*Technobiophilia* Sue Thomas,2013-09-26 Why are there so many nature metaphors - clouds, rivers, streams, viruses, and bugs - in the language of the internet? Why do we adorn our screens with exotic images of forests, waterfalls, animals and beaches? In *Technobiophilia: Nature and Cyberspace*, Sue Thomas interrogates the prevalence online of nature-derived metaphors and imagery and comes to a surprising conclusion. The root of this trend, she believes, lies in biophilia, defined by biologist E.O. Wilson as 'the innate attraction to life and lifelike processes'. In this wide-ranging transdisciplinary study she explores the strong thread of biophilia which runs through our online lives, a phenomenon she calls 'technobiophilia', or, the 'innate attraction to life and lifelike processes as they appear in technology'. The restorative qualities of biophilia can alleviate mental fatigue and enhance our capacity

for directed attention, soothing our connected minds and easing our relationship with computers. Technobiophilia: Nature and Cyberspace offers new insights on what is commonly known as 'work-life balance'. It explores ways to make our peace with technology-induced anxiety and achieve a 'tech-nature balance' through practical experiments designed to enhance our digital lives indoors, outdoors, and online. The book draws on a long history of literature on nature and technology and breaks new ground as the first to link the two. Its accessible style will attract the general reader, whilst the clear definition of key terms and concepts throughout should appeal to undergraduates and postgraduates of new media and communication studies, internet studies, environmental psychology, and human-computer interaction. Sputnik's Guide to Life on Earth Frank Cottrell-Boyce, 2016-04-07 Shortlisted for the 2017 Carnegie Medal and selected for the Tom Fletcher Book Club, Sputnik's Guide to Life on Earth by Frank Cottrell-Boyce is an adventure about the Blythes: a big, warm, rambunctious family who live on a small farm and sometimes foster children. Now Prez has come to live with them. But, though he

seems cheerful and helpful, he never says a word. Then one day Prez answers the door to someone claiming to be his relative. This small, loud stranger carries a backpack, walks with a swagger and goes by the name of Sputnik. The family all think Sputnik is a dog and chaos is unleashed as suddenly household items come to life – like a TV remote that fast-forwards people and a toy lightsaber that entertains guests at a children's party, until one of them is nearly decapitated by it – and Prez is going to have to use his voice to explain himself. As Sputnik takes Prez on a journey to finish writing his guidebook to Earth called Ten Things Worth Doing on Earth, each adventure seems to take Prez nearer to the heart of the family he is being fostered by, but they also take him closer to the day that he is due to leave them forever . . . This edition features fantastic cover artwork and black and white inside illustrations from the incredible Steven Lenton.

The Culture of Stopping Harald Welzer,2023-05-25 Our culture has no concept of stopping. We continue to build motorways and airports for a future in which cars and planes may no longer exist.

We're converting our planet from a natural one to an artificial one in which the quantity of man-made objects – houses, asphalt, cars, plastic, computers and so on – now exceeds the totality of living matter. And while biomass continues to decline due to deforestation and species extinction, the mass of man-made objects is growing faster than ever. We're on a treadmill to disaster. To get off this treadmill, argues Harald Welzer, we need to learn how to stop: as individuals and as societies, we need to stop doing what we're doing and say 'enough'. We find it hard to do this because our culture has trained us to regard endless escalation as desirable, and we're reluctant to surrender the material benefits of growth. But as long as the expansive cultural model continues to prevail, there will be no change of course in favour of sustainable and climate-friendly practices and lifestyles. We need a cultural model in which the beauty of stopping is given the recognition needed for the project of civilization to continue. Optimizing processes that are heading in the wrong direction only makes matters worse. Stopping is imperative: it is a human cultural technique that we must re-learn. Only then can we achieve a new beginning.

**The Boy Who Spoke to the Earth** Chris Burkard,2015-07-01 When a young boy in search of joy asks the Earth where he can find happiness, the Earth responds and agrees to show him the way. The boy rushes excitedly through the landscapes that make the Earth most proud--the ocean, the cliffs, the forest, the desert, the mountains, and the top of the world. But the boy soon realizes happiness is much harder to find than he expected.

**Heaven** Randy Alcorn, 2011-12-09 Over 1 Million Copies Sold! Have you ever wondered . . . ?

What is Heaven really going to be like? What will we look like? What will we do every day? Won't Heaven get boring after a while? We all have questions about what Heaven will be like, and after twenty-five years of extensive research, Dr. Randy Alcorn has the answers. In the most comprehensive and definitive book on Heaven to date, Randy invites you to picture Heaven the way Scripture describes it—a bright, vibrant, and physical New Earth, free from sin, suffering, and death,

and brimming with Christ's presence, wondrous natural beauty, and the richness of human culture as God intended it. This is a book about real people with real bodies enjoying close relationships with God and each other, eating, drinking, working, playing, traveling, worshiping, and discovering on a New Earth. Earth as God created it. Earth as he intended it to be. The next time you hear someone say, "We can't begin to image what Heaven will be like," you'll be able to tell them, "I can." "Other than the Bible itself, this may well be the single most life-changing book you'll ever read." —Stu Weber "This is the best book on Heaven I've ever read." —Rick Warren "Randy Alcorn's thorough mind and careful pen have produced a treasury about Heaven that will inform my own writing for years to come." —Jerry B. Jenkins "Randy does an awesome job of answering people's toughest questions about what lies on the other side of death." —Joni Eareckson Tada About the Author Randy Alcorn is an author and the founder and director of Eternal Perspective Ministries, a nonprofit ministry dedicated to teaching principles of God's Word and assisting the church in ministering to unreached, unfed, unborn, uneducated, unreconciled, and unsupported people around the world. A New York Times

bestselling author of over 50 books, including *Heaven*, *The Treasure Principle*, *If God Is Good*, *Happiness*, and the award-winning novel *Safely Home*, his books sold exceed eleven million copies and have been translated into over seventy languages. Randy resides in Oregon with his wife, Nanci.

*The Tiger* John Vaillant, 2010-08-24 It's December 1997 and a man-eating tiger is on the prowl outside a remote village in Russia's Far East. The tiger isn't just killing people, it's annihilating them, and a team of men and their dogs must hunt it on foot through the forest in the brutal cold. To their horrified astonishment it emerges that the attacks are not random: the tiger is engaged in a vendetta. Injured and starving, it must be found before it strikes again, and the story becomes a battle for survival between the two main characters: Yuri Trush, the lead tracker, and the tiger itself. As John Vaillant vividly recreates the extraordinary events of that winter, he also gives us an unforgettable portrait of a spectacularly beautiful region where plants and animals exist that are found nowhere else on earth, and where the once great Siberian Tiger - the largest of its species, which can weigh over 600 lbs at more than 10 feet long - ranges daily over vast territories of forest and mountain, its

numbers diminished to a fraction of what they once were. We meet the native tribes who for centuries have worshipped and lived alongside tigers - even sharing their kills with them - in a natural balance. We witness the first arrival of settlers, soldiers and hunters in the tiger's territory in the 19th century and 20th century, many fleeing Stalinism. And we come to know the Russians of today - such as the poacher Vladimir Markov - who, crushed by poverty, have turned to poaching for the corrupt, high-paying Chinese markets. Throughout we encounter surprising theories of how humans and tigers may have evolved to coexist, how we may have developed as scavengers rather than hunters and how early Homo sapiens may have once fit seamlessly into the tiger's ecosystem. Above all, we come to understand the endangered Siberian tiger, a highly intelligent super-predator, and the grave threat it faces as logging and poaching reduce its habitat and numbers - and force it to turn at bay. Beautifully written and deeply informative, The Tiger is a gripping tale of man and nature in collision, that leads inexorably to a final showdown in a clearing deep in the Siberian forest.

Ideography and Chinese Language Theory Timothy Michael O'Neill, 2016-07-11 This book is a

much-needed scholarly intervention and postcolonial corrective that examines why and when and how misunderstandings of Chinese writing came about and showcases the long history of Chinese theories of language. 'Ideography' as such assumes extra-linguistic, trans-historical, universal 'ideas' which are an outgrowth of Platonism and thus unique to European history. Classical Chinese discourse assumes that language (and writing) is an arbitrary artifact invented by sages for specific reasons at specific times in history. Language by this definition is an ever-changing technology amenable to historical manipulation; language is not the House of Being, but rather a historically embedded social construct that encodes quotidian human intentions and nothing more. These are incommensurate epistemes, each with its own cultural milieu and historical context. By comparing these two traditions, this study historicizes and decolonializes popular notions about Chinese characters, exposing the Eurocentrism inherent in all theories of ideography. Ideography and Chinese Language Theory will be of significant interest to historians, sinologists, theorists, and scholars in other branches of the humanities.

Down to Earth Lauren Liess, 2019-10-08 The designer and author of *Habitat* “shares how she imbues any space with warmth and energy” in this elevated yet accessible follow-up (MarthaStewart.com). *Down to Earth* picks up right where Lauren Liess’s critically acclaimed *Habitat* left off. While *Habitat* walked readers through the decorating process step-by-step, Liess’s latest title takes a step beyond the basics and invites readers to incorporate the main components of her familiar design aesthetic: nature, easy living, and approachability. With evocative photos and substantive design advice, *Down to Earth* focuses on creating a lifestyle that inspires creativity and functionality. Throughout the book, Liess shows readers how to incorporate six guiding principles in six unique homes: a new farmhouse, a classic American historical home, a lakeside contemporary house, a modern villa, a turn-of-the-century American Foursquare, and a cedar and glass house on a bluff. While each home has a different architectural style, fingerprints of Liess’s down-to-earth style are

evident throughout. “Full of the stunning images you would expect. They will spark your creativity and inspire your own designs. However, the real beauty comes from Lauren showing readers how to create ease in their own homes.” —Ariadne Shoppe “Her style embraces lived-in, vintage-inspired interiors . . . Her philosophy is that if your home is relaxed, then you’re relaxed.” —One Kings Lane
