The Last Lecture Randy Pausch, 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Unlocking Leadership Mindtraps Jennifer Garvey Berger, 2019-01-29 Author and consultant Jennifer Garvey Berger has worked with all types of leaders—from top executives at Google to nonprofit directors who are trying to make a dent in social change. She hears a version of the same plea from every client in nearly every sector around the world: I know that complexity and uncertainty are testing my instincts, but I don't know which to trust. Is there some way to know what to do when I can't know what's next? Her newest work is an answer to this plea. Using her background in adult development, complexity theories, and leadership consultancy, Garvey Berger discerns five pernicious and pervasive mind traps to frame the book. These are: the desire for simple stories, our sense that we are right, our desire to get along with others in our group, our fixation with control, and our constant quest to protect and defend our egos. In addition to understanding why these natural impulses steer us wrong in a fast-moving world, leaders will get powerful questions and approaches that help them escape these patterns.

Describing Nature Through Visual Data Ursyn, Anna, 2020-07-03 People have described nature since the beginning of human history. They do it for various purposes, including to communicate about economic, social, governmental, meteorological, sustainability-related, strategic, military, and survival issues as well as artistic expression. As a part of the whole world of living beings, we use various types of senses, known and unknown, labeled and not identified, to both communicate and create. *Describing Nature Through Visual Data* is a collection of impactful research that discusses issues related to the visualization of scientific concepts, picturing processes, and products, as well as the role of computing in advancing visual literacy skills. Organized into four sections, the book contains descriptions, theories, and examples of visual and music-based solutions concerning the selected natural or technological events that are shaping present-day reality. The chapters pertain to selected scientific fields, digital art, computer graphics, and new media and confer the possible ways that visuals, visualization,

simulation, and interactive knowledge presentation can help us to understand and share the content of scientific thought, research, artistic works, and practice. Featuring coverage on topics that include mathematical thinking, music theory, and visual communication, this reference is ideal for instructors, professionals, researchers, and students keen on comprehending and enhancing the role of knowledge visualization in computing, sciences, design, media communication, film, advertising, and marketing.

Dungeon Crawler Carl Matt Dinniman, 2020-09-21 The apocalypse will be televised! A man. His ex-girlfriend's cat. A sadistic game show unlike anything in the universe: a dungeon crawl where survival depends on killing your prey in the most entertaining way possible. In a flash, every human-erected construction on Earth--from Buckingham Palace to the tiniest of sheds--collapses in a heap, sinking into the ground. The buildings and all the people inside have all been atomized and transformed into the dungeon: an 18-level labyrinth filled with traps, monsters, and loot. A dungeon so enormous, it circles the entire globe. Only a few dare venture inside. But once you're in, you can't get out. And what's worse, each level has a time limit. You have but days to find a staircase to the next level down, or it's game over. In this game, it's not about your strength or your dexterity. It's about your followers, your views. Your clout. It's about building an audience and killing those goblins with style. You can't just survive here. You gotta survive big. You gotta fight with vigor, with excitement. You gotta make them stand up and cheer. And if you do have that it factor, you may just find yourself with a following. That's the only way to truly survive in this game--with the help of the loot boxes dropped upon you by the generous benefactors watching from across the galaxy. They call it Dungeon Crawler World. But for Carl, it's anything but a game.

Me.. My Head & I Kylie Ellement, 2023-05-04 THERE IS NOTHING WRONG WITH YOU..YOU ARE DIVINE PERFECTION From birth we are conditioned to hate & criticize ourselves, becoming completely lost in a society that tells us we are not enough & need to be perfect to be accepted or fit in, then ourselves judge others for not being perfect! This is why rejection hurts so much, we have been rejecting ourselves our entire lives with the way we seek love, approval & validation being through other people & external things, which are unreliable sources because people only reflect back to us, what we truly think about ourselves. This can only be healed from within, so learning to love ourselves regardless with a solid inner foundation of trust, establishing emotional stability & unconditional self-acceptance knowing we are always OK exactly as we are, is what you will learn & discover within this book. You are the only one that teaches people how to treat you & when you love yourself, setting healthy boundaries is easy because you honour your worth & know what you deserve. Our birthright natural state of being is, All is well but with non-stop brain washing, we can become enslaved to a system that tells us we don't matter, suffering in an illusion of lack, fear & separation from ourselves & others, that creates chaos & dis-ease within our physical body or human meatsuit, locking your brain in survival mode & overthinking. With the truth of who we really are & where we came from being hidden, that reveals we matter way more than you could ever imagine. We are an angelic superhuman race that are destined to be the guardians of the multiverse with limitless co-creating abilities to manifest our own realities through words, thoughts, emotions & energy, manipulating matter with our vibrational frequencies as beings of light but first we need to master our

minds. It is my sincerest hope that what I've learnt through my own journey is a beacon of guiding light to you, from self-hate to ultimate self-love, with your top priority always being, to become your own best friend! With a heart full of gratitude & blessings to you, Love Kylie

Imagining Black America Michael Wayne, 2014-02-28 DIVScientific research has now established that race should be understood as a social construct, not a true biological division of humanity. In *Imagining Black America*, Michael Wayne explores the construction and reconstruction of black America from the

arrival of the first Africans in Jamestown in 1619 to Barack Obama's reelection. Races have to be imagined into existence and constantly reimagined as circumstances change, Wayne argues, and as a consequence the boundaries of black America have historically been contested terrain. He discusses the emergence in the nineteenth century—and the erosion, during the past two decades—of the notorious “one-drop rule.” He shows how significant periods of social transformation—emancipation, the Great Migration, the rise of the urban ghetto, and the Civil Rights Movement—raised major questions for black Americans about the defining characteristics of their racial community. And he explores how factors such as class, age, and gender have influenced perceptions of what it means to be black. Wayne also considers how slavery and its legacy have defined freedom in the United States. Black Americans, he argues, because of their deep commitment to the promise of freedom and the ideals articulated by the Founding Fathers, became and remain quintessential Americans—the “incarnation of America,” in the words of the civil rights leader A. Philip Randolph./div
