Rumors of Existence Matthew A. Bille,1995 Author Matthew Bille seeks to introduce readers to discoveries, rediscoveries, and sightings of unclassified creatures made since the 1960's. Despite the intensive exploitation of our planet, there remain surprising gaps in our knowledge of the animal world. New birds, mammals, reptiles, fishes and amphibians are still described every year. Bille seeks to introduce readers to discoveries, rediscoveries and sightings of unclassified creatures made since the 1960's. the animals being presented include large mammals from Vietnam, a Tasmanian pouched wolf, pygmy elephants and a dolphin with two dorsal fins. Exhaustively researched and scientifically accurate, *Rumors of Existence* is a testimonial to the variety of life existing on this plant and a plea to explore and preserve what remains of the wild.

The Fossil Hunter Shelley Emling,2009-10-13 At a time when women were excluded from science, a young girl made a discovery that marked the birth of paleontology and continues to feed the debate about evolution to this day. Mary Anning was only twelve years old when, in 1811, she discovered the first dinosaur skeleton--of an ichthyosaur--while fossil hunting on the cliffs of Lyme Regis, England. Until Mary's incredible discovery, it was widely believed that animals did not become extinct. The child of a poor family, Mary became a fossil hunter, inspiring the tongue-twister, *She Sells Sea Shells by the Seashore*. She attracted the attention of fossil collectors and eventually

the scientific world. Once news of the fossils reached the halls of academia, it became impossible to ignore the truth. Mary's peculiar finds helped lay the groundwork for Charles Darwin's theory of evolution, laid out in his *On the Origin of Species*. Darwin drew on Mary's fossilized creatures as irrefutable evidence that life in the past was nothing like life in the present. A story worthy of Dickens, *The Fossil Hunter* chronicles the life of this young girl, with dirt under her fingernails and not a shilling to buy dinner, who became a world-renowned paleontologist. Dickens himself said of Mary: The carpenter's daughter has won a name for herself, and deserved to win it. Here at last, Shelley Emling returns Mary Anning, of whom Stephen J. Gould remarked, is probably the most important unsung (or inadequately sung) collecting force in the history of paleontology, to her deserved place in history.
