LATIN 2012: Theoretical Informatics David

Fernández-Baca, 2012-03-30 This book constitutes the proceedings of the 10th Latin American Symposium on Theoretical Informatics, LATIN 2012, held in Arequipa, Peru, in April 2012. The 55 papers presented in this volume were carefully reviewed and selected from 153 submissions. The papers address a variety of topics in theoretical computer science with a certain focus on algorithms, automata theory and formal languages, coding theory and data compression, algorithmic graph theory and combinatorics, complexity theory, computational algebra, computational biology, computational geometry, computational number theory, cryptography, theoretical aspects of databases and information retrieval, data structures, networks, logic in computer science, machine learning, mathematical programming, parallel and distributed computing, pattern matching, quantum computing and random structures.

**LATIN 2004: Theoretical Informatics** Martin

Farach-Colton, 2004-03-19 This volume contains the proceedings of the Latin American Theoretical Informatics (LATIN) conference that was held in Buenos Aires, Argentina, April 5-8, 2004. The LATIN series of symposia was launched in 1992 to foster interactions between the Latin American community and computer scientists around the world. This was the sixth event in the series, following São Paulo, Brazil (1992), Valparaíso, Chile (1995), Campinas, Brazil (1998), Punta del Este, Uruguay (2000), and Cancun, Mexico (2002). The proceedings of these conferences were also published by Springer-Verlag in the Lecture Notes in Computer Science series: Volumes 583, 911, 1380, 1776, and

2286, respectively. Also, as before, we published a selection of the papers in a special issue of a prestigious journal. We received 178 submissions. Each paper was assigned to four program committee members, and 59 papers were selected. This was 80% more than the previous record for the number of submissions. We feel lucky to have been able to build on the solid foundation provided by the increasingly successful previous LATINs. And we are very grateful for the tireless work of Pablo Martínez López, the Local Arrangements Chair. Finally, we thank Springer-Verlag for publishing these proceedings in its LNCS series.

**Aulus Anser** Andrew Olimpi, 2021-07-16 The barbarians are coming! Aulus is a goose, who lives in ancient Rome on the Capitoline Hill. As one of Juno's sacred geese, his job is to eat his food while the priests carefully observe his actions, looking for good or bad omens. One day when the Gauls arrived to invade Rome, Aulus thinks that he is responsible--he didn't eat his food and therefore has brought bad fortune to the city! Driven by guilt, he wants to help fix the problem he thinks he created. But what can a little goose do to help defend the Romans against the invaders? Based on a famous passage in Livy (5.47) and written for novice level readers of Latin, Aulus Anser uses a limited vocabulary to tell an entertaining and exciting tale.

**Music in Latin America and the Caribbean: An Encyclopedic History** Malena Kuss, 2010-07-05 The music of the peoples of South and Central America,

Mexico, and the Caribbean has never received a comprehensive treatment in English until this multi-volume work. Taking a sociocultural and human-centered approach, *Music in Latin America and the Caribbean* gathers the best scholarship from writers all over the world to cover in depth the musical legacies of indigenous peoples, creoles, African descendants, Iberian colonizers, and other immigrant groups that met and mixed in the New World. Within a history marked by cultural encounters and dislocations, music emerges as the powerful tool that negotiates identities, enacts resistance, performs belief, and challenges received aesthetics. This work, more than two decades in the making, was conceived as part of *The Universe of Music: A History* project, initiated by and developed in cooperation with the International Music Council, with the goals of empowering Latin Americans and Caribbeans to shape their own musical history and emphasizing the role that music plays in human life. The four volumes that constitute this work are structured as parts of a single conception and gather 150 contributions by more than 100 distinguished scholars representing 36 countries. Volume 1, *Performing Beliefs: Indigenous Peoples of South America, Central America, and Mexico*, focuses on the inextricable relationships between worldviews and musical experience in the current practices of indigenous groups. Worldviews are built into, among other things, how music is organized and performed, how musical instruments are constructed and when they are played, choreographic formations, the structure of songs, the assignment of gender to instruments, and ritual patterns. Two CDs with 44 recorded examples illustrate the contributions to this rich volume.

Gonnet, Daniel Panario, 2000-03-23 This book constitutes the refereed proceedings of the 4th International Conference, Latin American Theoretical Informatics, LATIN 2000, held in Punta del Est, Uruguay, in April 2000. The 42 revised papers presented were carefully reviewed and selected from a total of 87 submissions from 26 countries. Also included are abstracts or full papers of several invited talks. The papers are organized in topical sections on random structures and algorithms, complexity, computational number theory and cryptography, algebraic algorithms, computability, automata and formal languages, and logic and programming theory.

**Ovid Recalled** Lancelot Patrick Wilkinson, 1955 This book was first published in 1955, after a lean period for Ovidian studies. In it, L. P.

Wilkinson set out to restore Ovid to his rightful position. Writing for the educated reader as well as for students of the Classics, he examines Ovid's life and work, quoting extensively from Ovid's poetry both in Latin and almost invariably also in his own English verse translation, making the book easily accessible to those with no Latin.--BOOK JACKET.

By 1930, Afro-Cuban music had gained a firm foothold in the city, setting the stage for the mambo, boogaloo, salsa and Latin-jazz scenes that followed. In this collection of profiles and essays, Max Salazar, perhaps the most eminent Latin-music historian in the United States, tells the story of the music and the musicians who made it happen, including Tito Puente, Machito, Tito Rodriguez, Charlie and Eddie Palmieri, Hector Lavoe and many others.
