank Jackson, Hakwan Lau, Geoffrey Lee, Janet Levin, Joseph Levine, William G. Lycan, Brian P. McLaughlin, Adam Pautz, Hilary Putnam, Sydney Shoemaker, Susanna Siegel, Nicholas Silins, Daniel Stoljar, Michael Tye, Sebastian Watzl

Think Right Or Wrong, Not Left Or Right Anders Ingemarson, 2020-12-29 Do you feel that life is too focused on making ends meet: mortgage, credit card, and car payments, paying back student loans, childcare fees, health insurance premiums, and perhaps putting food on the table? And on top of that thinking about saving for a rainy day and for retirement? Do you think that you don't have as much control of your life as you would like? And as a result, are you attracted to the promise of a government safety net from cradle-to-grave that will take care of all of the above and more, and let you focus on the important things in life? Whether you answered yes or no to these questions, this book is for you. Asserting that you have the moral Right to be in control of your life, *Think Right or Wrong, Not Left or Right: A 21st Century Citizen Guide* advocates that neither today's political left nor right have your best interests at hand. Their alluring promise of a cradle-to-grave safety net is deceptive, as in reality it transfers control of your life from you to society, one government program, one tax, and one regulation at a time. The book shows why the traditional political left-to-right spectrum presents you with two false alternatives, and that politics instead should be viewed through a morally Right-to-Wrong lense. It explains the moral groundswell required for change to take place, and concretizes how we may get from here to there with examples from health insurance and healthcare, retirement planning, and education. Finally, the book offers you a blueprint for affecting change that will move society towards giving you, your children and your grandchildren more control of your life. Whether you consider yourself left-, right-, or independent-leaning, *Think Right or Wrong, Not Left or Right: A 21st Century Citizen Guide* challenges your views of morality and politics—and provides a reset on what it means to be in control of your life.

Elections and Democracy Jacques Thomassen, 2014-07-03 *Elections and Democracy* addresses the contrast between two different views on representative democracy. According to the first view elections are a mechanism to hold government accountable. In the second view elections are primarily a means to ensure that citizens' views and interests are properly represented in the democratic process. The majoritarian and consensus models of democracy are the embodiment in institutional structures of these two different views of democracy. In the majoritarian view the single most important function of an election is the selection of a government. The concentration of power in the hands of an elected majority government makes it accountable to the people. In consensus models of democracy, or proportional systems, the major function of elections is to elect the members of parliament who together should be as representative as possible of the electorate as a whole. The criterion for the democratic quality of the system is how representative parliament really is. The book explores how far these different views and their embodiment in institutional structures influence vote choice, political participation and satisfaction with the functioning of democracy. The volume is based on data from the Comparative Study of Electoral Systems (CSES), a comparative study across 36 countries. The general conclusion of the book is that formal political institutions are less relevant for people's attitudes and behavior than often presumed. Rather than formal political institutions like the electoral system it seems to be characteristics of the party system like polarization and the clarity of responsibility that really matter. The Comparative Study of Electoral Systems (CSES) is a collaborative program of research among election study teams from around the world. Participating countries include a common module of survey questions in their post-election studies. The resulting data are deposited along with voting, demographic, district, and macro variables. The studies are then merged into a single, free, public dataset for use in comparative study and cross-level analysis. The set of volumes in this series is based on these CSES modules, and the volumes address the key theoretical issues and empirical debates in the study of elections and representative democracy. Some of the volumes will be organized around the theoretical issues raised by a particular module, while others will be thematic in their focus. Taken together, these volumes will provide a rigorous and ongoing contribution to understanding the expansion and consolidation of democracy in the twenty-first century. Series editors: Hans-Dieter Klingemann and Ian McAllister

Red, White & Liberal Alan Colmes, 2011-09-20 As one of the foremost liberal voices in television and radio today, Alan Colmes has long been braving the wilds of controversial issues and conservative slander. The host of the talk-radio show Fox News Live with Alan Colmes and cohost of Fox News Channel's hit debate show Hannity & Colmes, Colmes now offers this witty, passionate wake-up call to America. Colmes takes on the fundamental question: How can we protect our nation without diminishing our liberties, and regain our place in the world as an example of democracy? Colmes urges Americans to see past the government's manipulation of the War

on Terror to silence critics; the lies we've been force-fed about the war in Iraq and Afghanistan; and the conservative smear campaign that has turned liberal into a four-letter word. From debunking the myth of the liberal media to exposing conservative hypocrisy, Colmes presents the issues with thoughtful, provocative arguments, hard facts and logic, and searing humor. Certain to spark debate and cause readers to reevaluate and reaffirm their beliefs, Red, White & Liberal powerfully argues that despite our differences, we must extend our hands across party lines to find solutions, protect our shores, and preserve our freedoms.

Uncovering the Codes Yöl-gyu Kim, 2005 Uncovering the Codes: Fifteen Keywords in Korean Culture is a cultural guide to what is unique about Koreans and their way of life. The questions raised in this book range from the mundane to the spiritual, each touching on the essence of Korea's 5,000-year-old culture: Why is a Korean spoon flat and round, not oval? Why do Korean women pray to a bowl of water? Why do Koreans eat dog meat? Kim Yol-kyu, a renowned scholar of Korean folklore and literature, carefully digs up the answers embedded deep in centuries-old customs. Quoting from a wide scope of references, from ancient mythology to Merleau-Ponty and Levi-Strauss, Kim unearths the fascinating connections between the past and the present. Kim is Dignified Professor of Korean Studies at Keimyung University in Daegu, Korea, where he also directs the Academia Koreana.

Event Cognition Viki McCabe,Gerald J. Balzano,2014-02-24 This series of volumes is dedicated to furthering the development of psychology as a branch of ecological science. In its broadest sense, ecology is a multidisciplinary approach to the study of living systems, their environments, and the reciprocity that has evolved between the two. The purpose of this series is to form a useful collection, a resource, for people who wish to learn about ecological psychology and for those who wish to contribute to its development. The series will include original research, collected papers, reports of conferences and symposia, theoretical monographs, technical handbooks, and works from the many disciplines relevant to ecological psychology.
