*2000 Tunes* Karl Drinkwater, 2020-03-20 Mark Hopton is twenty-four, single, and obsessed with Manchester music. It's his escape into a better world. Oh man, he needs that escape. His psycho brother's on his case and in his face, his dad's in prison, and the local gangsters are twisting his melons to make him smuggle drugs. Heaven knows he's miserable now. His one true shining ray of hope is Samantha Rees, a gorgeous and chaotic

Welsh woman who rocks his world. She is the only good thing about his dead-end job. However, Samantha is popular, living the 24 hour party people lifestyle, so Mark assumes she'd never be interested in a shy outsider like him. But after a chance encounter leads to Mark and Samantha spending the day together in the city centre - such a perfect day - perhaps hope isn't fool's gold after all?

**Cold Fusion 2000** Karl Drinkwater, 2017-08-15 Can Love Defeat The Laws Of Physics? Alex Kavanagh is a pedantic physics geek - a teacher who hates teaching, a lover who's always getting dumped, a writer whose articles all get rejected, a 28-year-old still living at home and bullied at the bus stop by teenagers - and he's just had the worst day of his life. Things can only get better, right? Enter his ex, Lucy, in what seems to be a chance meeting. Her betrayal marked the point when his life went nuclear. But - holy protons! - he still loves her. Two problems. First, she isn't who he thinks she is. Second, she's going to leave him forever in 72 hours. *Cold Fusion 2000* is a haunting novel about a man who's too rational to believe in ghosts and too short-sighted to see what was in front of him all along.

**Distribution Ecology** Marcelo Hernán Cassini, 2013-03-02 This book brings together a set of approaches to the study of individual-species ecology based on the analysis of spatial

variations of abundance. Distribution ecology assumes that ecological phenomena can be understood when analyzing the extrinsic (environmental) or intrinsic (physiological constraints, population mechanisms) that correlate with this spatial variation. Ecological processes depend on geographical scales, so their analysis requires following environmental heterogeneity. At small scales, the effects of biotic factors of ecosystems are strong, while at large scales, abiotic factors such as climate, govern ecological functioning. Responses of organisms also depend on scales: at small scales, adaptations dominate, i.e. the ability of organisms to respond adaptively using habitat decision rules that maximize their fitness; at large scales, limiting traits dominate, i.e., tolerance ranges to environmental conditions.□

*Public Service Media and Public Service Internet Manifesto* Klaus Unterberger, 2021 This book presents the collectively authored Public Service Media and Public Service Internet Manifesto and accompanying materials. The Internet and the media landscape are broken. The dominant commercial Internet platforms endanger democracy. They have created a communications landscape overwhelmed by surveillance, advertising, fake news, hate speech, conspiracy theories, and algorithmic politics. Commercial Internet platforms have harmed citizens, users, everyday life, and society. Democracy and digital democracy require Public Service Media. A democracy-enhancing Internet requires Public Service Media becoming Public Service Internet platforms – an Internet of the

public, by the public, and for the public; an Internet that advances instead of threatens democracy and the public sphere. The Public Service Internet is based on Internet platforms operated by a variety of Public Service Media, taking the public service remit into the digital age. The Public Service Internet provides opportunities for public debate, participation, and the advancement of social cohesion. Accompanying the Manifesto are materials that informed its creation: Christian Fuchs' report of the results of the Public Service Media/Internet Survey, the written version of Graham Murdock's online talk on public service media today, and a summary of an ecomitee.com discussion of the Manifesto's foundations.

Piety in Pieces Kathryn M. Rudy, 2016-09-26

Medieval manuscripts resisted obsolescence. Made by highly specialised craftspeople (scribes, illuminators, book binders) with labour-intensive processes using exclusive and sometimes exotic materials (parchment made from dozens or hundreds

of skins, inks and paints made from prized minerals, animals and plants), books were expensive and built to last. They usually outlived their owners. Rather than discard them when they were superseded, book owners found ways to update, amend and upcycle books or book parts. These activities accelerated in the fifteenth century. Most manuscripts made before 1390 were bespoke and made for a particular client, but those made after 1390 (especially books of hours) were increasingly made for an open market, in which the producer was not in direct contact with the buyer. Increased efficiency led to more generic products, which owners were motivated to personalise. It also led to more blank parchment in the book, for example, the backs of inserted miniatures and the blank ends of textual components. Book buyers of the late fourteenth and throughout the fifteenth century still held onto the old connotations of manuscripts—that they were custom-made luxury items—even when the production had become impersonal. Owners consequently purchased books made for an open market and then personalised them, filling in the blank spaces, and even adding more components later. This would give them an affordable product, but one that still smacked of luxury and met their individual needs. They kept older books in circulation by amending them, attached items to generic books to make them more relevant and valuable, and added new prayers with escalating indulgences as the culture of salvation shifted. Rudy considers ways in which book owners adjusted the contents of their books from the simplest (add a marginal note, sew in a curtain)

to the most complex (take the book apart, embellish the components with painted decoration, add more quires of parchment). By making sometimes extreme adjustments, book owners kept their books fashionable and emotionally relevant. This study explores the intersection of codicology and human desire. Rudy shows how increased modularisation of book making led to more standardisation but also to more opportunities for personalisation. She asks: What properties did parchment manuscripts have that printed books lacked? What are the interrelationships among technology, efficiency, skill loss and standardisation?

The Art & Science of Web Design Jeffrey Veen, 2001 The Art & Science of Web Design will help you understand the Web from the inside. It is structured around core Web concepts that often get only a passing mention in books on Web design. This book is not a reference book or a style guide. It is your mentor, whispering in your ear all the answers to those ubiquitous questions, and reminding us that there are now new rules and new ways to break them.

**Empire's Labor** Adam Moore, 2019-11-15 In a dramatic unveiling of the little-known world of contracted military logistics, Adam Moore examines the lives of the global army of laborers who support US overseas wars. Empire's Labor brings us the experience of the hundreds of thousands of men and women who perform jobs such as truck drivers and administrative assistants at bases located in warzones in the Middle East and Africa. He highlights the changes the US military has undergone since the Vietnam War, when the ratio of contractors to uniformed personnel was roughly 1:6. In Afghanistan it has been as high as 4:1. This growth in logistics contracting represents a fundamental change in how the US fights wars, with the military now dependent on a huge pool of contractors recruited from around the world. It also, Moore demonstrates, has social, economic, and political implications that extend well beyond the battlefields. Focusing on workers from the Philippines and Bosnia, two major sources of third country national (TCN) military labor, Moore explains the rise of large-scale logistics outsourcing since the end of the Cold War; describes the networks, infrastructures, and practices that span the spaces through which people, information, and goods circulate; and reveals the experiences of foreign workers, from

the hidden dynamics of labor activism on bases, to the economic and social impacts these jobs have on their families and the communities they hail from. Through his extensive fieldwork and interviews, Moore gives voice to the agency and aspirations of the many thousands of foreigners who labor for the US military. Thanks to generous funding from UCLA and its participation in TOME (Toward an Open Monograph Ecosystem), the ebook editions of this book are available as Open Access volumes from Cornell Open ([cornellopen.org](http://cornellopen.org)) and other repositories.

Edible Identities: Food as Cultural Heritage

Ronda L. Brulotte, Michael A. Di Giovine, 2016-04-29

Food - its cultivation, preparation and communal consumption - has long been considered a form of cultural heritage. A dynamic, living product, food creates social bonds as it simultaneously marks off and maintains cultural difference. In bringing together anthropologists, historians and other scholars of food and heritage, this volume closely examines the ways in which the cultivation, preparation, and consumption of food is used to create identity claims of 'cultural heritage' on local, regional, national and international scales. Contributors explore a range of themes, including how food is used to mark insiders and outsiders within an ethnic group; how the same food's meanings change within a particular society based on class, gender or taste; and how traditions are 'invented' for the revitalization of a community during periods of cultural pressure. Featuring case studies from Europe, Asia and the Americas, this timely volume also addresses the complex processes of classifying, designating, and valorizing food as 'terroir,' 'slow food,' or as intangible cultural heritage through UNESCO. By effectively analyzing food and foodways through the perspectives of critical heritage studies, this collection productively brings two overlapping but frequently separate theoretical frameworks into conversation.
