The Second Woman Bible Study Penny R. Smith, Ed.D.,2015-11-13 The Second Woman Bible Study—which takes its name from the story of King Solomon's ruling regarding a child and two possible mothers—offers guidance to women who have endured traumatic experiences or made life choices they regret. This study offers a ten-week program to facilitate healing from domestic violence, sexual violence, or post-abortion grief. Each week, the study focuses on one of the ten processes of change or interventions that encourage change based on the Transtheoretical Model of Change, developed by psychologist James Prochaska. Author Penny R. Smith, Ed.D, provides questions that lead to self-examination and self-evaluation. Through those questions, scriptural and real-life examples, The Second Woman Bible Study can help you find your way back from trauma and know that healing is not only possible but within your reach.

Supporting Life Skills for Children and Young People with Vision Impairment and Other Disabilities Fiona Broadley,2022-12-29 This practical resource is designed to help professionals, parents, and carers on their journey to independence with children and young people with vision impairments. Building on the ideas and practices introduced in Supporting Life Skills for Young Children with Vision Impairment and Other Disabilities, this book addresses middle childhood, the period from when the child starts school, through to the onset of puberty. It offers a wealth of practical strategies and activities to enhance key skills, including personal safety, advanced dressing, personal hygiene, dealing with puberty, social skills, time, money and organisational skills, eating, drinking and food preparation skills, and the transition to secondary school. This book: Addresses the main independent living skills areas for vision impaired children in middle childhood, by providing simple explanations of skills and offering practical strategies and techniques to support progression onto the next stage. Is written in a fully accessible style, with photocopiable pages and additional downloadable eResources. Provides a variety of documentation to chart the child's development and show progress over time. This invaluable resource puts the changes that occur during middle childhood into context and will help busy professionals, families and carers start preparing children with a vision impairment for adulthood, allowing them to become confident and independent individuals.

Handbook of Mobile Data Privacy Aris Gkoulalas-Divanis,Claudio Bettini,2018-10-26 This handbook covers the fundamental principles and theory, and the state-of-the-art research, systems and applications, in the area of mobility data privacy. It is primarily addressed to computer science and statistics researchers and educators, who are interested in topics related to mobility privacy. This handbook will also be valuable to industry developers, as it explains the state-of-the-art algorithms for offering privacy. By discussing a wide range of privacy techniques, providing in-depth coverage of the most important ones, and highlighting promising avenues for future research, this handbook also aims at attracting computer science and statistics students to this interesting field of research. The advances in mobile devices and positioning technologies, together with the progress in spatiotemporal database research, have made possible the tracking of mobile devices (and their human companions) at very high accuracy, while supporting the efficient storage of mobility data in data warehouses, which this handbook illustrates. This has provided the means to collect, store and process mobility data of an unprecedented quantity, quality and timeliness. As ubiquitous computing pervades our society, user mobility data represents a very useful but also extremely sensitive source of information. On one hand, the movement traces that are left behind by the mobile devices of the users can be very useful in a wide spectrum of applications such as urban planning, traffic engineering, and environmental pollution management. On the other hand, the disclosure of mobility data to third parties may severely jeopardize the privacy of the users whose movement is recorded, leading to abuse scenarios such as user tailing and profiling. A significant amount of research work has been conducted in the last 15 years in the area of mobility data privacy and important research directions, such as privacy-preserving mobility data management, privacy in location sensing technologies and location-based services, privacy in vehicular communication networks, privacy in location-based social networks, privacy in participatory sensing systems which this handbook addresses.. This handbook also identifies important privacy gaps in the use of mobility data and has resulted to the adoption of international laws for location privacy protection (e.g., in EU, US, Canada, Australia, New Zealand, Japan, Singapore), as well as to a large number of interesting technologies for privacy-protecting mobility data, some of which have been made available through open-source systems and featured in real-world applications.

Kids Across the Spectrums Meryl Alper,2023-08-15 An ethnographic study of diverse children on the autism spectrum and the role of media and technology in their everyday lives. In spite of widespread assumptions that young people on the autism spectrum have a "natural" attraction to technology—a premise that leads to significant speculation about how media helps or harms them—relatively little research actually exists about their everyday tech use. In Kids Across the Spectrums, Meryl Alper fills this gap with the first book-length ethnography of the digital lives of autistic young people. Based on research with more than sixty neurodivergent children from an array of racial, ethnic, and socioeconomic backgrounds, Kids Across the Spectrums delves into three overlapping areas of their media usage: cultural belonging, social relationships, and physical embodiment. Alper's work demonstrates that what autistic youth do with technology is not radically different from their non-autistic peers. However, significant social and health inequalities—including limited recreational programs, unsafe neighborhoods, and challenges obtaining appropriate therapeutic services—spill over into their media habits. With an emphasis on what autistic children bring to media as opposed to what they supposedly lack socially, Alper argues that their relationships do not exist outside of how communication technologies affect sociality, nor beyond the boundaries

of stigmatization and society writ large. Finally, she offers practical suggestions for the education, healthcare, and technology sectors to promote equity, inclusion, access, and justice for autistic kids at home, at school, and in their communities.

A Research Agenda for Digital Geographies Tess Osborne, Phil Jones, 2023-05-09 Over the past decade, digital geographies has emerged as a dynamic area of scholarly enquiry, critically examining how the digital has reshaped the geography of our world. Bringing together authors working at the cutting-edge of the field, and grounding abstract ideas in case studies, this Research Agenda looks at the ways in which technology has altered all aspects of society, culture and the environment.

Grown and Flown Lisa Heffernan, Mary Dell Harrington, 2019-09-03 PARENTING NEVER ENDS. From the founders of the #1 site for parents of teens and young adults comes an essential guide for building strong relationships with your teens and preparing them to successfully launch into adulthood The high school and college years: an extended roller coaster of academics, friends, first loves, first break-ups, driver's ed, jobs, and everything in between. Kids are constantly changing and how we parent them must change, too. But how do we stay close as a family as our lives move apart? Enter the co-founders of Grown and Flown, Lisa Heffernan and Mary Dell Harrington. In the midst of guiding their own kids through this transition, they launched what has become the largest website and online community for parents of fifteen to twenty-five year olds. Now they've compiled new takeaways and fresh insights from all that they've learned into this handy, must-have guide. Grown and Flown is a one-stop resource for parenting teenagers, leading up to—and through—high school and those first years of independence. It covers everything from the monumental (how to let your kids go) to the mundane (how to shop for a dorm room). Organized by topic—such as academics, anxiety and mental health, college life—it features a combination of stories, advice from professionals, and practical sidebars. Consider this your parenting lifeline: an easy-to-use manual that offers support and perspective. Grown and Flown is required reading for anyone looking to raise an adult with whom you have an enduring, profound connection.

Road Map for Revolutionaries Elisa Camahort Page, Carolyn Gerin, Jamia Wilson, 2018-09-18 A handbook for effective activism, advocacy, and social justice for people of all ages and backgrounds. Are you ready to take action and make your voice heard, but don't know how to go about it? This hands-on, hit-the-ground-running guide delivers lessons on practical tactics for navigating and protecting one's personal democracy in a gridlocked, heavily surveilled, and politically volatile country. If you want to start making a difference but don't know what to do next, Road Map for Revolutionaries provides the resources needed to help you feel safer, more empowered, invested in, and intrinsic to the American experiment. The book addresses timely topics such as staying safe at protests, supporting marginalized communities, online privacy, and how to keep up the fight for the long term, breaking down key issues and outlining action steps for local, state, and federal levels of government.

Autonomy and Independence Lili Liu, Christine Daum, Massimo Poesio, 2022-05-31 This book looks at how AgeTech can support the autonomy and independence of people as they grow older. The authors challenge readers to reflect on the concepts of autonomy and independence not as absolutes but as experiences situated within older adults' social connections and environments. Eleven personas of people around the world provide the context for readers to consider the influence of culture and values on how we understand autonomy and independence and the potential role of technology-based supports. The global pandemic provides a backdrop for the unprecedentedly rapid adoption of AgeTech, such as information and communication technologies or mobile applications that benefit older adults. Each persona in the book demonstrates the opportunity for AgeTech to facilitate autonomy and independence in supporting one's identity, decision making, advance care planning, self care, health management, economic and social participation, enjoyment and self fulfillment and mobility in the community. The book features AgeTech from around the world to provide examples of commercially available products as well as research and development within the field. Despite the promise of AgeTech, the book highlights the "digital divide," where some older people experience inadequate access to technology due to their geographic location, socio-economic status, and age. This book is accessible and relevant to everyday readers. Older adults will recognize themselves or peers in the personas and may glean insight from the solutions. Care partners and service providers will identify with the challenges of the personas. AgeTech entrepreneurs, especially "seniorpreneurs," will appreciate that their endeavours represent a growing trend. Researchers will be reminded that the most important research questions are those that will enhance the quality of life of older adults and their sense of autonomy and independence, or relational autonomy and interdependence.

Intelligent Safety Hari Ravichandran, 2023-04-18 Turn the tables on cybercriminals. Keep your loved ones safe. We live much of our personal and professional lives online, but fraudsters and hackers have made the internet dangerous. Cyberattacks are the US's fastest growing crime: consumers lost more than \$6.9 billion to fraud in 2021, up more than 50% from 2020; financial losses from online theft surpassed losses from home theft; 1 in 10 people become identity theft victims annually, including more than 1 million children. So how do we keep our kids, parents, colleagues, and selves safe against organized cybercriminals with their increasingly advanced tools?

Intelligent Safety: How to Protect Your Connected Family from Big Cybercrime teaches how we can put our families' online safety on autopilot and regain our peace of mind. It provides families with the tools and knowledge they need to create a personalized, proactive defense against cybercriminals. From identifying the risks of your teen's secret online life to safeguarding your family finances to defending the vulnerabilities of your aging parents, *Intelligent Safety* is the last guide you'll need to beat cyber predators at their own game.

The Secret Life of Data Aram Sinnreich, Jesse Gilbert, 2024-04-30 How data surveillance, digital forensics, and generative AI pose new long-term threats and opportunities—and how we can use them to make better decisions in the face of technological uncertainty. In *The Secret Life of Data*, Aram Sinnreich and Jesse Gilbert explore the many unpredictable, and often surprising, ways in which data surveillance, AI, and the constant presence of algorithms impact our culture and society in the age of global networks. The authors build on this basic premise: no matter what form data takes, and what purpose we think it's being used for, data will always have a secret life. How this data will be used, by other people in other times and places, has profound implications for every aspect of our lives—from our intimate relationships to our professional lives to our political systems. With the secret uses of data in mind, Sinnreich and Gilbert interview dozens of experts to explore a broad range of scenarios and contexts—from the playful to the profound to the problematic. Unlike most books about data and society that focus on the short-term effects of our immense data usage, *The Secret Life of Data* focuses primarily on the long-term consequences of humanity's recent rush toward digitizing, storing, and analyzing every piece of data about ourselves and the world we live in. The authors advocate for “slow fixes” regarding our relationship to data, such as creating new laws and regulations, ethics and aesthetics, and models of production for our data-fied society. Cutting through the hype and hopelessness that so often inform discussions of data and society, *The Secret Life of Data* clearly and straightforwardly demonstrates how readers can play an active part in shaping how digital technology influences their lives and the world at large.

SOS! The Technology Guidebook for Parents of Tweens and Teens Sheryl Gould, 2023-05-09 *SOS! The Technology Guidebook for Parents of Tweens and Teens* is Sheryl Gould's guidebook for parents who seek to keep their children safe online—away from inappropriate content, strangers, and cyberbullying—by equipping them to have the important conversations. With over fifteen years of experience coaching parents and working with families, Sheryl Gould understands how overwhelming and stressful it can be to monitor a child's internet usage for their safety and mental wellbeing. She created the organization Moms of Tweens and Teens as a way to support parents as they implement effective parenting strategies and reconnect with their children. In *SOS! The Technology Guidebook for Parents of Tweens and Teens*, Gould's approach works through common conflicts about screen time as it leads parents away from nagging and arguing with their children and creates more opportunities for “face-to-face time.” In this guidebook, parents will find: Answers to common parenting questions, challenges, and frustrations Steps to personalize limitations and rules to a child's needs and development Practical advice for navigating tough conversations Strategies for getting a child to “buy-in” to screen time limits Programs to manage time children spend on devices and content they can access (apps, YouTube channels, websites, etc.) Suggestions for balance and quality time as a family Restore sanity, get on the same page and rebuild relationship with YOUR tween or teen with *SOS! The Technology Guidebook for Parents of Tweens and Teens!*

In Case of Emergency Elizabeth Ellcessor, 2022-04-19 A much-needed look at the growth of emergency media and its impact on our lives In an emergency, we often look to media: to contact authorities, to get help, to monitor evolving situations, or to reach out to our loved ones. Sometimes we aren't even aware of an emergency until we are notified by one of the countless alerts, alarms, notifications, sirens, text messages, or phone calls that permeate everyday life. Yet most people have only a partial understanding of how such systems make sense of and act upon an “emergency.” In *In Case of Emergency* argues that emergency media are profoundly cultural artifacts that shape the very definition of “emergency” as an opposite of “normal.” Looking broadly across a range of contemporary emergency-related devices, practices, and services, Elizabeth Ellcessor illuminates the cultural and political underpinnings and socially differential effects of emergency media. By interweaving in-depth interviews with emergency-operation and app-development experts, archival materials, and discursive and technological readings of hardware and infrastructures, Ellcessor demonstrates that emergency media are powerful components of American life that are rarely, if ever, neutral. The normalization of ideologies produced and reinforced by emergency media result in unequal access to emergency services and discriminatory assumptions about who or what is a threat and who deserves care and protection. As emergency media undergo massive growth and transformation in response to digitization and attendant entrepreneurial cultures, Ellcessor asks where access, equity, and accountability fit in all of this. The first book to develop a typology of emergency media, *In Case of Emergency* opens a much-needed conversation around the larger cultural meanings of “emergency,” and what an ethical and care-based approach to emergency could entail.

Handbook of Technology Application in Tourism in Asia Azizul Hassan,2022-07-09 It is an undisputed reality that the tourism industry in Asia is getting exposed to more innovative technologies than ever before. This proposed book provides the latest research in the application of innovative technology to the tourism industry, covering the perspectives, innovativeness, theories, issues, complexities, opportunities and challenges. This book, a blend of comprehensive and extensive effort by the contributors and editors, is designed to cover the application and practice of technology in tourism, including the relevant niches. This book focuses on the importance of technology in tourism. This also highlights, in a comprehensive manner, specific technologies that are impacting the tourism industry in Asia, as well as the constraints the industry is facing. The contents of this book deal with distinct topics, such as mobile computing, new product designs, innovative technology usages in tourism promotion, technology-driven sustainable tourism development, location-based apps, mobility, accessibility and so on. A good number of research studies have conducted outlining the contributions and importance of technologies in tourism, in general. However, the tourism industry of Asia so far has attracted very few researchers. Some contributions have been made but not sufficient. Considering the ongoing trend of technology application in the tourism industry in Asia, very few research attempts have been made aiming to explore diverse aspects. Tourism is expanding enormously across the world. which actually creates more demands for effective technologies. This book will be a reading companion, especially for tourism students in higher academic institutions. This book will also be read by the relevant policy planners and industry professionals. Apart from them, this book will be appreciated by expatriate researchers and researchers having keen interest in the Asian tourism industry.

David Thompson, Skywalker David Thompson,2003-01 This is the inspiring story of basketball legend David Thompson, chronicling his rise, fall and incredible recovery from cocaine and alcohol abuse. In college, he led the 1973-74 North Carolina State Wolfpack to its first NCAA title, and a year later, he was the No. 1 draft pick in both the NBA and ABA. When the two leagues merged, Thompson signed the largest contract in NBA history in 1978. But Thompson disappeared just as rapidly as he had arrived. In 1996, Thompson was elected to the NBA Hall of Fame and has been named numerous times as one of the five greatest college players of all-time.

Extreme Weather Events Jeanne Marie Ford,2018-07-15 Scientists have linked climate change to a worldwide increase in extreme weather events such as hurricanes, floods, droughts, and blizzards. Readers will learn about the various causes of these natural disasters and their costs to society, the economy, and the environment. This book explores preventive measures used throughout history, and looks at technological solutions being developed by meteorologists, engineers, and city planners to lessen future damage. Readers will also take a peek at the future predicted by climate scientists if their warnings are ignored and recommended measures are not taken.
