**Creating Campus Community** William M. McDonald, 2007-07-23 We have at our disposal one of the greatest vehicles for...community-building known to humankind--the one called education. --from the foreword by Parker Palmer Connecting authentically and deeply with others across all dimensions of life enriches the human spirit. The sense of community resulting from such connections is a hallmark of a supportive campus environment, which we know is an important factor in enhancing student learning. The contributions to this book offer a vision we can work toward and provide instructive examples from different types of institutions to point the way. --George D. Kuh, chancellor's professor and director, National Survey of Student Engagement, Indiana University Ernie Boyer was a giant in higher education. This book, a resource guide, focuses on one of his great loves--campus community. The book examines his contributions and offers a compelling agenda for action. --Arthur Levine, president, Teachers College, Columbia University This well-written and timely book draws on the lessons learned from five very different institutions as they attempted to address a major challenge to higher education--building effective campus communities. Practitioners will find this to be an invaluable resource and guide as they attempt to bring Ernie Boyer's vision to life on their campuses. A great tribute to one of America's leading educators! --Charles C. Schroeder, professor of higher

education, University of Missouri-Columbia There is no topic more important in higher education today than creating campus community. McDonald and his associates have indeed lived up to Ernest Boyer's legacy by presenting us with a remarkable set of campus models for us to admire. . . and emulate. --Yolanda T. Moses, president, American Association for Higher Education This book comes at an auspicious time of educational transformation. Like the Boyer Center, this book's fundamental priority in meeting today's challenging new realities is the discovery and creation of new forms of community. --Glen R. Bucher, executive director, the Boyer Center

African Legacy Bernard Lugan, 2003 Did colonization really result in the wholesale plundering of Africa's natural resources? Did Europe and America get rich at the expense of Africa and her people? Not according to Lugan, who challenges conventional wisdom and makes a plea for greater responsibility for Africa itself.

*Heritage as Community Research* Graham, Helen, Vergunst, Jo, 2019-03-13 *Heritage as Community Research* explores the nature of contemporary heritage research involving university and community partners. Putting forward a new view of heritage as a process of research and involvement with the past, undertaken with or by the communities for whom it is relevant, the book uses a diverse range of case studies, with many chapters co-written between academics and community partners. Through this extensive work, the Editors show that the process of research itself can be an empowering force by which

communities stake a claim in the places they live.

**Legality and Community** Philip Selznick, 2002

Twenty-three essays from the fields of sociology, legal theory, social theory, and moral philosophy consider the role of basic moral and social commitments, the ideal of legality, the sociology of institutions, and the search for community. Questions surrounding the need for responsive law and governance, the development of humane institutions, and the balance between freedom and communal life are expressly considered. **Rural Communities** Cornelia Butler Flora, Jan L.

Flora, Stephen P. Gasteyer, 2015-08-04 Combines an essential theoretical framework with illustrative stories to show the dynamics of stability and change in America's rural communities.

*Judge Richard S. Arnold* Polly J.

Price, 2009-09-25 Through internal court documents, interviews, and Arnold's diaries, Price traces the former judge's life, career, and political transformation from an elite Southerner with deep

misgivings about Brown v. Board of Education to a modern champion of civil rights.

**The Battle that Forged Modern Baseball** Daniel R. Levitt, 2012-03-09 In late 1913 the newly formed Federal League declared itself a major league in competition with the established National and American Leagues. Backed by some of America's wealthiest merchants and industrialists, the new organization posed a real challenge to baseball's prevailing structure. For the next two years the well-established leagues fought back furiously in the press, in the courts, and on the field. The story of this fascinating and complex historical battle centers on the machinations of both the owners and the players, as the Federals struggled for profits and status, and players organized baseball's first real union. Award winning author, Daniel R. Levitt gives us the most authoritative account yet published of the short-lived Federal League, the last professional baseball league to challenge the National League and American League monopoly.

Heritage and Community Engagement Emma Waterton, Steve Watson, 2013-09-13 This book is about the way that professionals in archaeology and in other sectors of heritage interact with a range of stakeholder groups, communities and the wider public. Whilst these issues have been researched and discussed over many years and in many geographical contexts, the debate seems to have settled into a comfortable stasis wherein it is assumed that all that can be done by way of engagement has been done and there is little left to achieve. In some cases, such engagement is

built on legislation or codes of ethics and there can be little doubt that it is an important and significant aspect of heritage policy. This book is different, however, because it questions not so much the motivations of heritage professionals but the nature of the engagement itself, the extent to which this is collaborative or contested and the implications this has for the communities concerned. Furthermore, in exploring these issues in a variety of contexts around the world, it recognises that heritage provides a source of engagement within communities that is separate from professional discourse and can thus enable them to find voices of their own in the political processes that concern them and affect their development, identity and well-being. This book was published as a special issue of the International Journal of Heritage Studies.

**Community-based Heritage in Africa** Peter R. Schmidt, 2017-03-03 This volume provides a powerful alternative to the Western paradigms that have governed archaeological inquiry and heritage studies in Africa. Community-based Heritage Research in Africa boldly shifts focus away from top-down community engagements, usually instigated by elite academic and heritage institutions, to examine locally initiated projects. Schmidt explores how and why local research initiatives, which are often motivated by rapid culture change caused by globalization, arose among the Haya people of western Tanzania. In particular, the trauma of HIV/AIDS resulted in the loss of elders who had performed oral traditions and rituals at sacred places, the two most recognized forms of

heritage among the Haya as well as distinct alternatives to the authorized heritage discourse favored around the globe. Examining three local initiatives, Schmidt draws on his experience as an anthropologist invited to collaborate and co-produce with the Haya to provide a poignant rendering of the successes, conflicts, and failures that punctuated their participatory community research efforts. This frank appraisal privileges local voices and focuses attention on the unique and important contributions that such projects can make to the preservation of regional history. Through this blend of personalized narrative and analytical examination, the book provides fresh insights into African archaeology and heritage studies.

*Community Heritage in the Arab Region* Arwa Badran, Shatha Abu-Khafajah, Sarah Elliott, 2022-11-07 This book investigates approaches to community heritage within the Arab region and the underlying theories associated with these approaches. It aims, within the context of

the region, to define 'community' and 'heritage', as well as examine the emergence and development of this field. The volume's contributors deploy a wealth of case studies from the Middle East and North Africa to provide a unique forum for discussion, comparability, analysis and deeper understandings of current trends in community heritage. In particular, the volume explores the relationship between communities and their heritage, the meanings and values placed upon it, the nature and degree of community participation and engagement in its interpretation and management, and how its different registers affect and produce sometimes unexpected community heritage formations. It also examines the level of responsibility held within the profession towards this essentially democratic process of public participation in their heritage in a region shaped by controversial histories, political turmoil and tourism-driven economies. The volume builds on current research and practice in community heritage globally by debating and re-centring a suite of familiar and new issues related to hitherto under-researched regional-specific methodologies, and developing fresh insight into the theoretical underpinning of these practices. It will be of value to heritage scholars and practitioners as well as those interested in politics, identity, education and the dynamics of heritage-based sustainable development.

**A Community Empowerment Approach to Heritage Management** Evangelos Kyriakidis, 2019-11-26 This book presents an innovative approach to public archaeology in a rural community, which has had

powerful results in terms of empowering a village community in Crete to become long-term guardians of their cultural heritage. Highlighting the theoretical and local contexts of the Philioremos Peak Sanctuary Public Archeology Project, this book explores the methodology and the project outcomes, and assesses best practice in the field of public archaeology within a rural community. As well as expanding the research on Minoan peak sanctuaries, the volume contributes to a greater understanding of how rural communities can be successfully engaged in the management of heritage, and is relevant to archaeologists and other heritage professionals wishing to understand the latest developments in public archaeology.

*Community Archaeology and Heritage in Africa*  
Peter R. Schmidt, Innocent Pikirayi, 2016-06-17 This volume provides new insights into the distinctive contributions that community archaeology and heritage make to the decolonization of archaeological practice. Using innovative approaches, the contributors explore important initiatives which have protected and revitalized local heritage, initiatives that involved archaeologists as co-producers rather than leaders. These case studies underline the need completely reshape archaeological practice, engaging local and indigenous communities in regular dialogue and recognizing their distinctive needs, in order to break away from the top-down power relationships that have previously characterized archaeology in Africa. *Community Archaeology and Heritage in Africa* reflects a determined effort to change how archaeology is

taught to future generations. Through community-based participatory approaches, archaeologists and heritage professionals can benefit from shared resources and local knowledge; and by sharing decision-making with members of local communities, archaeological inquiry can enhance their way of life, ameliorate their human rights concerns, and meet their daily needs to build better futures. Exchanging traditional power structures for research design and implementation, the examples outlined in this volume demonstrate the discipline's exciting capacity to move forward to achieve its potential as a broader, more accessible, and more inclusive field.

**Atom and Void** J. Robert Oppenheimer, 2014-07-14  
J. Robert Oppenheimer was one of the outstanding physicists of his generation. He was also an immensely gifted writer and speaker, who thought deeply about the way that scientific discoveries have changed the way people live and think. Displaying his subtlety of thought and expression as do few other documents, this book of his lectures discusses the moral and cultural implications of developments in modern physics. Originally published in 1989. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published

by Princeton University Press since its founding in 1905.

**Where Do We Go from Here** Dr. Martin Luther King, Jr., 2010-01-01 In 1967, Dr. Martin Luther King, Jr., isolated himself from the demands of the civil rights movement, rented a house in Jamaica with no telephone, and labored over his final manuscript. In this significantly prophetic work, which has been unavailable for more than ten years, we find King's acute analysis of American race relations and the state of the movement after a decade of civil rights efforts. Here he lays out his thoughts, plans, and dreams for America's future, including the need for better jobs, higher wages, decent housing, and quality education. With a universal message of hope that continues to resonate, King demanded an end to global suffering, powerfully asserting that humankind—for the first time—has the resources and technology to eradicate poverty.

**Handbook of Heritage, Community, and Native American Languages in the United States** Terrence G. Wiley, Joy Kreeft Peyton, Donna Christian, Sarah Catherine K. Moore, Na Liu, 2014-01-03 Co-published by the Center for Applied Linguistics Timely and comprehensive, this state-of-the-art overview of major issues related to heritage, community, and Native American languages in the United States, based on the work of noted authorities, draws from a variety of perspectives—the speakers; use of the languages in the home, community, and wider society; patterns of acquisition, retention, loss, and revitalization of the languages; and specific

education efforts devoted to developing stronger connections with and proficiency in them. Contributions on language use, programs and instruction, and policy focus on issues that are applicable to many heritage language contexts. Offering a foundational perspective for serious students of heritage, community, and Native American languages as they are learned in the classroom, transmitted across generations in families, and used in communities, the volume provides background on the history and current status of many languages in the linguistic mosaic of U.S. society and stresses the importance of drawing on these languages as societal, community, and individual resources, while also noting their strategic importance within the context of globalization.
