Digital Culture & Society (DCS) Ramón Reichert, Annika Richterich, Pablo Abend, Mathias Fuchs, Karin Wenz, 2016-12-31 »Digital Culture & Society« is a refereed, international journal, fostering discussion about the ways in which digital technologies, platforms and applications reconfigure daily lives and practices. It offers a forum for critical analysis and inquiries into digital media theory and provides a publication environment for interdisciplinary research approaches, contemporary theory developments and methodological innovation. The third issue »Politics of Big Data« edited by Mark Coté, Paolo Gerbaudo, and Jennifer Pybus, critically examines the political and economic dimensions of Big Data and thus details its contestation. The contributions focus on the materialities and processes which manifest Big Data and explore forms of value beyond the state and capital. These range from open data initiatives, social media metrics, machine learning algorithms, data visualisation to data dashboards, critical data analysis, and new modes of data action research and practice.

The Creator Richard Moore, 2007-06 Travis Sheridan was just a man. He never intended to break the law. He never intended to chase a killer across the country. He certainly never intended to kill anybody. But Travis Sheridan is about to reunite with the only man in the world who can help him lay down his demons—the man who is his demons. A wondering force now seeks a kindred soul, and a woman alone in a monastery encounters a fragment of God's power. The nation's authorities seek a brutal killer—and are forced to hunt an innocent soul. Meanwhile, a community of people founded on peace is frightened by the monstrosity that walks among them. In the end, only God's hand will prevail. Richard G. Moore is a student of Theology and English. He has spent many years studying God, trying to take his Faith seriously, build a better world an inch at a time, and for many years spent hours sitting in his room begging God to make a Ferrari appear out of nowhere for him. To date, this hasn't happened yet.

.357 Magnum Opus Ghezel Omar, 2020-02-21 Bounty hunter Sexx Pistol never kept track of the body count, until it was one of her own lying dead on the ground. Struck with grief, she swore she would leave Kassius Del Mar, the man she held accountable for her partner's death, and her violent past behind. But it's hard to pass up easy cash for a quick hit job. Lured back into the dark world of drugs, death and destruction, she and Kassius must team up once more to track down Bastian Braun on the orders of powerful crime lord, Lyndon Baines. Baines despises when his laundered money goes missing, and when Bastian goes missing with it, he sends Sexx Pistol and Kassius to take care of the problem. It seems simple enough, but Bastian's vast web of criminal contacts, crooked cops, and stores of cash make him annoyingly evasive. Baines' patience runs out when Bastian escapes the bounty hunters and Kassius kills the wrong guy. As frustrations and collateral damage rise, Sexx Pistol and Kassius will have to overcome their deeply entangled past to complete the job, or risk being Baines' next targets.

Why Good Things Happen to Good People Stephen Post, Ph.D.,Jill Neimark,2008-04-01 A longer life. A happier life. A healthier life. Above all, a life that matters—so that when you leave this world, you'll have changed it for the better. If science said you could have all this just by altering one behavior, would you? Dr. Stephen Post has been making headlines by funding studies at the nation's top universities to prove once and for all the life-enhancing benefits of caring, kindness, and compassion. The exciting new research shows that when we give of ourselves, especially if we start young, everything from life-satisfaction to self-realization and physical health is significantly affected. Mortality is delayed. Depression is reduced. Well-being and good fortune are increased. In their life-changing new book, *Why Good Things Happen to Good People*, Dr. Post and journalist Jill Neimark weave the growing new science of love and giving with profoundly moving real-life stories to show exactly how giving unlocks the doors to health, happiness, and a longer life. The astounding new research includes a fifty-year study showing that people who are giving during their high school years have better physical and mental health throughout their lives. Other studies show that older people who give live longer than those who don't. Helping others has been shown to bring health benefits to those with chronic illness, including HIV, multiple sclerosis, and heart problems. And studies show that people of all ages who help others on a regular basis, even in small ways, feel happiest. *Why Good Things Happen to Good People* offers ten ways to give of yourself, in four areas of life, all proven by science to improve your health and even add to your life expectancy. (And not one requires you to write a check.) The one-of-a-kind "Love and Longevity Scale" scores you on all ten ways, from volunteering to listening, loyalty to forgiveness, celebration to standing up for what you believe in. Using the lessons and guidelines in each chapter, you can create a personalized plan for a more generous life, finding the style of giving that suits you best. The astonishing connection between generosity and health is so convincing that it will inspire readers to change their lives in ways big and small. Get started today. A longer, healthier, happier life awaits you.

Ernest Buckler Marta Dvořák,2006-01-01 Margaret Atwood called Ernest Buckler "one of the pathbreakers for the modern Canadian novel," yet he has slipped into relative obscurity. This new book by Marta Dvořák, *Ernest Buckler: Rediscovery and Reassessment* breaks new ground in Canadian literary studies by analyzing some of Buckler's works that have remained unknown or unexplored by critics, and by addressing the formalistic innovations of these texts. It allows a general readership to discover — and an international specialized readership to reassess — the wide, even eclectic scope of an author best known for his first novel, *The Mountain and the Valley*. Marta Dvořák situates Buckler firmly within his cultural and intellectual environment. She argues the importance of his connections with Emerson and the American transcendental milieu, and demonstrates his links with Romantics such as Schopenhauer and Shelley and modernists like Joyce, Faulkner, and Mansfield, as well as intellectuals from Aristotle to Aquinas. She explores his philosophical vision and his complex, adventurous relationship with language. Extracts from Buckler's published and unpublished material juxtaposed with those from a wide range of writers (from Henry James to Foucault) offer new illuminating perspectives. The progressive structure of the book will draw readers in to discussions on shared concerns: the nostalgia for a vanished past, the relationship between family and community, the rural and the urban, or the questioning of, and coming to terms with, ethics and the social fabric of today's rapidly changing technological horizon in which traditional values are eroding.

Horrifying Children Lauren Stephenson, Robert Edgar, John Marland, 2024-03-07 Horrifying

Children examines weird and eerie children's television and literature via critical analysis, memoir and autoethnography. There has been an explosion of interest in the impact of children's television and literature of the late twentieth century. In particular, the 1970s, '80s and '90s are seen as decades that shaped a great deal of the contemporary cultural landscape. Television of this period dominated the world of childhood entertainment, drawing freely upon literature and popular culture, like the Garbage Pail Kids and Stranger Things, and much of it continues to resonate powerfully with the generation of cultural producers (fiction writers, screenwriters, directors, musicians and artists) that grew up watching the weird, the eerie and the horrific: the essence of 21st-century Hauntology. In these terms this book is not about children's television as it exists now, but rather as it features as a facet of memory in the 21st century. As such it is the legacy of these television programmes that is at the core of Horrifying Children. The 'haunting' of adults by what we have seen on the screen is crucial to the study. This collection directly addresses that which 'scared us' in the past inasmuch as there is a correlation between individual and collective cultural memory, with some chapters providing an opportunity for situating existing explorations and understandings of Gothic and Horror TV within a hauntological and experiential framework.
