**The Next Wave** Darrell M. West,2012-01-01 The digital revolution is in full force but many public and private sector leaders are stymied: How can they maximize the full potential of digital technology? This hesitancy puts a brake on the transformational power of digital technology and means private companies and governmental bodies fall well behind other digital pioneers. Darrell West focuses on the next wave of technologies and how they can further enhance U.S. social and political innovation. West champions exploiting technological advances to help organizations become faster, smarter, and more efficient. Consumers can deploy new digital technology to improve health care, gain access to education, learn from the news media, and check public sector performance. New storage platforms such as high-speed broadband, mobile communications, and cloud computing enable and improve both social and economic development. However, to gain these benefits, policymakers must recognize the legitimacy of public fears about technology and the privacy and security dangers posed by the Internet. Their goal must be to further innovation and investment while also protecting basic social and individual values. West argues that digital technology innovation is consistent in many ways with personal and social values; people can deploy digital technology to improve participation and collaboration, and political leaders can work with the private sector to stimulate a flowering of innovation in a variety of policy areas.

HCI Outdoors: Theory, Design, Methods and Applications D. Scott McCrickard,Michael Jones,Timothy L. Stelter,2020-10-19 Advances in network connectivity, power consumption, and physical size create new possibilities for using interactive computing outdoors. However, moving computing outdoors can drastically change the human outdoor experience. This impact is felt in many kinds of outdoor activities such as citizen science, personal recreation, search and rescue, informal education, and others. It is also felt across outdoor settings that range from remote wilderness to crowded cities. Understanding these effects can lead to ideas, designs and systems that improve, rather than diminish, outdoor experiences. This book represents the current results emerging from recent workshops focused on HCI outdoors and held in conjunction with CHI, GROUP, UbiComp, and MobileHCI conferences. Based on feedback at those workshops, and outreach to other leaders in the field, the chapters collected were crafted to highlight methods and approaches for

understanding how technologies such as handhelds, wearables, and installed standalone devices impact individuals, groups, and even communities. These findings frame new ways of thinking about HCI outdoors, explore logistical issues associated with moving computing outdoors, and probe new experiences created by involving computing in outdoor pursuits. Also important are the ways that social media has influenced preparation, experience, and reflection related to outdoor experiences. HCI Outdoors: Theory, Design, Methods and Applications is of interest to HCI researchers, HCI practitioners, and outdoor enthusiasts who want to shape future understanding and current practice related to technology in every kind of outdoor experience.

They use the Salesforce Commerce Cloud, Acquire, and Get Satisfaction e-commerce customer service technologies respectively. Get Satisfaction and Salesforce Commerce Cloud, unlike Acquire, enable businesses build online customer communities. Salesforce Commerce Cloud and Acquire, unlike Get Satisfaction have analytics capabilities, which are rather important to support organizations, including businesses that offer customer support. It is difficult to see how this type of politics could be reconciled with the democratic requirement of active and informed agency. Rethinking the Spectacle re-examines the tension between spectacle and political agency using the ideas and practices of Guy Debord and the Situationist International as a point of departure. Drawing on radical democratic theory and examining case studies such as the 2011 Occupy movement, Devin Penner concludes that spectacle can and should be used to mobilize the public for egalitarian purposes.
