The Story of the Selma Voting Rights Marches in Photographs David Aretha,2014-01-01 The Civil Rights Act of 1964 was a momentous victory for civil rights activists, but one major obstacle remained in the path toward equal rights for African Americans: the right to vote. In the South, segregationists prevented African Americans from voting. Civil rights leaders believed it was time for strong action and chose Selma, Alabama, as the rallying point. There, the marches and protests captured the nation's attention. Through gripping primary source photographs, author David Aretha explores this important time in American history.

East of Asia Minor Timothy Bruce Mitford, 2018 The north-eastern frontier of the Roman Empire - one of the great gaps in modern knowledge of the ancient world - has long eluded research. It has defied systematic exploration and been insulated against all but passing survey by wars, instability, political sensitivities, language, and the region's wild, remote mountains, mostly accessible only on horseback or on foot. Its path lay across eastern Turkey, following the Euphrates valley northwards from Syria, through gorges and across great ranges, and passing over the Pontic Alps to reach the further shores of the Black Sea. Vespasian established Rome's frontier against Armenia half a century before Hadrian's Wall. Five times as long, and climbing seven times as high, it was garrisoned ultimately by four legions and a large auxiliary army, stationed in intermediate forts linked by military roads. The two volumes of *East of Asia Minor: Rome's Hidden Frontier* - based on research, field work conducted largely on foot, and new discoveries - document the topography, monuments, inscriptions, and sighted coins of the frontier, looking in detail at strategic roads, bridges, forts, watch and signalling systems, and navigation of the Euphrates itself. Study of the terrain provides a foundation for interpreting the literary and epigraphic evidence for the frontier and its garrisons. Military activity, which extended to the Caucasus and the Caspian, is placed in the context of climate, geography, and inter-regional trade routes. 28 colour maps and over 350 photographs, plans, and travellers' sketches not only document the history of eastern Turkey as a frontier region of the Roman empire, but also reveal an ancient way of life, still preserved during the 1960s and 1970s, but now almost obliterated by the developments of the modern world.

The Clayton Collection Frances Claire McIntosh, 2019-03-29 *Archaeology of Roman Britain, Volume 1* This book examines the archaeological material from Hadrian's Wall within the significant Clayton Collection. The Collection was formed through the work of John Clayton, antiquarian and landowner, in the 19th century. His work took place at a pivotal time in the study of Hadrian's Wall, as public interest was growing, access was improving, and the discipline of archaeology was developing. As part of a large network of antiquarians, Clayton excavated, studied and published his discoveries. After his death, his archaeological estate was retained, and the Collection was moved into a museum in 1896. Despite being in the public domain for so long, the material has never been studied as a whole, or in the light of its 19th century creation. This work is the first to bring together the history and development of the collection alongside the material itself. It offers an insight into how important antiquarian collections can provide valuable information about Roman life.
