Digital Competition Law in Europe Marc Wiggers, Robin

Struijlaart, Joost Dibbitts, 2023-07-14 'Digital competition', a term and concept that has risen to the forefront of competition law, may be viewed as both promising and cautionary: on the one hand, it brings the promises of increased speed, efficiency and objectivity, and, on the other, it entails potential pitfalls such as hard-to-identify pathways to unfair pricing, dominant positions and their potential abuse, restriction of choice and abuse of personal data. Accordingly, jurisdictions around the world are taking measures to deal with the phenomenon. In this concise but thoroughly researched book – both informative and practical – lawyers from two prominent firms with specialised digital competition teams take stock and examine the state of digital competition in the enforcement practices of six competition authorities in Europe, most of these forerunners in the field of digital competition policy and enforcement. The competition authorities surveyed are those of the European Union, the United Kingdom, France, Germany, the Netherlands and Belgium. For each, an overview, spanning the period from 2012 to mid-2022 but including as many landmark cases as possible up to and including December 2022, includes not only landmark cases in which digital technologies have had a significant impact on the competition law outcome but also guidance documents such as speeches, policy statements, industry surveys and research reports. Activities and enforcement practices of the various authorities include the following and more: degree of activity; focus of the activity; enforcement styles; enforcement instruments; visible effectiveness of enforcement; and important insights and outlooks. Each overview contains separate chapters on cartel prohibition, the prohibition of abuse of a dominant position and merger control.

Additional chapters – partially written by guest authors (who are all without a doubt true thought leaders: Tristan Byrne, Giuseppe Colangelo, Ai Deng, Teodora Groza, Daniel Mândrescu, Wolf Sauter, Thibault Schrépel, and Gareth Shier) – evaluate the similarities and differences in the enforcement practices and the positive and negative effects of digital competition in the jurisdictions investigated, the economic context, the most important game changers, and a concluding chapter offers recommendations. An indispensable guide to quickly and accessibly acquiring in-depth knowledge of competition law in the digital sector, this matchless volume is a must-read for any practitioner or academic who encounters competition law related to digital markets. The dilemmas and challenges of the new competition law reality – which is here already, like it or not – are clearly explained here for the benefit of regulators, academics, policymakers, judges, in-house counsel and lawyers specialising in competition law and intellectual property law.

Research Handbook on Global Merger Control Ioannis

Kokkoris, Nicholas Levy, 2023-05-09 Over the past 30 years, merger control has become well-established around the world with broad consensus around its ambit and objectives. That consensus has fractured in recent years. Enforcement today is at a critical juncture, facing an array of challenges and calls for reform unprecedented in their scope and intensity. Authored by leading legal practitioners, economists, enforcers and jurists, this timely Research Handbook on Global Merger Control discusses those challenges and predicts how merger control is likely to evolve.

Antitrust in Data Driven Markets & Legal Framework for Influencers, Native Advertising and Control over the Use of AI in Marketing Bruce Kilpatrick, Pierre Kobel, Pranvera Këllezi, 2022-12-07

This book gathers contributions from a broad range of jurisdictions, written by practitioners and academics alike, and offers an unparalleled comparative view of key issues in competition law, intellectual property and unfair competition law, with a specific focus on the use of personal data. The first part focuses on the role of competition law in shaping the digital economy. It discusses the use of personal data, the market power of platforms, the assessment of free services, and more broadly the responsibility of dominant companies in the smooth functioning of the digital economy. In turn, the second part sheds light on how the conduct of influencers, native advertising and the use of AI for marketing purposes can be controlled by the law, focusing on the use of personal data and the impact of behavioral advertising on consumers. In this regard, the book brings together the current legal responses across a number of European and other

countries, all summarized and elaborated on in the form of two international reports. The LIDC is a long-standing international association that focuses on the interface between competition law and intellectual property law, including unfair competition issues.

Investir avec succès dans l'immobilier locatif (maison, appartement, immeuble de rapport, murs de boutiques...) MARIN Ludovic,2020-06-23 Vous voulez vous lancer dans l'investissement immobilier locatif pour vous construire votre liberté financière ou pour obtenir un complément retraite ? Alors cet ouvrage est fait pour vous. Il s'adresse aussi bien aux investisseurs débutants qu'à ceux plus confirmés. Vous allez découvrir comment générer des revenus passifs avec différents biens immobiliers (maison, appartements, immeubles de rapport, murs de boutique...). Ce livre vous propose une méthode d'investissement à suivre, en 4 étapes, qui est accessible à tous. Au fil des chapitres, vous apprendrez toutes les astuces à connaître, les pièges à éviter ou encore l'optimisation de vos investissements grâce à de nombreux exemples concrets. * * * Ludovic MARIN est un chercheur, un investisseur et un entrepreneur français. Acheter dans l'Immobilier Guy Deloeuvre,2018-12-05 Ce livre a pour but d'expliquer les étapes de l'achat d'un bien immobilier (appartement, maison, ...) depuis la définition des besoins, jusqu'à l'entrée dans les lieux, en passant par le financement, les fiches pratiques, les questions à se poser au bon moment. Il peut être tentant de survoler certaines étapes néanmoins une des clés d'un achat immobilier réussi est de ne pas vouloir presser les choses.

L'immobilier demain Robin Rivaton,Vincent Pavanello,2017-09-13 La révolution digitale produit ses effets secteur

après secteur. Après la BioTech, la FoodTech, la MedTech pour la médecine, la FinTech pour la finance ou encore l'EdTech pour l'éducation, la vague de la Real Estech pour l'immobilier est sur le point de déferler. Qu'il soit professionnel de l'immobilier ou particulier, locataire ou propriétaire, aucun citoyen n'échappera à cette mutation. Du fait de son poids économique considérable mais aussi de ses représentations sociales et culturelles fortes (devenir propriétaire est encore perçu comme un objectif d'ascension sociale et d'héritage à transmettre), l'immobilier est régulé par l'Etat. Malgré cette régulation, la conviction forte des auteurs est que l'immobilier, qui semble immobile à l'heure où la technologie révolutionne des secteurs entiers, recèle un immense potentiel d'innovation grâce aux nouvelles technologies de crowdfunding, Building Information Modeling, blockchain, drones, analyse prédictive, objets connectés... Toute la chaîne de valeur du secteur immobilier est concernée et analysée en 4 chapitres : financement, construction, gestion et occupation. A l'image du secteur automobile d'il y a quelques dizaines d'années, passé d'un symbole social fort à une production standardisée puis à une consommation de service, l'immobilier est-il sur le point de devenir un bien comme les autres ?
