**HOW TO PREDICT FUTURE LOTTERY RESULTS** Francis Isaac, 2014-05-23 This book is designed for lottery players around the world. The prediction in this book is based on understanding the behavior and complexity of random systems. Understanding the complexity of random systems is the best tool that we have of predicting future lottery results. The prediction in this book is based on a month-by-month analysis because I believe that knowing that by the end of the month you will definitely win a certain amount of money, but just not knowing how much it is going to be yet, is a wonderful feeling. That is how I feel each month, and I would also like all those who buy this book to have the same feeling every month. First of all, I want to show that it is possible to predict future lottery numbers at whatever combination, be it two or three or four or five or six number combinations. My first book, titled *How to Predict Future Lottery Results*, did present two number combinations. You can see by checking the results page how accurate the prediction from the first book has been. The first book was published on December 18, 2013. All results from 6/49 lotteries around the world after that date have so far verified and validated my predictions on a month-by-month basis. This book presents a three-month snapshot of the matching numbers from eight countries around the world during January, February, and March 2014. These results correspond with the predictions in my first book. I have now decided to publish the combinations for predicting four numbers on a month-by-month basis.

The first and biggest change to the Powerball Lottery is the introduction of the \$40 million base jackpot. Now, when the Powerball Lottery jackpot is reset after a win it will start at \$40 million, tempting even more players in for those early draws. Another promise, that is sure to be popular with lottery players, is the introduction of more prizes. From January, Powerball players will have even better odds of winning a prize worth at least \$1 million, and it's that fact that may soften the third and biggest ever change. From January 15, 2012, Powerball Lottery tickets are doubling in price, in what is the biggest change to the Powerball Lottery draw since its launch in 1994. Ways to win? There are nine ways to win Powerball. The jackpot prize is won by matching five white balls in any order, plus the one red Powerball number for a total of six balls played. However, there are eight additional ways to win by matching fewer numbers to the numbers drawn. When are tickets sold? All sales for Powerball stop at 9:59 p.m. on the drawing days and resume following each drawing. Drawing time: Powerball drawings are at 10:59 p.m. Eastern Time. Powerball drawings are on both Wednesday and Saturday nights. Where can I watch the drawing ? Beginning in October, 2015, Powerball(R) became an even larger combined large jackpot game and cash game. Every Wednesday and Saturday night at 10:59 p.m. Eastern Time, we draw five white balls out of a drum with 69 balls and one red ball out of a drum with 26 red balls. This change means bigger jackpots. It also means that your odds of winning some prize are improved. The jackpot - won by matching all five white balls in any order and the red Powerball - is either an annuitized prize paid out over 29 years (30 payments counting the first immediate payment) or a cash lump sum payment. If you choose the cash, then you get the cash, pay the tax, and can invest what is left over. If you choose the annuity, then we can invest the cash amount pre-tax, less an immediate first payment (more to invest means more earnings). With the annuity, you get an annual payment that is increased by 5% each year to keep up with the cost of living. The second prize - won by matching five white balls in any order - is \$1,000,000 paid in cash (no annuity option). You win by matching at least three white ball numbers. Any time you match the red Powerball, you win a prize. The overall odds of winning a prize in the game are approximately 1 in 25. Players win a prize by matching one of the 9 Ways to Win. Each ticket costs \$2. Draw sales cut off at least 59 minutes before the draw, but a state may cut off sales earlier. Check with your state lottery for your cut-off time.
