🔖 [TRADE MARK LAW IN EUROPE](#) Ulrich Hildebrandt,2024-01-16 Trade mark law practitioners agree that Ulrich Hildebrandt’s Trade Mark Law in Europe hugely enhances their work. This fourth edition follows the same well-known, intensely practical, time-saving format, with each provision of current law (Directive 2015/2436) reproduced in its original English wording and annotated with relevant passages from all relevant decisions of the European Court of Justice, as well as relevant provisions of the Community Trade Mark Regulation and the national trade mark acts of all Member States implementing the Directive. The author’s expert commentary on each provision expressly marks major changes to previous versions of the Directive, highlights when case law concerning a previous version remains relevant and translates passages that lack an official English text. Among the fundamental questions addressed are the following: When is it possible to register a geographical indication as a trademark? Are colours and sounds capable of registration? When may the reputation of a mark be invoked to protect it? How mundane could a sign be and still claim to be distinctive? When can it be said that there has been no genuine use of a trade mark? Where does the court’s function theory influence the trademark law? Given a topic or keyword, appendices assist in the quick finding of any provision of the Directive and relevant case law. There is no other resource presenting the original wording of ECJ case law, broken down by specific points of law and directly related on an article-by-article basis to EU and Member State trade mark legislation. As a highly organized presentation of key information, this is an ideal initial tool that makes any research into European trade mark law fast and easy, whether for academic purposes or actual legal practice. Lawyers, in-house counsel, judges, and academics will all welcome this new edition.

🔖 [RESEARCH HANDBOOK ON INTERNATIONAL INSURANCE LAW AND REGULATION](#) Julian Burling, Julian M. Burling, Kevin Lazarus,2012 ‘Global insurance and its rapidly evolving law and regulation demands international research. To this aim, the Handbook offers a truly international collection of essays. Highly renowned experts analyze the key topics currently under international discussion and development. While representing a diversity of national jurisdictions, the focus lies on the largest insurance jurisdictions (USA, UK and Germany) but newly important jurisdictions like Brazil and China are considered as well as most valuable and important contribution to international insurance law literature.’ Manfred Wandt, Director of the Insurance Law Institute, Goethe-University Frankfurt, Germany ‘This Research Handbook is published at an opportune time. A global review of insurance law and regulation is underway. Much reform happens locally with little reference to developments elsewhere and this Research Handbook brings the strands together. It is a comprehensive review by distinguished authors from different backgrounds including both leading academics and practitioners. They consider the definitions of insurance, its economic underpinnings, comparative law and regulations, actual and proposed reforms, the effects on underwriting and claims and how insurance is studied and taught. Good laws and regulation benefit the market and its customers. Bad laws and regulation do the opposite. This book is required reading for all involved in the reform process.’ David Hertzell, Law Commissioner ‘Globalisation has had no greater impact in the commercial world than on insurance, the law which governs it and the risks it seeks to address. Those who inspired this publication and the contributing authors, are to be thanked for providing such a necessary and useful reference source. It covers so much of what insurance professionals need to be aware of in the insurance/law world of the twenty first century.’ Michael Gill, President of the International Insurance Law Association Given its economic importance, insurance is a field that has been underserved as an area of academic study. This detailed book provides much needed coverage of insurance law and regulation in its international context. Produced in association with Lloyd’s, it draws on the expertise both of academics and practising lawyers. Containing 30 comprehensive chapters, it provides in-depth studies on key areas, such as the role of international organisations, the judicial interpretation of insurance contract clauses and transnational regulatory recognition. It also provides thorough introductions to important jurisdictions, including the EU, US and Japan as well as focusing on newly emerging economies such as China and Brazil. Specialist topics covered include regulation by and of Lloyd’s, the tort of bad faith in the US, microinsurance and takaful insurance. This well-documented resource will appeal to academics and students in insurance law and regulation, policymakers and private practice lawyers. The book also aims to stretch the imagination of anyone with an interest in insurance law and regulation, providing detailed analysis and avenues for further investigation.

🔖 [HANDBOOK OF BIG DATA AND ANALYTICS IN ACCOUNTING AND AUDITING](#) Tarek Rana, Jan Svanberg, Peter Hman, Alan Lowe,2023-02-03 This handbook collects the most up-to-date scholarship, knowledge, and new developments of big data and data analytics by bringing together many strands of contextual and disciplinary research. In recent times, while there has been considerable research in exploring the role of big data, data analytics, and textual analytics in accounting, and auditing, we still lack evidence on what kinds of best practices academics, practitioners, and organizations can implement and use. To achieve this aim, the handbook focuses on both conventional and contemporary issues facing by academics, practitioners, and organizations particularly when technology and business environments are changing faster than ever. All the chapters in this handbook provide both retrospective and contemporary views and commentaries by leading and knowledgeable scholars in the field, who offer unique insights on the changing role of accounting and auditing in today’s data and analytics driven environment. Aimed at academics, practitioners, students, and consultants in the areas of accounting, auditing, and other business disciplines, the handbook provides high-level insight into the design, implementation, and working of big data and data analytics practices for all types of organizations worldwide. The leading scholars in the field provide critical evaluations and guidance on big data and data analytics by illustrating issues related to various sectors such as public, private, not-for-profit, and social enterprises. The handbook’s content will be highly desirable and accessible to accounting and non-accounting audiences across the globe.

🔖 [CORPORATE FORMS AND ORGANIZATIONAL CHOICE IN INTERNATIONAL INSURANCE](#) Robin Pearson, Takau Yoneyama,2015 Examining the development of multiple forms of organisation in insurance from a historical and international context, this book relates this history to modern organisation theory. The 13 chapters by expert scholars cover eight major markets that together account for over half of world insurance today.

🔖 [MANAGING HYBRID ORGANIZATIONS](#) Susanna Alexius, Staffan Furusten,2018-12-05 A much-needed addition to literature, this timely edited collection aims to provide clarity and understanding on how modern organizations work. The authors explore the characteristics of hybrid organizations in contemporary society, taking into account the complex societal challenges that face businesses today. Arguing that hybrid organizations are in fact not a new phenomenon, this thought-provoking collection goes beyond existing research and re-evaluates our traditional understanding of this concept. Scholars of organization, management and innovation will find this book an insightful read, as it sheds light on the fundamental aspects that shape today’s hybrid organizations.

🔖 [THE QUEST FOR A DIVIDED WELFARE STATE](#) John Lapidus,2019-08-29 This book deals with the quest for a divided welfare state in Sweden. The prime example is the rapid rise of private health insurance, which now constitutes a parallel system characterized by state subsidies for some and not for others. This functions as a kind of reverse means-testing, whereby primarily the upper classes get state support for new types of welfare consumption. Innovatively, Lapidus explains how such a parallel system requires not only direct and statutory state support but also indirect support, for example, from infrastructure built for the public health system. He goes on to examine how semi-private welfare funding is dependent on private provision and how the so-called ‘hidden welfare state’ gradually erodes the visible and former universal welfare state model, in direct contrast to its own stated goals. Who benefits from privatized welfare? How are the privatization of delivery and the privatization of funding linked? How does this impact public willingness to pay tax? All of these questions and more are discussed in this accessible volume.
