Arbitrary Lines M. Nolan Gray, 2022-06-21 It's time for America to move beyond zoning, argues city planner M. Nolan Gray in Arbitrary Lines: How Zoning Broke the American City and How to Fix It. With lively explanations, Gray shows why zoning abolition is a necessary--if not sufficient--condition for building more affordable, vibrant, equitable, and sustainable cities. Gray lays the groundwork for this ambitious cause by clearing up common misconceptions about how American cities regulate growth and examining four contemporary critiques of zoning (its role in increasing housing costs, restricting growth in our most productive cities, institutionalizing racial and economic segregation, and mandating sprawl). He sets out some of the efforts currently underway to reform zoning and charts how land-use regulation might work in the post-zoning American city. Arbitrary Lines is an invitation to rethink the rules that will continue to shape American life--where we may live or work, who we may encounter, how we may travel. If the task seems daunting, the good news is that we have nowhere to go but up

Lines Anna Doe, 2018-11 Senior year. Three girls. Three guys. Hockey and rivalry. Mean girls and friendships. Old loves and new chances. One more year of being invisible. One more year to win it all. The countdown begins. Senior year can't come or end fast enough for Amelia Campbell. For the shy, nerdy girl-next-door that she is, high school is torture and all she wants is for it to be over. Having her heart broken by a popular, womanizing boy all those years ago doesn't help the matters. Nor does his best friend who still has a habit of mercilessly teasing her. Now, she only has one year left, one year to be invisible before she can move on with her life. Derek King doesn't do drama, but his life is all about drama once Maximillian

Sanders steps foot into his town, his school, and into Amelia's life. Max is always around, and he is making her smile again. But the boy who once broke her heart isn't ready to let her go. Older and wiser, Derek isn't about to let someone take away what he wants, and he wants Amelia. She's set on not believing in him and on not getting her heart broken once again. He is set on showing her wrong. She says she hates him, but maybe the line between past and present, love and hate is thinner than she ever realized.

Lines Tim Ingold, 2016-04-14 What do walking, weaving, observing, storytelling, singing, drawing and writing have in common? The answer is that they all proceed along lines. In this extraordinary book Tim Ingold imagines a world in which everyone and everything consists of interwoven or interconnected lines and lays the foundations for a completely new discipline: the anthropological archaeology of the line. Ingold's argument leads us through the music of Ancient Greece and contemporary Japan, Siberian labyrinths and Roman roads, Chinese calligraphy and the printed alphabet, weaving a path between antiquity and the present. Drawing on a multitude of disciplines including archaeology, classical studies, art history, linguistics, psychology, musicology, philosophy and many others, and including more than seventy illustrations, this book takes us on an exhilarating intellectual journey that will change the way we look at the world and how we go about in it. This Routledge Classics edition includes a new preface by the author.

Lines Suzy Lee, 2017-09-05 It starts with a line. Whether made by the tip of a pencil or the blade of a skate, the magic starts there. And magic once again flows from the pencil and imagination of internationally acclaimed artist Suzy Lee. With the lightest of touches, this

masterwork blurs the lines between real and imagined, reminding us why Lee's books have been lauded around the world, recognized on New York Times Best Illustrated Books lists and nominated for the Hans Christian Andersen Award, the highest international honor given to children's book creators. This seemingly simple story about a young skater on a frozen pond will charm the youngest of readers while simultaneously astounding book enthusiasts of any age. Plus, this is the fixed format version, which looks almost identical to the print edition.

Squiggly Lines Mark Lattanzi, 2017 Want to learn how to hike in the woods and not get lost? Or perhaps you want to compete in a local orienteering event? Maybe you aspire to do the 10-day Eco-Challenge race? *Squiggly Lines* is a full-color book about map and compass navigation with a focus on adventure racing. The book is almost 300 pages and has over 150 example maps and figures and almost 100 navigation exercises. You will learn: to read and understand topo(graphic) and other maps to use a compass to locate yourself in the wild to take and follow a compass bearing to a particular destination Plus, *Squiggly Lines* has some great adventure race stories from around the globe by its author. Reading *Squiggly Lines* may not prevent you from getting lost, but it will certainly help you find yourself!

Lines Sarvinder Naberhaus, 2017-08-22 Shows how simple lines can be used to make squares and circles and such complex forms as buildings, towns, and planets.

Crossing Lines Paul Volponi, 2011-06-09 Adonis is a jock. He's on the football team and he's dating one of the prettiest girls in school. Alan is the new kid. He wears lipstick and joins the Fashion Club. Soon enough the football team is out to get him. Adonis is glad to go along with his teammates . . . until they come up with a

dangerous plan to humiliate Alan. Now Adonis must decide whether he wants to be a guy who follows the herd or a man who does what's right. From critically acclaimed author Paul Volponi comes this discussable and finely wrought story of bullies, victims, and the bystanders caught in between.

The Life of Lines Tim Ingold, 2015-03-27 To live, every being must put out a line, and in life these lines tangle with one another. This book is a study of the life of lines. Following on from Tim Ingold's groundbreaking work *Lines: A Brief History*, it offers a wholly original series of meditations on life, ground, weather, walking, imagination and what it means to be human. In the first part, Ingold argues that a world of life is woven from knots, and not built from blocks as commonly thought. He shows how the principle of knotting underwrites both the way things join with one another, in walls, buildings and bodies, and the composition of the ground and the knowledge we find there. In the second part, Ingold argues that to study living lines, we must also study the weather. To complement a linealogy that asks what is common to walking, weaving, observing, singing, storytelling and writing, he develops a meteorology that seeks the common denominator of breath, time, mood, sound, memory, colour and the sky. This denominator is the atmosphere. In the third part, Ingold carries the line into the domain of human life. He shows that for life to continue, the things we do must be framed within the lives we undergo. In continually answering to one another, these lives enact a principle of correspondence that is fundamentally social. This compelling volume brings our thinking about the material world refreshingly back to life. While anchored in anthropology, the book ranges widely over an interdisciplinary terrain that includes philosophy,

geography, sociology, art and architecture.

The Game of Lines Hervé Tullet, 2015-02-23 A brightly colored graphic game that introduces little ones to the wonderful world of lines. There are dozens of combinations to be made in this mix and match book.

The Lines Between the Lines Bess Rowen, 2021-10-18 How stage directions convey not what a given moment looks like--but how it feels

Sight Lines Arthur Sze, 2019-06-18 Winner of the 2019 National Book Award "The sight lines in Sze's 10th collection are just that—imagistic lines strung together by jump-cuts, creating a filmic collage that itself seems to be a portrait of simultaneity." —The New York Times From the current phenomenon of drawing calligraphy with water in public parks in China to Thomas Jefferson laying out dinosaur bones on the White House floor, from the last sighting of the axolotl to a man who stops building plutonium triggers, *Sight Lines* moves through space and time and brings the disparate and divergent into stunning and meaningful focus. In this new work, Arthur Sze employs a wide range of voices—from lichen on a ceiling to a man behind on his rent—and his mythic imagination continually evokes how humans are endangering the planet; yet, balancing rigor with passion, he seizes the significant and luminous and transforms these moments into riveting and enduring poetry. "These new poems are stronger yet and by confronting time head on, may best stand its tests." —Lit Hub "The wonders and realities of the world as seen through travel, nature walks, and daily routine bring life to the poems in *Sight Lines*." —Library Journal

High Static, Dead Lines Kristen Gallerneaux, 2021-02-24 A literary mix tape that explores the entwined boundaries between sound, material culture,

landscape and esoteric belief. Trees rigged up to the wireless radio heavens. A fax machine used to decode the language of hurricanes. A broadcast ghost that hijacked a television station to terrorize a city. A failed computer factory in the desert with a slap-back echo resounding into ruin. In *High Static, Dead Lines*, media historian and artist Kristen Gallerneaux weaves a literary mix tape that explores the entwined boundaries between sound, material culture, landscape, and esoteric belief. Essays and fictocritical interludes are arranged to evoke a network of ley lines for the “sonic spectre” to travel through—a hypothetical presence that manifests itself as an invisible layer of noise alongside the conventional histories of technological artifacts. The objects and stories within span from the mid-nineteenth century to the present day, touching upon military, communications, and cultural history. A connective thread is the recurring presence of sound—audible, self-generative, and remembered—charting the contentious sonic histories of paranormal culture.

The Line Paula Bossio, 2013-09 A story without words in which a little girl has fun with a line drawn by a pencil.

The Power of Line Marzia Faietti, Gerhard Wolf, 2015 There are no lines in nature; lines are always the expression of human actions, perception and design. Lines divide or connect; they are sometimes static and sometimes gestural and full of movement; they represent and create forms in space and time. The essays in this volume elucidate the semantic and conceptual depth of the line in European, Asian and Islamic cultures and reveal the continuity and transformation of the line over the course of centuries as a constitutive element in architecture, art and writing and as a medium of expression in choreography and scientific and technological fields--Publisher's website.

Laugh Lines Alan Zweibel,2020-04-14 With his tender, funny memoir of four decades in the business, one of the first writers for Saturday Night Live traces the history of American comedy. Alan Zweibel started his comedy career selling jokes for seven dollars apiece to the last of the Borscht Belt standups. Then one night, despite bombing on stage, he caught the attention of Lorne Michaels and became one of the first writers at Saturday Night Live, where he penned classic material for Gilda Radner, John Belushi, and all of the original Not Ready For Prime Time Players. From SNL, he went on to have a hand in a series of landmark shows—from It's Garry Shandling's Show to Curb Your Enthusiasm. Throughout the pages of Laugh Lines Zweibel weaves together his own stories and interviews with his friends and contemporaries, including Richard Lewis, Eric Idle, Bob Saget, Mike Birbiglia, Sarah Silverman, Judd Apatow, Dave Barry, Carl Reiner, and more. The book also features a charming foreword from his friend of forty-five years Billy Crystal, with whom he co-wrote and co-produced the upcoming film Here Today that stars Crystal and Tiffany Haddish. Laugh Lines is a warmhearted cultural memoir of American comedy. "In Laugh Lines, Zweibel looks back, affectionately and informatively, at a career that began when he was a young deli worker grinding out jokes for old-school borscht belt comedians in his spare time, and that, after his "S.N.L." years, included rewarding collaborations with, among others, Garry Shandling, Billy Crystal, Martin Short, Larry David and Dave Barry. . . . Fascinating." —New York Times "Any comedy fan will thrill to see the contemporary art's invention through the eyes of consummate funny man Alan Zweibel. He takes you behind the velvet rope and makes you weep for all those artists who made us laugh.

Screamingly funny—also very moving. A classic.” —Mary Karr “Alan Zweibel is legendary among us comedians. He is the man who delivers comedy with an emotional clout that makes him respected and revered.” —Steve Martin

Contesting County Lines James Densley, Robert McLean, Carlton Brick, 2023-01-17 Combining a compulsive read with rigorous academic analysis, this book tells the real-life stories of drug dealers involved in county lines networks, including their methods, motives and misfortunes. Conventional wisdom surrounding county lines often portrays drugs runners as exploited victims and gang proliferation as a market-driven exercise, and suggests a business model facilitated exclusively by smart phone technology and routinely regulated by violence. Aimed at students, scholars, practitioners and policymakers, this myth-busting, accessible book offers a novel way of thinking about county lines in relation to gangs and serious organised crime and presents new ideas for drug crime prevention, intervention and enforcement.

Software Product Lines Patrick Donohoe, 2012-12-06 Software product lines are emerging as a critical new paradigm for software development. Product lines are enabling organizations to achieve impressive time-to-market gains and cost reductions. With the increasing number of product lines and product-line researchers and practitioners, the time is right for a comprehensive examination of the issues surrounding the software product line approach. The Software Engineering Institute at Carnegie Mellon University is proud to sponsor the first conference on this important subject. This book comprises the proceedings of the First Software Product Line Conference (SPLC1), held August 28-31, 2000, in Denver,

Colorado, USA. The twenty-seven papers of the conference technical program present research results and experience reports that cover all aspects of software product lines. Topics include business issues, enabling technologies, organizational issues, and life-cycle issues. Emphasis is placed on experiences in the development and fielding of product lines of complex systems, especially those that expose problems in the design, development, or evolution of software product lines. The book will be essential reading for researchers and practitioners alike.
