The Bears of Brooks Falls: Wildlife and Survival on Alaska's Brooks River Michael Fitz, 2021-03-09
A natural history and celebration of the famous bears and salmon of Brooks River. On the Alaska Peninsula, where exceptional landscapes are commonplace, a small river attracts attention far beyond its scale. Each year, from summer to early fall, brown bears and salmon gather at Brooks River to create one of North America's greatest wildlife spectacles. As the salmon leap from the cascade, dozens of bears are there to catch them (with as many as forty-three bears sighted in a single day), and thousands of people come to watch in person or on the National Park Service's popular Brooks Falls Bearcam. The Bears of Brooks Falls tells the story of this region and the bears that made it famous in three parts. The first forms an ecological history of the region, from its dormancy 30,000 years ago to the volcanic events that transformed it into the Valley of Ten Thousand Smokes. The central and longest section is a deep dive into the lives of the wildlife along the Brooks River, especially the bears and salmon. Readers will learn about the bears' winter

hibernation, mating season, hunting rituals, migration patterns, and their relationship with Alaska's changing environment. Finally, the book explores the human impact, both positive and negative, on this special region and its wild population.

The Best Camera Is The One That's With You Chase Jarvis, 2009-09-18 A beacon of creativity with boundless energy, Chase Jarvis is well known as a visionary photographer, director, and social artist. In *The Best Camera Is The One That's With You*, Chase reimagines, examines, and redefines the intersection of art and popular culture through images shot with his iPhone. The pictures in the book, all taken with Chase's iPhone, make up a visual notebook—a photographic journal—from the past year of his life. The book is full of visually-rich iPhone photos and peppered with inspiring anecdotes. Two megapixels at a time, these images have been gathered and bound into a

book that represents a stake in the ground. With it, Chase underscores the idea that an image can come from any camera, even a mobile phone. As Chase writes, "Inherently, we all know that an image isn't measured by its resolution, dynamic range, or anything technical. It's measured by the simple—sometimes profound, other times absurd or humorous or whimsical—effect that it can have upon us. If you can see it, it can move you." This book is geared to inspire everyone, regardless of their level of photography knowledge, that you can capture moments and share them with our friends, families, loved ones, or the world at the press of a button. Readers of *The Best Camera Is The One That's With You* will also enjoy the iPhone application Chase Jarvis created in conjunction with this book, appropriately named *Best Camera*. *Best Camera* has a unique set of filters and effects that can be applied at the touch of a button. Stack them. Mix them. Remix them. *Best Camera* also allows you to share directly to a host of social marketing sites via www.thebestcamera.com, a new online community that allows you to contribute to a living, breathing gallery of the best iPhone photography from around the globe. Together, the book, app, and website, represent a first-of-its-kind ecosystem dedicated to encouraging creativity through picture taking with the camera that you already have. *The Best Camera Is The One That's With You—shoot!*

Lighting for Televised Live Events James L. Moody, Jeff Ravitz, 2021-05-30 Lighting for Televised Live Events unlocks the science, art, philosophies, and language of creating lighting for live entertainment and presentations that work for the television camera as well as for the live audience. The book explores how to retain the essence and excitement of a live production while assuring that the show looks its best on-camera

for the millions of viewers that can only see it on their TV, computer, tablet, or mobile phone screen. Readers will learn how to adapt an existing stage show for the camera, as well as how to design live entertainment or events specifically for TV. Filled with real-life examples and illustrations, the book covers a wide range of topics, including: how exposure and color work for the camera; how angle, visual balance, and composition can make people and backgrounds look their best, while preserving theatricality; information on camera equipment, screens, and projectors, as well as the control room environments that are found on a professional shoot; the unique challenges of lighting for the IMAG video screens used at festivals and concerts. *Lighting for Televised Live Events* is aimed at lighting design students, as well as professional designers that are considering a career – or a career expansion – in television. It is an essential resource for any stage lighting designer whose show may be shot for a television special or a live webcast and who will be asked by their client to collaborate with the incoming video team.

Women as Weapons of War Kelly Oliver, W Alton Jones Chair of Philosophy Kelly Oliver, 2007 From the female soldiers of Abu Ghraib prison to Palestinian women suicide bombers, women and their bodies have been powerful weapons in the Afghanistan and Iraq wars. Kelly Oliver reveals how the media and the George W. Bush

administration used metaphors of weaponry to describe women and female sexuality and forge a link between vulnerability and violence. Oliver analyzes the discourse surrounding women, sex, and gender and the use of women to justify America's decision to go to war. She also considers the cultural meaning, or lack of meaning, that lead female soldiers at Abu Ghraib to abuse prisoners just for fun, and the commitment to death made by women suicide bombers. She examines the pleasure taken in violence and the passion for death and what kind of contexts creates them. Oliver concludes with a diagnosis of our fascination with sex, violence, and death and its relationship with live news coverage and embedded reporting, which naturalizes horrific events and stymies critical reflection.

Saved from Oblivion Andreas Kitzmann, 2004 What lies behind our need to rigorously document the thoughts, deeds, images, and sounds of everyday life? And more curiously, why would anyone want to spend time going over such material? At any given point someone is using a pen, a camera, a web cam, or a computer to document with varying degrees of detail, personal thoughts, observations, or glimpses of private space and life. And for each of these, there is usually at least one person reading, watching, and even responding. *Saved from Oblivion* is a comparative analysis of how individuals have used various media technologies to document their everyday lives. More specifically, this book focuses on the major forms of self-documentation that have been in use since the late nineteenth century and covers traditional diaries, snapshot photography, home movies/videos, and web-based media such as web cams and online diaries or journals.
