**WORLDWIDE LOTTERY GAMES In Naturally Optimized Systems: Pick 5** Corneliu Lala,Cornelia Lala,2015-02-18 Worldwide Lottery Games In Naturally Optimized Systems Pick 5 has been developed on the authors' initiative, based on the belief that nothing in the Universe happens by chance because there are laws governing everything, and by increasing our knowledge, we can triumph over mere chance. This is a book for players and/or groups of players (syndicates) who want to play to more than seventy lottery games from at least fifty countries over five continents, as: MEGA MILLIONS (U.S.A., Multi-State), POWERBALL (U.S.A., Multi-State), EUROMILLIONS (Europe, Multi-Country), EUROJACKPOT (Europe, Multi-Country), SUPER LOTTO (China), SIKKIM THUNDERBALL (India), THUNDERBALL (U.K.), LOTO (France) SANS TOPU (Turkey), EL GORDO (Spain), GOSLOTO 5 iz 36 (Russia), MINI LOTO (Japan), QUINA (Brazil) and so on. Worldwide Lottery Games In Naturally Optimized Systems Pick 5 contains 122 systems built with the help of original mathematical models. It is an original book comprising 51 simple variants systems, 38 pivoted variants systems and 33 combined variants systems for which the number of played numbers has values between 9 and 67 inclusive. Each system has its main characteristics, the winnings index and the unfolding on variants. The categories and the winnings will certainly be within the limits of one of the situations specified in the winnings index of the system used. All the playing systems selected in the present book are originally and naturally optimized, because the main parameters of the component combinatorial structures have optimal values. Therefore, 90 playing systems are at a level of absolute performance, which means with a smaller number of combinations, of the same category, it is not possible to get higher winnings indexes. The other 32 playing systems are at the highest level of current performance. More, all the playing systems are highly balanced. Experience in recent years has confirmed the value of the naturally optimized systems included in the book, through the numerous and substantial wins obtained by their help in many countries. Using the naturally optimized systems is a smart strategy for playing the lottery. FIVE ADVANTAGES OF NATURALLY OPTIMIZED SYSTEMS - Harmony with nature They are generated in harmony with nature, as they are based on the principles of balance, symmetry and proportion - fundamental principles of the creation, known everywhere in the world for thousands of years, which ensures their durability and high quality. - Optimum performance They are at a level of absolute performance, or at the highest level of current performance, as the main parameters of their combinatorial structures have optimum values. - Multi-system compatibility They are useful both to players and to groups of players worldwide, for lottery games of 5, 6 and 7 numbers in simple variant. - Guaranteed wins They help the lottery players to obtain guaranteed wins, strictly according to the provisions of the winnings indexes. - Accessibility They are easily accessible, can be understood by any player and their use does not require great effort, the action being made as simple as possible.

The Sequence of the California Super Lotto Plus Volume 3 Jonathan Moreno,2012-05-24 How many of you ever wondered about winning the lottery, and have any of you tried to write all the possible combinations in a note book? I have and succeeded; except, there is one problem. I never won the jackpot. You see, I never had the amount needed to guarantee my chance to win. Let me explain; if I was rich or famous I would use all the numbers written in these volumes and guarantee me or you the jackpot. However, this idea will only be profitable if the jackpot reaches 100 million dollars or more. The California State Lottery began on November 6, 1984, when a majority of California voters passed Proposition 37, the California State Lottery Act of 1984, authorizing the creation of a lottery. The current 47/27 variant began in 2000 under the name Super Lotto Plus. California Super Lotto Plus is played in the style of Mega Millions every Wednesday and Saturday. The minimum jackpot prize is \$7 million dollars. On February 16, 2002, the California Lottery's highest payout of \$193 million was won by three tickets. Super Lotto Plus uses "traditional" drawing mechanisms; the other games use a random number generator. Let me show you how a completed number sequence from lowest to greatest is written and why the odds are wrong on a California Lotto Play Slip. Plus, I'll guarantee that your lucky number(s) are in these Volumes

The Lottery Book Don Catlin,2003 This book should be read by everyone who plays the state-run lotteries. **Mathematics of Keno and Lotteries** Mark Bollman,2018-04-17 Mathematics of Keno and Lotteries is an elementary treatment of the mathematics, primarily probability and simple combinatorics, involved in lotteries and keno. Keno has a long history as a high-advantage, high-payoff casino game, and state lottery games such as Powerball are mathematically similar. MKL also considers such lottery games as passive tickets, daily number drawings, and specialized games offered around the world. In addition, there is a section on financial mathematics that explains the connection between lump-sum lottery prizes (as with Powerball) and their multi-year annuity options. So-called winning systems for keno and lotteries are examined mathematically and their flaws identified.
