An Unpredictable Match Barbara Dunlop, 2016-05-12 From New York Times
Bestselling Author Barbara Dunlop, a comedic, contemporary romance series featuring the high-tech antics of matchmaking senior citizens unleashed on their unsuspecting heirs. When Hammond Vashon's family mansion is invaded by a Hollywood film production, he senses a conspiracy. He knows his grandmother Daisy has plans to match-make him, and it doesn't take long to identify his grandmother as the force behind the production and starlet Pippa Carrington as his intended match. Line producer MacKenzie Bowen is shocked when Hammond kicks her boss off the set and promotes her to producer. She's attracted to handsome, wealthy mansion owner, but she knows better than to get romantically involved with the guy at the top of the film food chain—at least, she ought to know better. Fascinated by MacKenzie, and more than interested in exploring their mutual attraction, Hammond lets his guard down. Busy avoiding Pippa and worrying about his grandmother's machinations, he doesn't realize his true match is MacKenzie until it's too late. After a failed marriage, Malcolm Sterling has returned home with plans to take over the family matchmaking business. However, because his mother doubts his ability, he's forced to prove himself by hosting a dating show to help women find love. The catch? The producers have brought in a pickup artist to act as his co-host, so now it's a competition to determine who is the better matchmaker. Natalie Hale never intended for her online, dating expert alter ego to provide her with an opportunity of a lifetime. Unfortunately, she's faced with working with a man who is as infuriating as he is tempting. Her secret identity has allowed her to explore dating and relationships, but she needs to keep the two parts of her life separate—which becomes harder the more she works with Malcolm. Sparks fly as the competition heats up. Malcolm has definitely met his match in Natalie, but when all secrets are exposed, will the ultimate prize be love?

Computer Science & Perl Programming Jon Orwant, 2002-11-04 In its first five years of existence, *The Perl Journal* ran 247 articles by over 120 authors. Every serious Perl programmer subscribed to it, and every notable Perl guru jumped at the opportunity to write for it. TPJ explained critical topics such as regular expressions, databases, and object-oriented programming, and demonstrated Perl's utility for fields as diverse as astronomy, biology, economics, AI, and games. The magazine gave birth to both the Obfuscated Perl Contest and the Perl Poetry contest, and remains a proud and timeless achievement of Perl during one of its most exciting periods of development. *Computer Science and Perl Programming* is the first volume of *The Best of the Perl Journal*, compiled and re-edited by the original editor and publisher of *The Perl Journal*, Jon Orwant. In this series, we've taken the very best (and still relevant) articles published in TPJ over its 5 years of publication and immortalized them into three volumes. This volume has 70 articles devoted to hard-core computer science, advanced programming techniques, and the underlying mechanics of Perl. Here's a sample of what you'll find inside: Jeffrey Friedl on Understanding Regexes Mark Jason Dominus on optimizing your Perl programs with Memoization Damian Conway on Parsing Tim Meadowcroft on integrating Perl with Microsoft Office Larry Wall on the culture of Perl Written by 41 of the most prominent and prolific members of the closely-knit Perl community, this anthology does what no other book can, giving unique insight into the real-life applications and powerful techniques made possible by Perl. Other books tell you how to use Perl, but this book goes far beyond that: it shows you not only how to use Perl, but what you could use Perl for. This is more than just *The Best of the Perl Journal* -- in many ways, this is the best of Perl.
