Fraternity Among the French Peasantry Alan R. H. Baker, 2004-03-18 The individualism of the French peasantry during the nineteenth century has frequently been asserted as one of its most striking characteristics. In this 1999 book, Alan Baker challenges this orthodox view and demonstrates the extent to which peasants continued with traditional, and developed new, forms of collective action. He examines representations of the peasantry and discusses the discourse of fraternity in nineteenth-century France in general before considering specifically the historical development, geographical diffusion and changing functions of fraternal voluntary associations in Loir-et-Cher between 1815 and 1914. Alan Baker focuses principally upon associations aimed at reducing risk and uncertainty and upon associations intended to provide agricultural protection. A wide range of new voluntary associations were established in Loir-et-Cher - and indeed throughout rural France - during the nineteenth century. Their historical geography throws new light upon the sociability, upon the changing mentalités, of French peasants, and upon the role of fraternal associations in their struggle for survival.

Pope Alexander III And the Council of Tours (1163) Robert Somerville,2018-08-14 From the Preface: The 1163 council at Tours met amidst the most protracted conflict between a pope and a secular ruler in medieval history, the eighteen-year struggle between Alexander III and Frederick Barbarossa. The gathering duly receives a paragraph or so in surveys of that dispute, and it usually is included—and properly so—in lists of the important sources for twelfth- and thirteenth-century canon law. But the meeting has been accorded no integrated study of all its political and legislative facets, nor have all of the sources, even all of those available in print, ever been utilized together. The present work strives to offer in one volume a historical account of the synod at Tours which is as complete as possible. That means uncovering the conciliar events as well as pondering their relation to the great issues of the time, especially Alexander's struggle with Frederick. The aim is to reconstruct, as sources permit, what happened at a council of acknowledged import, and at the same time to examine the interdependence of those events with the historical climate in which the gathering convened. Such reciprocity often has become hazy, but synods do not assemble in a vacuum. Their histories gain greater fascination in proportion to how successfully the events in concilio can be linked to movements and pressures from society at large.
