*Lockheed F-104 Starfighter* OFONQ,2022-03-04 Die Lockheed F-104 Starfighter ist ein einmotoriges Überschall-Abfangflugzeug, das während des Kalten Krieges häufig als Jagdbomber eingesetzt wurde. Er wurde von Lockheed als Tagjäger im Rahmen der Century Series von Kampfflugzeugen für die United States Air Force (USAF) entwickelt. In den frühen 1960er Jahren wurde er zu einem Allwetter-Mehrzweckflugzeug weiterentwickelt und von mehreren anderen Nationen produziert, so dass er auch außerhalb der Vereinigten Staaten weit verbreitet eingesetzt wurde.

*Lockheed F-104 Starfighter - Warbirdtech* Jim Upton,2003-09 The F-104 Starfighter was one of the most successful and prolific jet fighters of the late '50s and early '60s - and one of the most beautiful. It was the first production Mach 2 aircraft, and it rewrote the performance books for speed, altitude and time to climb. Aircraft enthusiasts called it the missile with a man in it. After its initial flight in 1954, the F-104 program produced more than 2,500 aircraft, making it one of the largest military aircraft programs ever. F-104s flew for the US and many NATO allies, and were eventually produced under license in Canada, Japan, and several European countries. In fact, Italy is still flying updated F-104s in 2003. This book covers this revolutionary aircraft's design and development, its weapons and other systems, and all 18 models of the F-104, complete with photos of each variant. NASA-modified research craft are also discussed, along with several formerly classified programs based on the F-104. Author Jim Upton was one of the F-104 program's flight test engineers, so he knows the aircraft and the people involved. Includes a foreword by Dick Heppe, retired president of Lockheed California, and chief aerodynamicist of the F-104.

*F-104 STARFIGHTER PILOTS FLIGH* United States Air Force,NASA,2011-01 Created by famed Lockheed designer Kelly Johnson, the F-104 Starfighter was designed to compete with Soviet Mig-15s. Equipped with a huge and powerful J79 engine, the aircraft could reach speeds well in excess of Mach 2.0, while its thin, trapezoidal wing provided extremely low drag with terrific acceleration and rate of climb. Unforgiving and sensitive to control inputs, the F-104 killed many pilots and developed a reputation as a widow-maker. Despite its shortcomings, the Starfighter enjoyed a long career. It flew in the air support role during Rolling Thunder in the Vietnam War. It also saw

extensive service in foreign air forces and NATO. NASA continued to use the F-104 as a support aircraft until 1995. This pilot's flight operating handbook was originally produced by the USAF. It has been slightly reformatted but is reproduced here in its entirety. It provides a fascinating view inside the cockpit of one of history's great planes.

**Lockheed F-104 Starfighter** Sebastian Piechowiak,2022-09-30 The Lockheed F-104 was one of the most popular supersonic aircraft in history, although it did not gain recognition in its home country, the United States. Nevertheless, it was used and modernized in fifteen countries around the world. It was the first combat plane to exceed the speed of two Machs, and the first to use the six-barrel M61 Vulcan cannon for combat.The Korean War showed that the US Air Force did not have much advantage in the air over machines from the USSR, especially when it comes to fighter aviation. The Soviet MiG-15 was certainly not inferior to the F-86. In addition, there was mass production in the USSR, where state budget constraints were not taken into account. In this situation, it was necessary to gain a qualitative advantage and a huge one at that. It was supposed to be given by the F-104 fighter.It was a relatively simple plane with a long fuselage and short and thin wings. The plane was supposed to be as fast as possible to use the combat method: chase, hit, run. The attack was to be carried out with the use of missiles.In 1953, Lockheed received a contract to build prototypes, and three years later - on April 2, 1956 - pilot Joe Ozier, flying YF-104A (serial No. 55-2955), achieved twice the speed of sound.

**F-104 Starfighter Units in Combat** Peter E. Davies,2014-11-20 This title covers the technical characteristics of the F-104 Starfighter, one of the most widely-used and popular aircraft in history. Although built in small numbers for the USAF, the F-104C fought and survived for almost three years in Vietnam. There, it was engaged in some of the war's most famous battles including the legendary operation Bolo, where seven North Vietnamese MiGs were destroyed without the loss of a single US fighter. This small, tough and very fast fighter, dubbed 'The Missile with a Man in It', was called upon to do things it was not specifically designed for, and did them admirably. Featuring illustrations and photographs detailing the variety of nose-paint schemes and weapons configurations, this comprehensive appraisal of the F-104 Starfighter is ideal for modelling and aviation enthusiasts alike.

**MACH 2** Rolf Stünkel,2021-04-16 Lockheed's F-104G, a brand-new sleek jet design of the early 1950s, was a dream bird with a flying performance well beyond imagination. Despite its widow maker reputation in Germany during the early years of operation, the F-104 gained cult status and pilots became addicted to flying it. In his book, Rolf Stünkel takes us back to his training days and cold-war flights over the Baltic sea and along the East German border - a gripping, thought-provoking journey through time, not without a self-critical look at the past and present.

**F-104 Starfighter** David Doyle,2024-02-28 An illustrated guide to the F-104 Starfighter, a high-speed interceptor sometimes referred to as the widowmaker

**F-104 Starfighter** David Doyle,2016 The Lockheed F-104 Starfighter first flew in 1954, then broke the world altitude record in May 1958 and the world air-speed record nine days later. It was the first aircraft to hold both records simultaneously. Many of the Starfighter's records stand today. With a powerful XJ79 engine and futuristic design by famed Lockheed engineer Clarence Kelly Johnson and his team, a YF-104A passed Mach 2 in 1956. The F-104 was born from combat against Communist MiG-15 jet aircraft during the Korean War. Known as a missile with a man in it and an engine with wings, Starfighters trained astronauts such as Chuck Yeager on the edge of space, fought over Vietnam, and were lethal Cold War interceptors capable of firing air-to-air nuclear missiles. During its 50-year career, it was used by no less than 15 nations from Jordan to Taiwan; Italy finally retired its fleet in 2005. It is poised to be reborn as a civilian satellite launcher in 2018.
