**The Moon Year** Juliet Bredon,Igor' Mitrofanov,1927 This book is an attempt to unravel some of the puzzles of an old, old civilisation which, save in the case of a small minority, has not changed for centuries-- to describe the everyday beliefs of the Chinese people and the festivals of their Moon Calendar, used as a diary of daily happenings. -- Preface.

**Civil Calendar and Lunar Calendar in Ancient Egypt** Leo Depuydt,1997 This investigation is concerned with ancient Egyptian calendars. Its specific focus is one of the oldest problems of the study of these calendars: the so-called problem of the month names. This work's main purpose is to suggest an explanation for the Brugsch phenomenon. The Brugsch phenomenon is one of the two main aspects of the problem of the month names. The other is the Gardiner phenomenon. No new theory is presented for the Gardiner phenomenon. As a problem, the Brugsch phenomenon is slightly older than the Gardiner Phenomenon. It has occupied center stage in the study of ancient Egyptian calendars since the early days of this endeavor. In 1870, Heinrich Brugsch, the great pioneer in this subject, wrote about the phenomenon, Here we encounter all at once the most curious contradiction. Just recently, Rolf Krauss has described the contradiction as still unsolved. The Brugsch phenomenon concerns the indisputable fact that the last or twelfth month of the Egyptian civil year can be named as if it were the first. Two month names are involved. The first is wp rnpt. Its meaning opener of the year, refers to a beginning. The second month name is mswt r' birth of Re in hieroglyphic Egyptian, Mesore in Aramaic, Greek and Coptic. Both can otherwise also refer to New Year's Day, the quintessential calendrical beginning.

**Living the Lunar Calendar** Wayne Horowitz,John M. Steele,2012 Lunar calendars suffer from an inherent uncertainty in the length of each month and the number of months in the year. Variable atmospheric conditions, weather and the acuity of the eye of an observer mean that the first sighting of the new moon crescent can never be known in advance. Calendars which rely on such observations to define the beginning of a new month therefore suffer from this lack of certainty as to whether a month will begin on a given day or the next. The papers in this volume address the question of how ancient and medieval societies lived with the uncertainties of a lunar calendar. How did lack of foreknowledge of the beginning of the month impact upon administration, the planning of festivals, and historical record keeping? Did societies replace the observation of the new moon crescent with schematic calendars or calendars based upon astronomical calculations and what were the ideological and practical consequences of such a change? The contributors to this volume address these topics from the perspectives of a variety of Ancient Near Eastern, Jewish, Ancient and Medieval European, Asian and American cultures.

**The Moon Year - a Record of Chinese Customs and Festivals** Juliet Bredon,Igor Mitrophanow,2009-07

The Moon Year is a facinating recording the mysterious and somewhat elusive traditions of the Chinese. Juliet Bredon and Igor Mitrophanow trace their way through the intimate life of Chinese religion, superstitions, philosophies, customs, and society. Only after a year's residence in China are the authors able to gather an intimate perspective on this age-old civilization that has withstood the test of time. Bredon and Mitrophanow unravel some of the puzzles that surround this fascinating culture, through detailed description of the everyday beliefs of the Chinese people and the festivals of their 'Moon Calendar, ' used as a diary of daily happenings. As the original printing of this book was in 1927, many of these rites may no longer exist, further emphasizing the importance of Bredon and Mitrophanow's work. Much of the material for The Moon Year was gathered first-hand from people they met along their journey, as well as from rare Chinese books and texts, resulting in a refreshingly honest exploration of a great civilization.

The Lunisolar Calendar: A Sociology of Japanese Time Jessica Kennett Cork, 2011-06-25 This study shall explore the social and political significance of the so-called *kyureki*, the Japanese lunisolar calendar that was abolished by the Meiji government in 1872. This calendar was the principal method of timekeeping in Japan from 604 to 1872, but has received little attention from English speaking scholars. This study argues that the study of the lunisolar calendar is essential to gaining a comprehensive understanding of pre-Meiji society and political history. Chapter 1 uses a detailed analysis of an actual lunisolar calendar coupled with passages from pre-Meiji historical and literary texts to show that the lunisolar calendar reflects the value pre-Meiji society placed on minute seasonal changes, the phases of the moon, and divination controlled by various directional deities. It shall also demonstrate how an understanding of the lunisolar calendar is vital to fully comprehend classical Japanese texts. Chapter 2 explores how calendar reform has been enacted throughout Japanese history to promote the values of new political regimes. Chapter 3 discusses the state of the lunisolar calendar in modern Japan, first analyzing how the calendar survived the Meiji government's attempt to obliterate it and the effect the Meiji calendar reform had on how the lunisolar calendar is understood today. It then discusses how the current revival of interest in the lunisolar calendar reflects the value modern society places on nostalgia for the past, which has arisen as part of the modernization process.
