Inventions in Music Lisa Hiton,2016-12-15 Music's roots begin at the dawn of humanity, when the earliest humans used rudimentary sounds to communicate for survival. *Inventions in Music: From the Monochord to MP3s* traces the evolution of music through technologies that shaped the medium: the monochord, the phonograph, magnetic tape, and MP3 files. The book describes these inventions in chronological order, considers their influence on one another, and examines these innovations' impact beyond music.

Believing in Bits Simone Natale,Diana Pasulka,2019-09-02 *Believing in Bits* advances the idea that religious beliefs and practices have become inextricably linked to the functioning of digital media. How did we come to associate things such as mindreading and spirit communications with the functioning of digital technologies? How does the internet's capacity to facilitate the proliferation of beliefs blur the boundaries between what is considered fiction and fact? Addressing these and similar questions, the volume challenges and redefines established understandings of digital media and culture by employing the notions of belief, religion, and the supernatural.

Together We Will Go J. Michael Straczynski,2022-02-22 *The Breakfast Club* meets *The Silver Linings Playbook* in this powerful, provocative, and heartfelt novel about twelve strangers who come together to make the most of their final days, from New York Times bestselling and award-winning author J. Michael Straczynski. Mark Antonelli, a failed young writer looking down the barrel at thirty, is planning a cross-country road trip. He buys a beat-up old tour bus. He hires a young army vet to drive it. He puts out an ad for others to join him along the way. But this will be a road trip like no other: His passengers are all fellow disheartened souls who have decided that this will be their final journey—upon arrival in San Francisco, they will find a cliff with an amazing view of the ocean at sunset, hit the gas, and drive out of this world. The unlikely companions include a young woman with a chronic pain sensory disorder and another who was relentlessly bullied at school for her size; a bipolar, party-loving neo-hippie; a gentle coder with a literal hole in his heart and blue skin; and a poet dreaming of a better world beyond this one. We get to know them through access to their texts, emails, voicemails, and the daily journal entries they write as the price of admission for this trip. By turns tragic, funny, quirky, charming, and deeply moving, *Together We Will Go* explores the decisions that brings these characters together, and the relationships that grow between them, with some discovering love and affection for the first time. But as they cross state lines and complications to the initial plan arise, it becomes clear that this is a novel as much about the will to live as it is the choice to end it. The final, unforgettable moments as they hurtle toward the outcomes awaiting them will be remembered for a lifetime.

The Shaney Incidents Mike Ferguson,2021-12-29 John Thornton returns home from the war in Iraq, being wounded, suffering post-traumatic stress disorder from his combat experiences and attending the United States Homeland Security School and returns to his job at the Center City, Oklahoma, Police Department as a detective. When a very strange haunting of a local elderly ladies' home and three suspicious deaths occur in Shaney, Oklahoma, a suburb of Center City, it becomes apparent the current investigation authority of the Center City Police Department cannot solve these cases. John Thornton serves as a liaison between the US Department of Homeland Security and the Center City Police Department and makes a plea to a retired United States senator, Nathaniel Andrews, for help, which brings him, Robbie Jensen (US DHS medical examiner), Sofia Clark (a CIA agent), and Dr. Lisa Wayne (psychiatrist) together to form a specialized US DHS Special Investigations Division into existence to work these cases

under the authority of the United States Department of Homeland Security. Although John does not believe in the paranormal, what he experiences firsthand changes his mind. However, even with this group, with the aid of the Oklahoma Paranormal Research Association, the investigations are still very dangerous for all. The tension is high for everyone as the tasks become much more dangerous, both physically and psychologically. The solving of these cases, however, makes the risks all that more important to the US DHS Special Investigations Division team members to save innocent lives.

On Record Beverley Diamond,2021-05-12 Musical media and the audio recording industry have an important and complex history in Newfoundland and Labrador: professional musicians, community songwriters, local institutions, and even politicians have gone on record. The result is a widespread body of work that undercuts the idea of recorded music as a cultural commodity and deepens the province's tradition of cultural activism. Drawing on contemporary testimony and over fifty years of interviews, *On Record* explores how recording projects have served as sonic signatures, forms of protest, homage, or parody of the foibles of those in power. Beverley Diamond examines how audio recording in Newfoundland and Labrador has been shaped not merely by creative individuals, but by such events as resettlement, residential schools, the cod moratorium, technological change, and disasters that have befallen those who live and work on the North Atlantic. A chapter by ethnomusicologist and musician Mathias Kom examines the widespread response to a unique annual challenge to make an audio recording. Spanning both commercial and community-oriented initiatives, this book reflects the vibrant, socially engaged, and resilient nature of communities that value simultaneously and equally the highest professional standards and the creative potential of every citizen. Encompassing music from both settler and Indigenous communities, *On Record* redefines the culture of a province that has most often been associated with traditional music, demonstrating that recording goes beyond the creation of a commodity: it responds to the present and to constructs of public memory.

(If you met the guy you’d understand.) But finding a killer is easier said than done, especially when I’ve also got to deal with my new step-dad’s sex toys showing up all over my mother’s house, a giant slobbering dog with no sense of personal space, my forensic pathologist roommate using the couch for unholy acts, and the evil beach emu who has marked me as its nemesis. Things are heating up, and with a killer on the loose, this time an ice-cold mojito and a thick layer of sunscreen might not be enough to keep me from getting burned...
