Bayesian Evolutionary Analysis with BEAST Alexei J. Drummond, Remco R. Bouckaert, 2015-08-06
What are the models used in phylogenetic analysis and what exactly is involved in Bayesian evolutionary analysis using Markov chain Monte Carlo (MCMC) methods? How

can you choose and apply these models, which parameterisations and priors make sense, and how can you diagnose Bayesian MCMC when things go wrong? These are just a few of the questions answered in this comprehensive overview of Bayesian approaches to phylogenetics. This practical guide: • Addresses the theoretical aspects of the field • Advises on how to prepare and perform phylogenetic analysis • Helps with interpreting analyses and visualisation of phylogenies • Describes the software architecture • Helps developing BEAST 2.2 extensions to allow these models to be extended further. With an accompanying website providing example files and tutorials (<http://beast2.org/>), this one-stop reference to applying the latest phylogenetic models in BEAST 2 will provide essential guidance for all users – from those using phylogenetic tools, to computational biologists and Bayesian statisticians.

Essentials of Mathematica Nino Boccara, 2007-10-17 This book teaches how to use Mathematica to solve a wide variety of problems in mathematics and physics. It is based on the lecture notes of a course taught at the University of Illinois at Chicago to advanced undergrad and graduate students. The book is illustrated with many detailed examples that require the student to construct meticulous, step-by-step, easy to read Mathematica programs. The first part, in which the reader learns how to use a variety of Mathematica commands, contains examples, not long explanations; the second part contains attractive applications.

Making News at The New York Times Nikki Usher, 2014-04-24 Making News at The New York Times is the first in-depth portrait of the nation's, if not the world's, premier newspaper in the digital age. It presents a lively chronicle of months spent in the newsroom observing daily conversations, meetings, and journalists at work. We see Page One meetings, articles developed for online and print from start to finish, the creation of ambitious multimedia projects, and the ethical dilemmas posed

by social media in the newsroom. Here, the reality of creating news in a 24/7 instant information environment clashes with the storied history of print journalism, and the tensions present a dramatic portrait of news in the online world. This news ethnography brings to bear the overarching value clashes at play in a digital news world. The book argues that emergent news values are reordering the fundamental processes of news production. Immediacy, interactivity, and participation now play a role unlike any time before, creating clashes between old and new. These values emerge from the social practices, pressures, and norms at play inside the newsroom as journalists attempt to negotiate the new demands of their work. Immediacy forces journalists to work in a constant deadline environment, an ASAP world, but one where the vaunted traditions of yesterday's news still appear in the next day's print paper. Interactivity, inspired by the new user-computer directed capacities online and the immersive Web environment, brings new kinds of specialists into the newsroom, but exacts new demands upon the already taxed workflow of traditional journalists. And at time where social media presents the opportunity for new kinds of engagement between the audience and media, business executives hope for branding opportunities while journalists fail to truly interact with their readers.

The Playful Citizen René Glas, Sybille Lammes, Michiel de Lange, Joost Raessens, Imar de Vries, 2019 This edited volume collects current research by academics and practitioners on playful citizen participation through digital media technologies.

Quality TV Janet McCabe, Kim Akass, 2007-09-26 In his seminal book *Television's Second Golden Age*, Robert Thompson described quality TV as 'best defined by what it is not': 'it is not regular TV'. Audacious maybe, but his statement renewed debate on the meaning of this highly contentious term. Dealing primarily with the post-1996 era shaped by digital technologies and defined by consumer

choice and brand marketing, this book brings together leading scholars, established journalists and experienced broadcasters working in the field of contemporary television to debate what we currently mean by quality TV. They go deep into contemporary American television fictions, from *The Sopranos* and *The West Wing*, to *CSI* and *Lost* - innovative, sometimes controversial, always compelling dramas, which one scholar has described as 'now better than the movies!' But how do we understand the emergence of these kinds of fiction? Are they genuinely new? What does quality TV have to tell us about the state of today's television market? And is this a new Golden Age of quality TV? Original, often polemic, each chapter proposes new ways of thinking about and defining quality TV. There is a foreword from Robert Thompson, and heated dialogue between British and US television critics. Also included - and a great coup - are interviews with W. Snuffy Walden (scored *The West Wing* among others) and with David Chase (*The Sopranos* creator). Quality TV provides throughout groundbreaking and innovative theoretical and critical approaches to studying television and for understanding the current - and future - TV landscape.

Figuring Madness in Nineteenth-Century Fiction C. Wiesenthal, 1997-08-29 How are signs and symptoms of psychic alienation variously enfigured in literary texts? And how do readers invariably figure in some form of the 'madness' they attempt to figure out? These are some of the questions addressed by *Figuring Madness*, a study which employs the insights of current post-structuralist psychoanalysis and semiotic theory to examine the complex interimplication of the subject and object of madness that is always implied by the dynamics of analytic diagnosis. In its focus on the implications of writing and reading signs of madness, the study offers new interpretations of both canonical and non-canonical texts by authors spanning the period from Jane Austen and Anthony Trollope to Charlotte Perkins Gilman and Henry James.

Making Sense of Change Management Esther Cameron, Mike Green, 2015-03-03 The definitive, bestselling text in the field of change management, *Making Sense of Change Management* provides a thorough overview of the subject for both students and professionals. Along with explaining the theory of change management, it comprehensively covers the models, tools, and techniques of successful change management so organizations can adapt to tough market conditions and succeed by changing their strategies, structures, boundaries, mindsets, leadership behaviours and of course their expectations of the people who work within them. This completely revised and updated 4th edition of *Making Sense of Change Management* includes more international examples and case studies, emerging new thinking and practice in the area of cultural change and a new chapter on the interrelationship with project management (PM) and change management. It also covers complexity models, agile approaches, and stakeholder management along with cultural sensitivity and what to do when cultures collide. *Making Sense of Change Management* remains essential reading for anyone who is currently part of, or leading, a change initiative. Online supporting resources include lecture slides, making this an ideal textbook for MBA or graduate students focusing on leading or managing change.

The Existence Or Non-existence of Race? Conrad B. Quintyn, 2010 In this book, Conrad Quintyn details the two intransigent sides of the race issue in biological anthropology and human biology in order to propose a common-sense compromise. This compromise is interesting because it does not derive from academic armchair philosophy. It takes into account practical issues in the social environment. This book is significant to the field, at this time, because it addresses the following issues, which form the basis for discussing the future of racial classification in America: 1)

There is a high frequency of admixture in U.S. population caused by the steady flow of immigrants over the years, resulting in multiracial populations. Hundreds of thousands of these multiracial Americans are demanding visibility, acceptance and in many cases an identity that is separate from black or white; 2) Officials in federal and state agencies as well as black and Hispanic political activists worry that allowing people to choose more than one race, or eliminating race altogether, would impact civil rights compliance and educational accountability for students by race and ethnicity; distribution of federal aid to minorities; and minority districting in congressional elections. It might also erode black or Hispanic solidarity and confuse law enforcement, since the FBI, state, and local police depend on race for much of their day-to-day work; and 3) Population admixture has increased the difficulty in determining race using the skull, which has implications for human identification in forensic science. Quintyn analyzes several critical arguments posed by both sides and propose a practical compromise which is integral to the future of racial classification in America. First, from the racialists perspective, they ask if there is no such thing as race, what would it look like if it existed? Furthermore, if the premise is accepted that there are no biological races, and there is much compelling evidence presented in the literature, then how is it that a person of European ancestry is easily distinguished from a person of African or Asian ancestry? In this book which brings us closer to answering these questions, Quintyn begins with a history of the race argument, with an emphasis on biological anthropology, to give the reader some critical background information. He gives in chronological order several biological definitions of race before discussing its meaning in contemporary society, and touches on race and medicine. In concluding his study, unlike current books on race, he argues that the academic consensus that there is no such thing as race is ultimately pointless.

Against Flow Braxton Soderman,2021-04-13 A critical discussion of the experience and theory of flow (as conceptualized by Mihaly Csikszentmihalyi) in video games. Flow--as conceptualized by the psychologist Mihaly Csikszentmihalyi--describes an experience of being in the zone, of intense absorption in an activity. It is a central concept in the study of video games, although often applied somewhat uncritically. In *Against Flow*, Braxton Soderman takes a step back and offers a critical assessment of flow's historical, theoretical, political, and ideological contexts in relation to video games. With close readings of games that implement and represent flow, Soderman not only evaluates the concept of flow in terms of video games but also presents a general critique of flow and its sibling, play.

Twelve Years a Slave Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's

life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe.

Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.
