Equidosimetry F. Br  chignac,G. Desmet,2007-05-22 Considerable experience with radioecological and related ecological research on terrestrial and aquatic ecosystems has been achieved, especially after the Chernobyl accident. The combined effects of the radiation, chemical and biological factors, after a contamination of the environment and during its remediation have shown an interactive complexity that highlights the need for equidosimetrical evaluations of the influence of the various stressors and the need for their ecological normalization. In radioecology and radiation protection, methods of radiation dosimetry are key for dose assessment. It is therefore highly desirable to develop a clear theoretical approach as well as a practical method of equidosimetry that would allow for an ecological normalization of the different stressors in unified uniform units, especially for comparison purposes.

Clement VI Diana Wood,2002 Which of the two sides of Clement prevailed the 'official' or the personal? The book attempts to answer this question by examining his ideas and actions in connection with some of the major issues of the reign: for example, his attempts to solve the problem of the 'usurping' emperor, Louis of Bavaria, through the appointment of Charles of Bohemia (Charles IV); to deal with a crisis in the Hundred Years War between France and England; to check Islamic expansion and to heal the Greek Schism; to curb the oligarchic challenge of those who thought that the papacy should be at Rome rather than at Avignon. Clement was a great orator and the book is based partly on his sermons, many of which are unpublished. It is the only study of an Avignon pope in English.
