The Sequence of the California Super Lotto Plus Volume 3 Jonathan Moreno,2012-05-24 How many of you ever wondered about winning the lottery, and have any of you tried to write all the possible combinations in a note book? I have and succeeded; except, there is one problem. I never won the jackpot. You see, I never had the amount needed to guarantee my chance to win. Let me explain; if I was rich or famous I would use all the numbers written in these volumes and guarantee me or you the jackpot. However, this idea will only be profitable if the jackpot reaches 100 million dollars or more. The California State Lottery began on November 6, 1984, when a majority of California voters passed Proposition 37, the California State Lottery Act of 1984, authorizing the creation of a lottery. The current 47/27 variant began in 2000 under the name Super Lotto Plus. California Super Lotto Plus is played in the style of Mega Millions every Wednesday and Saturday. The minimum jackpot prize is \$7 million dollars. On February 16, 2002, the California Lottery's highest payout of \$193 million was won by three tickets. Super Lotto Plus uses "traditional" drawing mechanisms; the other games use a random number generator. Let me show you how a completed number sequence from lowest to greatest is written and why the odds are wrong on a California Lotto Play Slip. Plus, I'll guarantee that your lucky number(s) are in these Volumes

**Start Winning the Lottery** Noah Canfield,2012-12-17 Not only could you beat the odds and win more with the lottery than you thought possible, but winning doesn't have to be hard or complicated. In fact, it all comes down to some simple math that anyone can do, and I've done all the hard work for you anyway. There is no guarantee of winning, but you can increase your chances and beat the odds, and sooner than later they will turn in your favor. It happens all the time, especially when people follow a good system. Don't let anyone tell you can't or won't win the lottery. They are dead wrong! But don't take my word for it... "Thanks for writing this book, I am winning more now with the lottery than in any time before and it's all thanks to your system. Erin Hasse (Carlton, KS) "I love that Noah's strategy is so simple to follow. But he also backs it up with facts and reasons why it helps bring the odds more in your favor." Linda Harris (Rochelle Park, NJ)

Move into a mansion with ten exotic sports cars? Help your friends and family out of debt? Buy a yacht and live on the ocean? All of the above? We all dream of freeing ourselves from the chains of society. Life is short - why should we spend it working at a place we rather not work at, living paycheck to paycheck always worrying about paying the bills each week? Many people view the lottery as a way out of this lifestyle. Every week people become multi-millionaires overnight through the national and state lotteries. The OMG I Won! The Mega Millions book provides an interesting and unique look into America's favorite lottery through the use of statistical analyses. **Mr. Lotto** Keith Flash,2012-10-01 The contents of this book detail my Lottery System which is a Full Proof System for selecting the Winning Numbers when playing the Mega Millions Lottery. I have traced and calibrated the entire Mega Millions Lottery Games and all of the drawings since its inception back in May of 2002. My book features detailed spreadsheets that contain the methods of how and why my system works. Of the 230 some pages, there is only about 70 pages (if combined for text only), the remainder are of graphics that show how the system works. Throughout the course of my research, I have created a system that has detected the following: In 2005, my system correctly selected the winning numbers with the Mega Ball (MB) 16 times and 25 times without the MB. In 2006, the system selected the winning numbers with the MB 17 times and also hit 17 times without the MB. In 2007, 19 times with the MB and 18 times without the MB. In 2008, it selected the winning numbers 21 times with the MB and 26 times without the MB. In 2009, it selected the winning numbers 20 times with the MB and 19 times without the MB. In 2010, it selected the winning numbers 27 times with the MB and 17 times without the MB. In 2011, it selected the winning numbers 18 times with the MB and 20 times without the MB. Currently, to date in 2012, my floating system-select process has picked the winning numbers 12 times with the MB and 14 times without the MB. It is important to note that for the instances where the MB was not detected, the payout is \$250,000.00 (before taxes, needless to say). My system has no need for Wheeling - Statistics - Combinatorics - Boolean - Logic or even Binary Adaptive Configurations. This simple Mathematical system is the system that will not only blow your mind at how simple it is, but will astound you at how it works. -Color Print Interior-
