Switch Chip Heath,Dan Heath,2010-02-16 Why is it so hard to make lasting changes in our companies, in our communities, and in our own lives? The primary obstacle is a conflict that's built into our brains, say Chip and Dan Heath, authors of the critically acclaimed bestseller *Made to Stick*. Psychologists have discovered that our minds are ruled by two different systems - the rational mind and the emotional mind—that compete for control. The rational mind wants a great beach body; the emotional mind wants that Oreo cookie. The rational mind wants to change something at work; the emotional mind loves the comfort of the existing routine. This tension can doom a change effort - but if it is overcome, change can come quickly. In *Switch*, the Heaths show how everyday people - employees and managers, parents and nurses - have united both minds and, as a result, achieved dramatic results: • The lowly medical interns who managed to defeat an entrenched, decades-old medical practice that was endangering patients • The home-organizing guru who developed a simple technique for overcoming the dread of housekeeping • The manager who transformed a lackadaisical customer-support team into service zealots by removing a standard tool of customer service In a compelling, story-driven narrative, the Heaths bring together decades of counterintuitive research in psychology, sociology, and other fields to shed new light on how we can effect transformative change. *Switch* shows that successful changes follow a pattern, a pattern you can use to make the changes that matter to you, whether your interest is in changing the world or changing your waistline.

Award-winning journalist Catherine Price presents a practical, hands-on plan to break up—and then make up—with your phone. The goal? A long-term relationship that actually feels good. Buddy Brian McGrory,2013-11-05 Brian McGrory thought he had it all figured out: a great job, a condo in Back Bay, and his beloved golden retriever Harry by his side. But after Harry's death, McGrory's life as a bachelor takes quite the turn. He falls in love with Harry's veterinarian Pam, and leaves the city for life in the suburbs with Pam's family and their two dogs, two cats, two rabbits, and Buddy—the self-assured family rooster who hates Brian's guts. These things never go as easily as they should. The commute is long, the kids were wary, and Buddy was constantly poised to attack. But rather than accept defeat, Brian eventually sees that Buddy shares the kind of extraordinary relationship with Pam and the girls that he wants for himself. Funnily enough, it's the rooster's tenacious devotion to the family that encourages a change in Brian's perspective, and before long, the archenemy becomes his inspiration, helping Brian evolve into a true family man With luminous writing and expert comic timing, McGrory brings to life a classic story of love, acceptance, and change as one man's nemesis becomes his madcap mentor. Now with Extra Libris material, including a reader's guide and bonus content

Ticking Clock Ira Rosen,2021-02-16 Two-time Peabody Award-winning writer and producer Ira Rosen reveals the intimate, untold stories of his decades at America’s most iconic news show. It’s a 60 Minutes story on 60 Minutes itself. When producer Ira Rosen walked into the 60 Minutes offices in June 1980, he knew he was about to enter television history. His career catapulted him to the heights of TV journalism, breaking some of the most important stories in TV news. But behind the scenes was a war room of clashing producers, anchors, and the most formidable 60 Minutes figure: legendary correspondent Mike Wallace. Based on decades of access and experience, Ira Rosen takes readers behind closed doors to offer an incisive look at the show that invented TV investigative journalism. With surprising humor, charm, and an eye for colorful detail, Rosen delivers an authoritative account of the unforgettable personalities that battled for prestige, credit, and the desire to scoop everyone else in the game. As one of Mike Wallace’s top producers, Rosen reveals the interview secrets that made Wallace’s work legendary, and the flaring temper that made him infamous. Later, as senior producer of ABC News Primetime Live and 20/20, Rosen exposes the competitive environment among famous colleagues like Diane Sawyer and Barbara Walters, and the power plays between correspondents Chris Wallace, Anderson Cooper, and Chris Cuomo. A master class in how TV news is made, Rosen shows readers how 60 Minutes puts together a story when sources are explosive, unreliable, and even dangerous. From unearthing shocking revelations from inside the Trump White House, to an outrageous proposition from Ghislaine Maxwell, to interviewing gangsters Joe Bonanno and John Gotti Jr., Ira Rosen was behind the scenes of some of 60 Minutes' most sensational stories. Highly entertaining, dishy, and unforgettable, Ticking Clock is a never-before-told account of the most successful news show in American history.

Strengthening Forensic Science in the United States National Research Council,Division on Engineering and Physical Sciences,Committee on Applied and Theoretical Statistics,Policy and Global Affairs,Committee on Science, Technology, and Law,Committee on Identifying the Needs of the Forensic Sciences Community,2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
