The Meaning of Icons Léonide Ouspensky,Vladimir Lossky,1982 The nature of the icon cannot be grasped by means of pure art criticism, nor by the adoption of a sentimental point of view. Its forms are based on the wisdom contained in the theological and liturgical writings of the Eastern Orthodox Church and are intimately bound up with the experience of the contemplative life. The present work is the first of its kind to give a reliable introduction to the spiritual background of this art. The introduction into the meaning and language of the icons by Ouspensky imparts to us in an admirable way the spiritual conceptions of the Eastern Orthodox Church which are often so foreign to us, but without the knowledge of which we cannot possibly understand the world of the icon. -- Back cover.

Icons Nikodim Pavlovich Kondakov,2023-12-28 Icon painting has reached its zenith in Ukraine between the 11th and 18th centuries. This art is appealing because of its great openness to other influences – the obedience to the rules of Orthodox Christianity in its early stages, the borrowing from Roman heritage or later to the Western breakthroughs – combined with a never compromised assertion of a distinctly Slavic soul and identity. This book presents a handpicked and representative selection of works from the 11th century to the late Baroque period.

The Role of Communication in Learning To Model Paul Brna, Michael Baker, Keith Stenning, Andree Tiberghien, 2014-05-12 In this book, a number of experts from various disciplines take a look at three different strands in learning to model. They examine the activity of modeling from disparate theoretical standpoints, taking into account the individual situation of the individuals involved. The chapters seek to bridge the modeling of communication and the modeling of particular scientific domains. In so doing, they seek to throw light on the educational communication that goes on in conceptual learning. Taken together, the chapters brought together in this volume illustrate the diversity and vivacity of research on a relatively neglected, yet crucially important aspect of education across disciplines: learning to model. A common thread across the research presented is the view that communication and interaction, as fundamental to most educational practices and as a repository of conceptual understanding and a learning mechanism in itself, is intimately linked to elaborating meaningful, coherent, and valid representations of the world. The editors hope this volume will contribute to both the fundamental research in its field and ultimately provide results that can be of practical value in designing new situations for teaching and learning modeling, particularly those involving computers.

Tribal Science and Technology Dr. Chittaranjan Mishra, Science is in human mind since the very existence of human being. Its knowledge grows with the growth of the human wants, as human wants are unlimited, so as the inventions of science. It justifies the saying that "necessity is the mother of invention". It is also true that all the sects, communities and tribes of this world are leading their lives somehow scientifically. The sects or

communities, whose necessities and expectations are more, their scientific knowledge is more and whose necessity is limited, their scientific knowledge is also limited. Tribes are the indigenous people and they have some indigenous knowledge of science and technology in their daily life. Presence of science is not only noticed in the modern Laboratories and modern industries but also in our daily lives. To know something is 'Gyan' (knowledge) and to achieve something is 'Vigyan' (Science). For example: to know the presence of ghee in the milk is Gyan, to know the process (technique) how to prepare ghee from milk is Vigyan/Vidya (science/scientific knowledge) and application of this process (scientific knowledge) to the practical aims of ghee preparation is technology. This book contains some aspects of tribal science and technological knowledge.

Visual Languages and Applications Tadeo Ichikawa, Erland Jungert, Robert R. Korfhage, 2013-11-11 The interface between the user of a computer-based information system and the system itself has been evolving at a rapid rate. The use of a video screen, with its color and graphics capabilities, has been one factor in this evolution. The development of light pens, mice, and other screen image manipulation devices has been another. With these capabilities has come a natural desire to find more effective ways to make use of them. In particular, much work has gone into the development of interface systems that add visual elements such as icons and graphics to text. The desire to use these visual elements effectively in communication between the user and the system has resulted in a healthy competition of ideas and discussion of the principles governing the development and use of such elements. The present volume chronicles some of the more significant ideas that have recently been presented. The first volume in this series on the subject [Visual Languages (Chang, Ichikawa, and Ligomenides, eds.), Plenum, 1986] covered work done in the early days of the field of visual languages. Here we represent ideas that have grown out of that early work, arranged in six sections: Theory, Design Systems, Visual Programming, Algorithm Animation, Simulation Animation, and Applications. I THEORY Fundamental to the concept of visual languages is the conviction that diagrams and other visual representations can aid understanding and communication of ideas. We begin this volume with a chapter by Fanya S.

Two Thousand Years of Coptic Christianity Otto F. A. Meinardus, 2002-10-01 Christianity arrived early in Egypt, brought according to tradition by Saint Mark the Evangelist, who became the first patriarch of Alexandria. The Coptic Orthodox Church has flourished ever since, with millions of adherents both in Egypt and in Coptic communities around the world. Since its split from the Byzantine Church in 451, the Coptic Church has proudly maintained its early traditions, and influence from outside has been minimal: the liturgy is still sung to unique rhythms in Coptic, a late stage of the same ancient Egyptian language that is inscribed in hieroglyphs on temple walls and papyri. Dr. Otto Meinardus, a leading authority on the history of the Coptic Church, here revises, updates, and combines his renowned studies *Christian Egypt, Ancient and Modern* (The American University in Cairo Press, 1965, 1977) and *Christian Egypt, Faith and Life* (The American University in Cairo Press, 1970) into a new, definitive, one-volume history for the Millennium, surveying the twenty centuries of existence of one of the oldest churches in the world.
