Beginning with location selection, Pedi shows you how to find backgrounds that suit the family’s character, whether the image is planned for outdoors, in the studio, or at the client’s home. Then, he shows how to pose the family (including the extended family, in many cases) to flatter each subject and show the relationships between the individuals. The final addition to the mix is lighting—a real challenge when larger groups are involved. Pedi demonstrates how you can handle this deftly with sunlight, interior lights, or studio lights, as well as in mixed-light situations. Packed with timeless images and practical approaches, this book is a handy reference for photographers who want to create images that will stand the test of time.

Studio Lighting Unplugged Rod Deutschmann,Robin Deutschmann,2014-12-26 This lighting manual shows that successful studio photography does not require a warehouse-sized space brimming with expensive lights, Hollywood-style facades, and a half-dozen assistants making the client lattes. Rather, this guide shows photographers how to create studio lighting effects that range from clean and classic to highly complex and use a garage, spare bedroom, or even a backyard as their “studio.” The simple setups show that one to three small, inexpensive electronic flash units—along with budget-friendly stands, communication systems, and some do-it-yourself light modifiers—can be combined to create brilliant studio-quality images without the studio. Numerous sample shoots and plans provide clear instructions for taking control of any environment to create spectacular images.

Lighting for Studio Photography DECODED John Fick,Ronald Fick,2012

Shaping Light Glenn Rand,Tim Meyer,2014-05-13 Whether shooting portraits or products, skillful lighting can be the difference between a bland snapshot and a stunning, well-defined image. Capturing the ideal photograph requires many technical factors to work in tandem, the most fundamental of which is lighting. While we may take it for granted that light is required to create a photograph, light by itself usually does not produce the style, energy, emotion or feeling that makes a photograph exceptional. It is the way the light has been modified and shaped that gives the photographer the ability to create an image that communicates their feeling about the subject. It’s necessary to understand how light works in order to know how to modify it in the most desirous way. Beginning with simplified light concepts, Rand delves into the basics of light. Light’s natural tendency is to go off in all directions. To give a better understanding of how to control the light that you use in your photographs, Rand guides the reader through a series of discussions defining the light itself, the surfaces that will interact with the light in the photographs, the look of light that we wish to create and the tools, modifiers and shapers that are commonly available for use. Whether you want to add contrast with highlights and shadows or use the softness of diffuse light to add volume to the subject, the fundamentals of these concepts are covered here. Images, diagrams and descriptions are used to illustrate the manners in which light can be modified. From there, the book moves onto the main tools of light modification. Rand discusses the primary functions of each tool and defines the issues of the light’s characteristics after the modification. Techniques are presented for using reflectors, spotlights, softboxes, diffusers, umbrellas, barndoors, gels, scrims, shoots and more. Each chapter is highly illustrated with images of the tools being discussed, diagrams, and examples for the use of these tools in both commercial and portrait photography. Variations in control and problems that may occur with specific modifiers are discussed as well. The goal of this book is to show the effect of modifiers and shapers on the quality of light rather than to discuss the merits of a particular light source. By focusing on the methods to shape light, the photographer is open to improvise in scenarios where they may not have control over the light source. Whether you shoot commercial or portrait photography, this book provides you with the basis for not only successfully, but elegantly shaping light to create your desired result.

Lighting Design for Commercial Portrait Photography Jennifer Emery,2015-06-09 Effective commercial portraiture is heavily reliant on clean, crisp lighting looks that emphasize color, contrast, contours, and texture to allow viewers of magazines, newspapers, television, and movies to view a product or model/celebrity in a precise and predetermined way that suits the overall marketing campaign and leaves viewers with a specific, conscripted feeling

about the product /person being shown. Crafting this type of polished lighting requires absolute proficiency with the tools of the trade, from flash, to beauty lights, to softboxes, to gobos and gels. It also requires thinking outside the box to create lighting with a “hook”—a certain quality that binds the look to the brand identity and can be carried out repeatedly across several advertising campaigns. Whether you are producing album cover art, lingerie shoots for an intimates catalog, or production stills for television shows or movies, Jennifer Emery will give you the technical and creative skill set you need to thrive artistically, work efficiently with models and set designers, and win repeat clients. Beginning with essential strategies for finding and casting talent, paying/trading with that talent, and creating an open dialogue throughout the directorial stages, Jennifer builds a solid foundation from which the artistic concept can spring forth. In the following chapters, she presents text and images that will instruct readers on creating numerous looks/projects, including: (1) Beauty lighting for beauty/cosmetics ads (2) High-Key Lighting for a magazine cover shoot, (3) Lighting groups for a movie/TV poster, (4) Sculpting light for boudoir/lingerie/swimsuit/nude photograph, (5) Working with speedlights/flash for editorial fashion and lifestyle shoots, and (6) Lighting exterior locations for high fashion and fashion editorial work. Armed with these skills, photographers will be able to approach any commercial lighting job with a repertoire of skills, an ability to overcome challenges, and the confidence needed to nail the shot every time.
