Abode of chaos ,2010

Stick Together Sophie Henaff,2019-04-02 Officer Anne Capestan and her squad of misfits must turn their attention to a more personal case--the murder of Capestan's ex-husband's father, a lifelong member of the Paris police force who had no shortage of enemies. After their successful solving of three cold cases and exposing corruption at the very highest levels of the Paris police force, Officer Anne Capestan's team of oddballs and no-hopers should be in a celebratory mood. However, now despised by their colleagues at 36, quai des Orfèvres and worried for their future, morale has never been lower among the members of the Awkward Squad. Capestan is doing her best to motivate the team, but even she cannot maintain a cheerful facade when she has been assigned to investigate the murder of Officer Serge Rufus, the father of her ex-husband. Worse, it soon appears that his murder is linked to two other victims, both of whom were warned by the killer before they struck. Can Capestan marshal the forces to solve another hopeless mystery, or will her team's previous success be proven just a fluke?

Urban heritage in times of uncertainty Dimitra Babalis, 2019-12-30 How should designers respond to urban uncertainty? How can we ensure our urban heritage is protected against urban risks and climate change? How can we create places that increase urban quality, socialisation, equity and opportunities for change minimising environmental damages? This volume addresses current trends and challenges, that explore on how we transform our urban heritage in ways which increase urban resilience embracing innovation and technology. Part one provides a critical view in driving forward a new conception of urban transformation that should respond to current concerns around economic, social and urban change. Part two underscores the importance of the current perception of urban and architectural design that can take into consideration climate change.

Nature City Babalis, Dimitra, 2022-12-30 This volume is the expression of seven-year scientific findings built within the INTEGRO UAD International Meetings convened at the University of Florence while the development of the collection of chapters reflects interpretations of the most pressing issues and necessary perspectives required to frame changes in planning and design. In putting together this collection, it is aimed to better understand questions, prospects, reflections and rules on improving urban strategies and tactics in balancing the needs of nature and the built form to deliver a place. Discussions, debates, and stated considerations can now inspire to give a formal and comprehensive international attention to the transformation of urban heritage including ecological and sustainable design knowledge.

Modern French Drama 1940-1980 David Bradby, 1984-09-06 In the years since 1940, French theatre has been transformed both institutionally and artistically. This book compares all the major traditions and tendencies at work in French theatre since the outbreak of the Second World War, not only in Paris, but also in the Centres Dramatiques and Maisons de la Culture. Previous books have stopped short at the end of the fifties when the influence of Artaud was strong and the Absurd Theatre had become the new orthodoxy. David Bradby reassesses Beckett, Ionesco, Adamov and Genet and challenges the notion that the sixties and seventies were a period of decline in French theatre. The book proceeds chronologically, offering a critical survey of the principal directors, actors and companies as well as of the playwrights, who are its major concern. Important productions are illustrated with black and white photographs. The political background is explained and all quotations are in English.
