Run, Lift, Carry, Climb Riley Nadoroznick,2017-02-24 Become a faster, more confident obstacle course racer!In 2016, over 70% of all our athletes qualified for the OCR World Championships, while 80% of our Elite Spartan Racers competed in the Spartan Race World Championships. Two of our Competitive Division Spartan Race athletes finished ranked 3rd and 10th overall in all of Canada.This book contains the exact workouts that helped us get there.Most of the athletes I coach are very busy people. They have families, pets, and stressful professional lives. They sit on volunteer boards and take time to give back to their community.There's always something going on in our lives, so we need to make sure our workouts are as efficient as possible. We don't have hours per day to spend out on the trails like most pros.If you have unlimited time for training and choose to spend most your life doing so, then this probably isn't the book for you. But if you, like us, live busy lives outside of obstacle course racing, I believe the fun and efficient workouts in this book can help you.Through our training - through the exact workouts described in this book - my teammates and I have achieved more than we ever thought possible.We've transformed ourselves from half-decent Open category athletes into top-10 finishing Spartan Race Elites.You probably won't win the World Championships simply following the workouts in this book. But I believe these workouts will help you fall in love with your training, and become a faster, more confident obstacle course racer in the process.We proved that it's possible to go far in OCR without devoting your entire life to training.Now it's your turn.

Urban Marathons Jonas Larsen, 2021-10-20 This original social science text approaches marathon running as an everyday practice and a designed event, to draw upon and contribute to the literature on practice theory, urban events, rhythm analysis and mobility. It bridges sport studies and discussions within sociology and geography about practice, movement and the city. Inspired by theoretical debates about embodied and multi-sensuous mobilities, social and material practices, and urban rhythms, this book explores the characteristics of marathon running as a bodily practice on the one hand and, on the other, marathon training grounds and events as unique places. This account takes marathon running seriously, using sociological and geographical theory to understand the practice in and of itself. Based on original empirical research and accessible to readers, taking them to training sessions in Copenhagen and to marathons in Tokyo, Kyoto, Berlin, Frankfurt, Valencia and Copenhagen, it draws out the globalised, codified and generic nature of marathon practices and design, yet also brings out the significant local differences. The book examines in ethnographic detail how marathon practices and places are produced by various materialities, cultural scripts, experts, runners and spectators, and practiced in embodied, multi-sensuous and 'emplaced' ways by ordinary runners. It develops a sociological practice approach to marathon running and geographical understanding of marathon places and rhythms. It demonstrates that marathon running is of broad interest because it calls for and allows lively and expressive ways of conducting and writing research and understanding the becoming of bodies, the intertwining of biological and mechanical rhythms, and the eventful potential of streets. It will appeal to postgraduate students and scholars in sport studies, geography and sociology interested in running, active mobility and ethnography, as well as tourism and urban events. The book will also appeal to general readers with an interest in marathon running.

Alien Racer J.S. Morin, 2015-05-01 The need for speed meets the need for greed. Ex-starfighter pilot Carl Ramsey, now captain of the Mobius, can't watch race pilots without scoffing that they've never faced hostile fire. When the ship's mechanic and warp drive wizard can't take it anymore, they goad Carl into entering a racing contest to prove it. Carl packs his bags, and his ego, and enters the Silde Slims Cadet Racer Challenge. With 250,000 terras prize money, it would be the biggest score yet for the crew of the Mobius. Of course, Carl's not satisfied just racing to win. He hatches a plot for an even bigger score, dragging in an eliminated racer, an old squadron mate, and an unwitting corporate

accomplice. With so many moving parts and Carl's seat-of-the-pants planning, what could possibly go...right? Can the Mobius crew keep it together long enough to finally put together a big payday? Or will their plan, and Carl's ship, crash and burn? Alien Racer is the fifth mission of Black Ocean, a science fantasy series set in the 26th century. Do you wish there had been a second season of Firefly? Do you love the irreverent fun of Guardians of the Galaxy? Have you ever wondered how Star Wars would have turned out if Luke and Obi-wan had ditched the rebellion to become smugglers with Han and Chewie? Then Black Ocean is the series for you! Pick up your copy of Alien Racer, crank up the engines, and race for the cash!
