Digital Entertainment Superguide , Audio and video content is all around us. And these days much of it comes not from TV cables, satellite dishes, and radio antennas, but from our digital devices around the house, streaming over the Internet and local networks. And that's why we created the Digital Entertainment Superguide, a primer with everything you need to know to get started. This book walks you through how to set up your home network and choose the right hardware—set-top boxes, smart TVs, media center computers, streaming speakers, remote controls, and more—for your needs. Like to watch TV shows and movies but not sure where to find what? We've got you covered with a guide to streaming video sources for your TV or mobile devices. We don't leave music lovers out either, as we help you choose the best streaming audio service. Do you want Mog, Rdio, Rhapsody, Slacker, or Spotify? How much does each service cost? Which sounds best? We answer all those questions and more in the pages that follow. Finally, if you're wondering how to move audio and video around the house—stream music wirelessly from an iPhone to an AirPlay speaker in the living room or send video from a computer to your beautiful wall-mounted HDTV—you've come to the right place. We'll even show you how to use your smartphone or tablet to control it all. So read on, and let the fun begin!

Universal Access in Human-Computer Interaction. Users Diversity Constantine Stephanidis,2011-06-27 The four-volume set LNCS 6765-6768 constitutes the refereed proceedings of the 6th International Conference on Universal Access in Human-Computer Interaction, UAHCI 2011, held as Part of HCI International 2011, in Orlando, FL, USA, in July 2011, jointly with 10 other conferences addressing the latest research and development efforts and highlighting the human aspects of design and use of computing systems. The 70 revised papers included in the second volume were carefully reviewed and selected from numerous submissions. The papers are organized in the following topical sections: user models, personas and virtual humans; older people in the information society; designing for users diversity; cultural and emotional aspects; and eye tracking, gestures and brain interfaces.

Smart Cities and Smart Communities Srikanta Patnaik,Siddhartha Sen,Sudeshna Ghosh,2022-05-28 "Smart City" programs and strategies have become one of the most dominant urban agendas for local governments worldwide in the past two decades. The rapid urbanization rate and unprecedented growth of megacities in the 21st century triggered drastic changes in traditional ways of urban policy and planning, leading to an influx of digital technology applications for fast and efficient urban management. With the rising popularity in making our cities "smart", several domains of urban management, urban infrastructure, and urban quality-of-life have seen increasing dependence on advanced information and communication technologies (ICTs) that optimize and control the day-to-day functioning of urban systems. Smart Cities, essentially, act as digital networks that obtain large-scale real-time data on urban systems, process them, and make decisions on how to manage them efficiently. The book presents 26 chapters, which are organized around five topics: (1) Conceptual framework for smart cities and communities; (2) Technical concepts and models for smart city and communities; (3) Civic engagement and citizen participation; (4) Case studies from the Global North; and (5) Case studies from the Global South.

Recent Advancements in Smart Remote Patient Monitoring, Wearable Devices, and Diagnostics Systems Zeshan, Furkh,Ahmad, Adnan,2023-01-13 Different healthcare technologies have been in use for decades. These technologies are continuously evolving and changing the way medicine will be practiced in the future. These technologies allow medical practice from anywhere, at any time, and from any device. These technologies are

mainly concerned with the resources, devices, and methods required to optimize the acquisition, storage, retrieval, processing, and use of information in health. Recent Advancements in Smart Remote Patient Monitoring, Wearable Devices, and Diagnostics Systems provides relevant theoretical and practical frameworks, as well as the latest empirical research findings in the area. It provides insights and supports executives concerned with remote patient monitoring through wearable devices and diagnostics systems. Covering topics such as cloud computing, obesity monitoring systems, and photoacoustic imaging, this premier reference source is an essential resource for hospital administrators, medical technicians, healthcare professionals, medical students and educators, librarians, researchers, and academicians.

Nanotechnology-Based Smart Remote Sensing Networks for Disaster

Prevention Adil Denizli, Marcelo S. Alencar, Tuan Anh Nguyen, David Motaung, 2022-05-29 Nanotechnology-Based Smart Remote Sensing Networks for Disaster Prevention outlines how nanotechnology and space technology could be applied for the detection of disaster risks in early stages, using cheap sensors, cheap constellations of low Earth orbit (LEO) satellites, and smart wireless networks with artificial intelligence (AI) tools. Nanomaterial-based sensors (nanosensors) can offer several advantages over their micro-counterparts, such as lower power or self-powered consumption, high sensitivity, lower concentration of analytes, and smaller interaction distances between the object and the sensor. Besides this, with the support of AI tools, such as fuzzy logic, genetic algorithms, neural networks, and ambient intelligence, sensor systems are becoming smarter when a large number of sensors are used. This book is an important reference source for materials scientists, engineers, and environmental scientists who are seeking to understand how nanotechnology-based solutions can help mitigate natural disasters. Shows how nanotechnology-based solutions can be combined with space technology to provide more effective disaster management solutions Explores the best materials for manufacturing different types of nanotechnology-based remote sensing devices Assesses the challenges of creating a nanotechnology-based disaster mitigation system in a cost-effective way

Internet of Things, for Things, and by Things Abhik Chaudhuri, 2018-08-28 This book explains IoT technology, its potential applications, the security and privacy aspects, the key necessities like governance, risk management, regulatory compliance needs, the philosophical aspects of this technology that are necessary to support an ethical, safe and secure digitally enhanced environment in which people can live smarter. It describes the inherent technology of IoT, the architectural components and the philosophy behind this emerging technology. Then it shows the various potential applications of the Internet of Things that can bring benefits to the human society. Finally, it discusses various necessities to provide a secured and trustworthy IoT service.

Never Look Back John Misak, 2023-12-15 The Sixth Book in the Acclaimed John Keegan Mystery Series! Homicide Detective John Keegan has risen in the ranks. Can he balance command and detective duties while hunting the killer of a seemingly benevolent philanthropist? Tech guru Keith Canton is found dead in his apartment, the killer using an old-style murder weapon: piano wire. It's a method NYPD Homicide Detective John Keegan has seen before. Canton had no clear enemies yet investigation into his life reveals three avenues to a suspect. The first is an online game called Deathtrip Dungeon. Players have altered the game to include a powerful hallucinogenic drug called DMT. Players now engage in offline versions of the game while experiencing hallucinations that mimic the game environment. Players may have died because of it. Could Canton, whose project list

and known associates connect to the game, have become one of its victims? Second, Canton last did work for Colby Fitzpatrick, a popular pollster who has never revealed his political leanings. He is highly sought by politicians in hotly contested Senate and mayoral races. Politics are a dirty game and Canton may have gotten caught in the crossfire. Lastly, Canton mentored and heavily promoted the founders of a company called Rush VR. Rush has made a breakthrough in recreating memories. Keegan demos their work, experiences a life-like visit to the past, and discovers a strong connection between the project and Deathtrip Dungeon. Perhaps Canton's death came from an involvement with the city's underbelly of drugs and crime. Others turn up dead during the investigation and Keegan, his partner Karl Lavin, and his wife, Pauline, must drain every resource to solve Canton's murder and save the city from an impending mass killer.

Immersive Communication Qin Li, 2019-12-06 Communication, like the atmosphere itself, is ubiquitous and essential for humans and with the development of new technologies, such as wireless internet, 3D printing and virtual reality, it has become almost impossible to live without it. In addition, means of communication have changed immeasurably. This book proposes a new research paradigm that incorporates new features and factors of communication and a new theoretical framework named "immersive communication". Pointing out that communication today has moved beyond the bi-directional, mass communication of the second media age to ubiquitous, immersive communication in the third media age, the author discusses the definition, characteristics, information structure, and models of immersive communication using various examples including Fitbit, Apple, 4G and other technologies, while envisioning future applications of the immersive communication model. Scholars and students of communication studies, especially those interested in the manifestations of the new media age, will all benefit from this book. It will also appeal to readers interested in new media and communication theories.
