Vietnam Studies Col Francis J. Kelly, 2016-12-10 As long ago as 1957, U.S. Army Special Forces soldiers were in the Republic of Vietnam, going about their business of training, advising, and assisting members of the Vietnamese Army. Despite the old Army witticism about never volunteering for anything, the Special Forces soldier is, in fact, a double volunteer, having first volunteered for airborne training and then again for Special Forces training. From a very meager beginning but sustained by a strong motivation and confidence in his mission, the Special Forces soldier has marched through the Vietnam struggle in superb fashion. In 1957 some fifty-eight Vietnamese soldiers were given military training by Special Forces troops. Ten years later the Special Forces were advising and assisting over 40,000 paramilitary troops, along with another 40,000 Regional Forces and Popular Forces soldiers. This monograph traces the development and notes the progress, problems, successes, and failures of a unique program undertaken by the U.S. Army for the first time in its history. It is hoped that all the significant lessons learned have been recorded and the many pitfalls of such a program uncovered. I am responsible for the conclusions reached, yet my thought processes could not escape the influence of the many outstanding officers and men in the Special Forces who joined in the struggle. Particularly, I must take note of the contributions of the Special Forces noncommissioned officers, without question the most competent soldiers in the world. With the withdrawal of the Special Forces from Vietnam in 1971, the Army could honestly lay claim to a new dimension in ground warfare—the organized employment of a paramilitary force in sustained combat against a determined enemy. I know I speak for my predecessors and successors in claiming that the 5th Special Forces Group (Airborne) was the finest collection of professional soldiers ever assembled by the U.S. Army, anywhere, anytime. Francis John Kelly Colonel, Armor 1972

The Voynich Manuscript M. E. D'Imperio, 1978 In spite of all the papers that others have written about the manuscript, there is no complete survey of all the approaches, ideas, background information and analytic studies that have accumulated over the nearly fifty-five years since the manuscript was discovered by Wilfrid M. Voynich in 1912. This report pulls together all the information the author could obtain from all the sources she has examined, and to present it in an orderly fashion. The resulting survey will provide a firm basis upon which other students may build their work, whether they seek to decipher the text or simply to learn more about the problem.

Sociological Paradigms and Organisational Analysis Gibson Burrell, Gareth Morgan, 2017-03-02 The authors argue in this book that social theory can usefully be conceived in terms of four broad paradigms, based upon different sets of meta-theoretical assumptions with regard to the nature of social science and the nature of society. The four paradigms - Functionalism, Interpretive, Radical Humanist and Radical Structuralist - derive from quite distinct intellectual traditions, and present four mutually exclusive views of the social work. Each stands in its own right, and generates its own distinctive approach to the analysis of social life. The authors provide extensive reviews of the four paradigms, tracing the evolution and inter-relationships between the various sociological schools of thought within each. They then proceed to relate theories of organisation to this wider background. This book covers a great range of intellectual territory. It makes a number of important contributions to our understanding of sociology and organisational analysis, and will prove an invaluable guide to theorists, researchers and students in a variety of social

science disciplines. It stands as a discourse in social theory, drawing upon the general area of organisation studies - industrial sociology, organisation theory, organisational psychology, and industrial relations - as a means of illustrating more general sociological themes. In addition to reviewing and evaluating existing work, it provides a framework for appraising future developments in the area of organisational analysis, and suggests the form which some of these developments are likely to take.

United States Army in the World War, 1917-1919: Military operations of the American Expeditionary Forces,1990 A seventeen-volume compilation of selected AEF records gathered by Army historians during the interwar years. This collection in no way represents an exhaustive record of the Army's months in France, but it is certainly worthy of serious consideration and thoughtful review by students of military history and strategy and will serve as a useful jumping off point for any earnest scholarship on the war. --from Foreword by William A Stofft.

Dead Or Alive Mark Fairnington,George McGavin,Mark Gisbourne,2002 Dead or Alive features a unique body of work by the artist Mark Fairnington, whose recent painterly preoccupations - the pseudo-scientific documentation of hitherto unknown species of South American insects - address issues of verisimilitude, taxonomy, representation and meaning in art. Mark Gisbourne's contribution to the book places Fairnington's work within a postmodern art historical context where art and science, while informing one another, nevertheless remain distinctive disciplines. George McGavin, one of the world's most respected authorities on insect life has written an account of Fairnington and his experiences in the field, in search of new, uncategorised species of insect life. 50 colour illustrations
