Exploring Natural Hazards Darius Bartlett,Ramesh Singh,2018-04-09 The Sendai Framework for Disaster Risk Reduction 2015–2030 has identified four priority areas for Disaster Risk Reduction: understanding disaster risk; strengthening disaster risk governance to manage disaster risk; investing in disaster risk reduction for resilience and enhancing disaster preparedness for effective response; and to Build Back Better in recovery, rehabilitation and reconstruction. Although tremendous progress has been made in recent decades in understanding the workings of the Earth systems and, in particular, its impacts on and responses to human actions, there remains a continuing and pressing need for knowledge that will allow society to simultaneously reduce exposure to global environmental hazards, while also meeting economic development goals. Exploring Natural Hazards: A Case Study Approach, contributes to the knowledge showcasing advanced practices for the monitoring of natural hazards. Through each case study, the book examines mainly hazards arising from processes within the hydrosphere and atmosphere, triggered or exacerbated by inputs to and transfers of energy between environmental components. It discusses the causes of these phenomena, and ways in which improved policy making, sometimes coupled with the application of appropriate modern technologies, can help to reduce people’s exposure to harm. Discussing challenges, lessons learned and recommendations, this book provides a snapshot of issues related to tropical cyclones and typhoons, desertification, floods, lightning as a hazard and the need for alert systems. It is a valuable resource for practitioners and professionals alike, for researchers, students and others who work at the intersection between environmental hazards, sustainable development and social justice.

**Ding Hao** Cornelius, Wanda, This history book celebrates a near-forgotten band of gallant American airmen, led by Claire Lee Chennault, who served in the midst of a strange land at a time of great turmoil. They arrived in China, not as conquerors, but as codefenders, appreciated by the most humble and grateful Chinese who would smile to them and in many cases utter the only mutually recognizable words of communication: 'Ding Hao, ' meaning 'It is good.'

*The End of the Maoist Era: Chinese Politics During the Twilight of the Cultural Revolution, 1972-1976* Frederick C Teiwes,Warren Sun,2014-12-18 This book launches an ambitious reexamination of the elite politics behind one of the most remarkable transformations in the late twentieth century. As the first part of a new interpretation of the evolution of Chinese politics during the years 1972-82, it provides a detailed study of the end of the Maoist era, demonstrating Mao's continuing dominance even as his ability to control events ebbed away. The tensions within the gang of four, the different treatment of Zhou Enlai and Deng Xiaoping, and the largely unexamined role of younger radicals are analyzed to reveal a view of the dynamic of elite politics that is at odds with accepted scholarship. The authors draw upon newly available documentary sources and extensive interviews with Chinese participants and historians to develop their challenging interpretation of one of the most poorly understood periods in the history of the People's Republic of China.
