Rafael Moneo Rafael Moneo, 2010-09-07 Rafael Moneo is a courageous architect, one who for decades has defined his own style of architecture. With a sensitivity to materials and context unmatched by any living architect, Moneo has created a series of important works, including the Audrey Jones Beck Building at the Museum of Fine Arts in Houston, Our Lady of the Angels Cathedral in Los Angeles, and, perhaps most notably, the extension to the Prado Museum in Madrid. A teacher and critic, Moneo now turns his analytical eye to his own work. Twenty-one carefully selected projects are presented in detail, from the initial idea and through construction to the completed work and illustrated by a spectacular suite of new color images by architectural photographer Michael Moran. These are combined with Moneo's own drawings as well as informal documentary material from the design of each of the projects.

Art Direction Explained, At Last! Steven Heller, 2009-09-16
This book is a highly informative, highly entertaining introduction to what art direction is and what art directors do. Written by two

of the world's leading experts on the subject, it covers the role of art director in numerous environments, including magazines and newspapers, advertising, corporate identity, museums, and publishing. It also provides an insight into what makes a successful art director, what an art director actually does all day, what makes things go right, and what makes things go wrong. Alongside perspectives on typography, illustration, and photography, there are case studies of successful art direction in different spheres, from McSweeney's to Vier5's web design. The authors have also invited pre-eminent international art directors to interpret their roles in special sections of the book that they have art directed themselves. The result is an impressive, enlightening, and often very funny diversity of perspectives and approaches. Clearly written, including a glossary of handy art director sayings, an art director test, and more, *Art Direction Explained, At Last!* will provide students with insights into the world of art direction and professionals with a perceptive overview of their profession.

Animation in Process Andrew Selby,2009-07-29 From Hollywood blockbuster to striving independent filmmaker, from mobile phone games to characters advertising products on television, from pseudo live action through to virtual environments, animation is able to transcend boundaries to new audiences. This book shows how artists, designers, filmmakers, programmers, directors, writers, and producers have seized the chance to entertain using a versatile and compelling medium. *Animation in Process* is not only a creative showcase exposing the best talent in the field today, but an in-depth exploration of working methods and processes behind the highly polished features they create, with previously unseen material such as sketches, working drawings, storyboards, and other work-in-progress that documents the animators' craft.

Motion Blur Matt Hanson,Shane Walter,2004-07-06 Moving-image production is no longer restricted to filmmakers with privileged access to equipment, skills and budgets. Desktop digital filmmaking has given graphic designers, illustrators and new media artists the means to create moving image, giving rise to a new wave of cutting-edge work. onedotzero examines the new generation of moving-image makers who are currently pushing the boundaries of motion graphics, broadcast design, digital film effects and animation. With a strong focus on graphic design and digitally-manipulated film, the book profiles and investigates the work of 28 cross-media artists from around the world. These filmmakers are revolutionizing digital moving image,

working in a myriad of forms including short films, music videos, animation, new media and illustration. As well as screen grabs, the book uses interviews, photography, storyboards and sketches to explore the work and reveal the creative processes

Playful Type Robert Klanten, Hendrik Hellige, 2009 Graphic designers are approaching type design in a refreshingly new manner and creating typography beyond the classical typeset. Playful Type demonstrates how these designers are creating a dynamic range of playful, illustrative and hand-made typography with the aide of a multitude of different techniques. From manual lettering, calligraphy and collage to manipulative time exposures of photographs and even ice blocks, the cutting-edge examples collected in this inspiring book indicate current developments in type design.

Stereographics Viction:workshop, 2008 As the digital medium has been infinitely explored in the graphic environment we have seen a return to the analogue, the crafty, and the real world manifestation and creation of visual ideas. One of the truly inspired methods within this setting is the creation of graphics within a sculptural or 3D environment. Now logos are no longer flat but reflect a physical presence, typeface is now carved and sculpted. The edge has again been blurred between the real, the physical and the imagined. Stereo Graphics explores the application of prop building towards the creation of inspired graphics, and especially fresh new font design, by showing hundreds of successful projects based on model creation. Promotional flyers, brochures, in-store graphics as well as textiles and clothing reflect this brave new world of boundless design.
