Television Weathercasting Robert Henson, 1990

Will it rain tomorrow? That perennial question has made weather the most popular segment of local

television news for years. Yet weathercasters do far more than simply convey the latest outlook. Depending on the circumstances, they may inject humor into the forecast (having a Lhasa apso pant and wag its tail during the forecast, for instance), warn of a life-threatening tornado or hurricane, or instruct viewers on the science behind weather. This book, the first critically to examine weathercasters and their craft, is based on years of research and covers both the lighthearted and serious aspects of television weather. Chapters include pioneer weathercasters of the 1940s and 1950s, technical advances, interaction with the National Weather Service, severe weather coverage, celebrities who began with television weather, and the status of women and minorities in weathercasting.

Broadcasting Journalism Jacoby

Barrera, 2019-03-19 Advertising research is a systematic process of marketing research conducted to improve the efficiency of advertising. Advertising and media research explains the complexities of planning in a fast-moving non-complex style. As we enter the new century of transformed advertising techniques and marketing challenges. Research is to find out something new, and advertising research is to find out how advertising works effectively and guide in making effective advertising decisions. There are various kinds of advertising research, and these include pre-testing, post-testing, campaign research, and measuring advertising effectiveness. Advertising follows logically after listening to consumer requirements, introducing productive conditions,

distributing the goods. However, the actual sequence - and emphasis deriving from the diverse sub-cultures - can be quite differentiated. The effects of the different mass media on social, psychological and physical aspects. Research survey that segments the people based on what television programs they watch, radio they listen and magazines they read. Media research makes use of scientific methods of research. It aims at providing an objective, unbiased evaluation of data. First the research problem is identified, and then a prescribed set of procedures of research is followed to investigate the problem. Only thereafter comes report of the findings. This book is more catered to readers who have no background on the media. It is more informational than instructional. It's great if you are looking into learning about how the media works per se but not if you are concerned about effectively positioning your products in the market.

Managing Television News B. William Silcock, Don Heider, Mary T. Rogus, 2009-03-04 Managing Television News provides a practical introduction to the television news producer, one of the most significant and influential roles in a newscast. Recognizing the need for formal training in this key role, authors B. William Silcock, Don Heider, and Mary T. Rogus have combined their expertise and experience to shape this essential resource on the responsibilities, demands, and rewards of the news producer position. Their book provides a strategic approach to producing newscasts and serves as an in-depth guide to creating quality, audience-friendly newscasts working within the

realistic limitations of most newsrooms. It helps the student and the professional producer sort through the various deadline-driven challenges of creating a 30-minute newscast. Filled with real-world examples and advice from news directors, producers, and anchors currently in the business, and photographs illustrating the varied perspectives in the position, *Managing Television News* provides critical skill sets to help resolve ethical dilemmas, as well as keen and fresh insights on how to win the ratings without compromising news quality. Career concerns are also addressed. This resource is a pioneering book for the professional television newsroom and the individual reader interested in starting or expanding a producing career. It is an excellent text for the college classroom, as its structure fits neatly into a semester schedule, and it is a must-have resource for both seasoned and novice producers, as well as students in broadcast news.

Us Against Them Randy Bobbitt, 2010-05-25 *Us against Them* examines the phenomenon of talk radio and the role that it plays in the American political process as well as popular culture. Utilizing historical accounts of the industry's growth, biographies of well-known hosts, and interviews with individuals working in the industry, Randy Bobbitt explores why people choose to listen to political talk instead of music when they turn on their radio.

Apparently There Were Complaints Sharon Gless, 2022-11-29 Emmy Award-winning actress Sharon Gless tells all in this laugh-out-loud, juicy, "unforgettably memorable" (Lily Tomlin) memoir

about her five decades in Hollywood, where she took on some of the most groundbreaking roles of her time. Anyone who has seen Sharon Gless act in *Cagney & Lacey*, *Queer as Folk*, *Burn Notice*, and countless other shows and movies, knows that she's someone who gives every role her all. She holds nothing back in *Apparently There Were Complaints*, a hilarious, deeply personal memoir that spills all about Gless's five decades in Hollywood. A fifth-generation Californian, Sharon Gless knew from a young age that she wanted to be an actress. After some rocky teenage years that included Sharon's parents' divorce and some minor (and not-so-minor) rebellion, Gless landed a coveted spot as an exclusive contract player for Universal Studios. In 1982, she stepped into the role of New York Police Detective Christine Cagney for the series *Cagney & Lacey*, which eventually reached an audience of 30 million weekly viewers and garnered Gless with two Emmy Awards. The show made history as the first hour-long drama to feature two women in the leading roles. Gless continued to make history long after *Cagney & Lacey* was over. In 2000, she took on the role of outrageous Debbie Novotny in *Queer as Folk*. Her portrayal of a devoted mother to a gay son and confidant to his gay friends touched countless hearts and changed the definition of family for millions of viewers. *Apparently There Were Complaints* delves into Gless's remarkable career and explores Gless's complicated family, her struggles with alcoholism, and her fear of romantic commitment as well as her encounters with some of Hollywood's biggest names. Brutally honest and incredibly relatable, Gless

puts it all out on the page in the same way she has lived—never with moderation.

Making Local News Phyllis Kaniss, 1997-12-08 Why do crimes and accidents earn more news coverage than development and policy issues affecting thousands of people? Filled with revealing interviews with both journalists and city officials, Making Local News is the first comprehensive look at how the economic motives of media owners, professional motives of journalists, and the strategies of media-wise politicians shape the news we see and hear, thereby influencing urban policy. Making Local News by Phyllis Kaniss . . . is significant. . . . If we can continue to get smarter about that which journalism leaves out or distorts in its coverage of politics, we may eventually get smarter about politics itself.—Mitchell Stephens, The Philadelphia Inquirer View A convincing analysis of the factors and forces which color how and why local issues do, or do not, become newsworthy. —Michael H. Ebner, Journal of Interdisciplinary History This work serves as a reminder of the importance of a medium that is often overlooked until economic realities threaten its very existence. —Choice Kaniss is truly a pioneer in the study of local news.—Susan Herbst, Contemporary Sociology

Search Engine Advertising Catherine Seda, 2004 Most Internet search engines now allow marketers to buy specific keyword positions in addition to,

or instead of, programming their way to the top. This book reveals how to effectively buy a top position on the major search engines and directories.

Mass Communications and Media Studies Peyton Paxson, 2018-05-17 Mass Communications and Media Studies: An Introduction, 2nd edition is a comprehensive yet concise survey of the history of mass communication media, discussing the current state of each medium, and anticipating the future of mass media. Divided into twelve chapters, it can be used in either 16-week semesters or 12-week terms. Retaining the successful organization of the 1st edition, Peyton Paxson writes in an accessible and well-organized manner, catering to both the needs of students and instructors. He begins each chapter with a list of the current issues and trends concerning the chapter's topic, followed by a brief history of that topic, its current state, predictions for the future, an assessment of career opportunities, and discussion questions for critical thinking. More than just updating statistical data, the 2nd edition weaves in discussions of relevant contemporary issues, including crowdsourcing, going 'viral', interactive advertising, tv industry consolidation, 'the internet of things', conflicting ideas of net neutrality and their continuing implications in a more-connected world.

Satellite Observations of the Earth's Environment National Research Council, Division on Earth and Life Studies, Board on Atmospheric Sciences and Climate, Division on Engineering and Physical Sciences, Aeronautics and Space

Engineering Board, Space Studies Board, Committee on NASA-NOAA Transition from Research to Operations, 2003-07-03 This report addresses the transition of research satellites, instruments, and calculations into operational service for accurately observing and predicting the Earth's environment. These transitions, which take place in large part between NASA and NOAA, are important for maintaining the health, safety, and prosperity of the nation, and for achieving the vision of an Earth Information System in which quantitative information about the complete Earth system is readily available to myriad users. Many transitions have been ad hoc, sometimes taking several years or even decades to occur, and others have encountered roadblocks—lack of long-range planning, resources, institutional or cultural differences, for instance—and never reached fruition. Satellite Observations of Earth's Environment recommends new structures and methods that will allow seamless transitions from research to practice.

Forecast Joe Shute, 2021-06-24 Join Joe Shute as he travels across Britain tracing the history of our seasons and discovering how they are changing. We talk about them. We plan our lives around them. The changing seasons are part of us all. But what happens when the weather changes beyond recognition? Joe Shute has spent years unpicking Britain's love affair with the weather, poring over the centuries of folklore, customs and rituals our seasons have inspired. But in recent years Shute has noticed a curious thing: the British seasons are changing far faster and far

more profoundly than we realise. Daffodils in December, frogspawn in November, swallows that no longer fly home, floods, wildfires and winters without snow. Nothing is behaving as it should, sending nature into an increasing state of flux. In Forecast, Shute travels all over Britain tracing the history of the seasons, and discovering the extent to which we are now growing disconnected from them. While documenting these warped rhythms caused by the changing weather, he records the parallels in his personal journey as he and his wife struggle to conceive a child. This is a book that races to keep up with the march of the seasons as they rapidly change course. It examines how the weather is reshaping the world around us, and asks what happens to centuries of culture, memory and identity when the very thing they subsist on is slipping away.

The Snow Booklet Nolan J. Doesken, Arthur Judson, 1997 Written for climatological observers and their managers, snow-fighters, urban planners, winter recreationists, and all who find in snow a sense of inspiration and awe, this profusely illustrated book provides a wealth of snow data. Contents: the power and beauty of snow; the science of snow; climatology of snow in the U.S.; measuring snow; problems and challenges in measuring snow; procedure for measuring snow; dealing with adversity (blizzards); common questions about snow; and more. Illustrated with comparative charts and graphs, diagrams, and black and white and color photos. Bibliography. Glossary of snow terms.

Watching the Weather Elizabeth Miles, 2005-02-01

Readers learn there's a lot more to 'Watching the Weather' than flipping on the local news. This series focuses on what children notice most about weather. It also explains what may result from certain weather conditions, such as how dew and frost form. Each book defines the weather condition, explains how it occurs, and discusses its effect on people, plants, and animals. A related activity is also included.

America, the Owner's Manual Bob Graham,Chris Hand,2016-07-15 In 2016, Americans fed up with the political process vented that frustration with their votes. Republicans nominated for president a wealthy businessman and former reality show host best known on the campaign trail for his sharp rhetoric against immigration and foreign trade. Democrats nearly selected a self-described socialist who ran on a populist platform against the influence of big money in politics. While it is not surprising that Americans would channel their frustrations into votes for contenders who pledge to end business as usual, the truth is that we don't have to pin our hopes for greater participation on any one candidate. All of us have a say—if we learn, master and practice the skills of effective citizenship. One of the biggest roadblocks to participation in democracy is the perception that privileged citizens and special interests command the levers of power and that everyday Americans can't fight City Hall. That perception is undoubtedly why a 2015 Pew Charitable Trusts survey found that 74 percent of those Americans surveyed believed that most elected officials didn't care what people like

them thought. Graham and Hand intend to change that conventional wisdom by showing citizens how to flex their citizenship muscles. They describe effective citizenship skills and provide tips from civic experts. Even more importantly, they offer numerous examples of everyday Americans who have used their skills to make democracy respond. The reader will see themselves in these examples of citizens who chose to be victorious participants rather than tranquil spectators in the arena of democracy. By the end of the book, you will have new confidence that citizen participation is the lifeblood of America -- and will be ready to make governments work for you, not the other way around.

Computational Science and Its Applications -- ICCSA 2015 Osvaldo Gervasi, Beniamino Murgante, Sanjay Misra, Marina L. Gavrilova, Ana Maria Alves Coutinho Rocha, Carmelo Torre, David Tanar, Bernady O. Apduhan, 2015-06-18 The five-volume set LNCS 9155-9159 constitutes the refereed proceedings of the 15th International Conference on Computational Science and Its Applications, ICCSA 2015, held in Banff, AB, Canada, in June 2015. The 232 revised full papers presented in 22 workshops and a general track were carefully reviewed and selected from 780 initial submissions for inclusion in this volume. They cover various areas in computational science ranging from computational science technologies to specific areas of computational science such as computational geometry and security.

Mass Media and American Politics Doris A.

Graber, Johanna Dunaway, 2017-08-08 Mass Media and American Politics is the most comprehensive and best book for political communication. This text has made it easy for my students to learn about research and theory related to political journalism and the political communication system in America. It has great utility and insight while being comprehensive but not overwhelming for students. –Jason Martin, DePaul University Known for its readable introduction to the literature and theory of the field, Mass Media and American Politics is a trusted, comprehensive look at media's impact on attitudes, behavior, elections, politics, and policymaking. This Tenth Edition is thoroughly updated to reflect major structural changes that have shaken the world of political news and examines the impact of the changing media landscape. It includes timely examples from the 2016 election cycle to illustrate the significance of these changes. This classic text balances comprehensive coverage and cutting-edge theory, shows students how the media influence governmental institutions and the communication strategies of political elites, and illustrates how the government shapes the way the media disseminate information. Written by Doris A. Graber—a scholar who has played an enormous role in establishing and shaping the field of mass media and American politics—and Johanna Dunaway, this book sets the standard.
