**Changing Education** Peter D. Hershock, Mark Mason, John N. Hawkins, 2007-12-20 Most current educational systems and programs are proving inadequate at meeting the demand of fast changing societies since they have hardly evolved and developed with the times. This book offers insights into the consequences of globalization for the leadership of educational change. Its focus is not on doing things better, but on doing better things; not on doing things right, but on doing the right things to prepare students for a fast changing, interdependent world.

**Learning with e's** Steve Wheeler, 2015-01-16 In an age where young people seem to have a natural affinity with smartphones, computer games and social media, teachers and lecturers face a big challenge - or a golden opportunity. How can new technology promote learning, engage students and motivate them to sustain a lifelong career in learning? For educators everywhere, our challenge is to take devices that have the potential for great distraction and boldly appropriate them as tools that can inspire and engage. On the back of Steve's hugely popular blog, also named 'Learning with e's', he shows how the world of learning is changing, and how new technology - and you and I - can make a difference. The proliferation of digital technologies and cultures is having a profound impact on learning, prompting questions which need answers. How will technology change our conceptions of learning? How will new ways of learning impact upon our uses of technology? How will teachers and lecturers' roles change; what will they need to know; and what will we see learners doing in the future? Grounded in his research and in pedagogical theory, Steve explores the practical ways in which technology is influencing how we learn, and looks toward emerging trends to examine what the future of learning may look like. Subjects covered include: learning with technology, theories for the digital age, digital literacies, pedagogical theories and practices, new and emerging technologies, new learning architectures, changing education, global educators, a 21st century curriculum. For teachers, lecturers, learning and development professionals and anybody who wants to be inspired by the new ways learning is being revolutionised through the use of new and emerging technologies.

**The Unknown Cultural Revolution** Dongping Han, 2016-07-29 First published in 2001. Routledge is an imprint of Taylor & Francis, an informa company.

**Good Video Games + Good Learning** James Paul Gee, 2013 The chapters in this book argue that good games teach through well-designed problem-solving experiences. In the end, the book offers a model of collaborative, interactive, and embodied learning centered on problem solving, a model that can be enhanced by games, but which can be accomplished in many different ways with or without games.

**Ambient Findability** Peter Morville, 2005-09-26 How do you find your way in an age of information overload? How can you filter streams of complex information to pull out only what you want? Why does it matter how information is structured when Google seems to magically bring up the right answer to your questions? What does it mean to be findable in this day and age? This eye-opening new book examines the convergence of information and connectivity. Written by Peter Morville, author of the groundbreaking *Information Architecture for the World Wide Web*, the book defines our current age as a state of unlimited findability. In other words, anyone can find anything at any time. Complete navigability. Morville discusses the Internet, GIS, and other network technologies that are coming together to make unlimited findability possible. He explores how the melding of these innovations impacts society, since Web access is now a standard requirement for successful people and businesses. But before he does that, Morville looks back at the history of wayfinding and human evolution, suggesting that our fear of being lost has driven us to create maps, charts, and now, the mobile Internet. The book's central thesis is that information literacy, information architecture, and usability are all critical components of this new world order. Hand in hand with that is the contention that only by planning and designing the best possible software, devices, and Internet, will we be able to maintain this connectivity in the future. Morville's book is highlighted with full color illustrations and rich examples that bring his prose to life. *Ambient Findability* doesn't preach or pretend to know all the answers. Instead, it presents research, stories, and examples in support of its novel ideas. Are we truly at a critical point in our evolution where the quality of our digital networks will dictate how we behave as a species? Is findability indeed the primary key to a successful global marketplace in the 21st century and beyond. Peter Morville takes you on a thought-provoking tour of these memes and more -- ideas that will not only fascinate but will stir your creativity in practical ways that you can apply to your work immediately. A lively, enjoyable and informative tour of a topic that's only going to become more important. --David Weinberger, Author, *Small Pieces Loosely Joined* and *The Cluetrain Manifesto* I envy the young scholar who finds this inventive book, by whatever strange means are necessary. The future isn't just unwritten--it's unsearched. --Bruce Sterling, Writer, Futurist, and Co-Founder, The Electronic Frontier Foundation Search engine marketing is the hottest thing in Internet business, and deservedly so. *Ambient Findability* puts SEM into a broader context and provides deeper insights into human behavior. This book will help you grow your online business in a world where being found is not at all certain. --Jakob Nielsen, Ph.D., Author, *Designing Web Usability: The Practice of Simplicity* Information that's hard to find will remain information that's hardly found--from one of the fathers of the discipline of information architecture, and one of its most experienced practitioners, come penetrating observations on why findability is elusive and how the act of seeking changes us. --Steve Papa, Founder and Chairman, Endeca Whether it's a fact or a figure, a person or a place, Peter Morville knows how to make it findable. Morville explores the

possibilities of a world where everything can always be found--and the challenges in getting there--in this wide-ranging, thought-provoking book. --Jesse James Garrett, Author, *The Elements of User Experience* It is easy to assume that current searching of the World Wide Web is the last word in finding and using information. Peter Morville shows us that search engines are just the beginning. Skillfully weaving together information science research with his own extensive experience, he develops for the reader a feeling for the near future when information is truly findable all around us. There are immense implications, and Morville's lively and humorous writing brings them home. --Marcia J. Bates, Ph.D., University of California Los Angeles I've always known that Peter Morville was smart. After reading *Ambient Findability*, I now know he's (as we say in Boston) wicked smart. This is a timely book that will have lasting effects on how we create our future. --Jared Spool, Founding Principal, User Interface Engineering In *Ambient Findability*, Peter Morville has put his mind and keyboard on the pulse of the electronic noosphere. With tangible examples and lively writing, he lays out the challenges and wonders of finding our way in cyberspace, and explains the mutually dependent evolution of our changing world and selves. This is a must read for everyone and a practical guide for designers. --Gary Marchionini, Ph.D., University of North Carolina Find this book! Anyone interested in making information easier to find, or understanding how finding and being found is changing, will find this thoroughly researched, engagingly written, literate, insightful and very, very cool book well worth their time. Myriad examples from rich and varied domains and a valuable idea on nearly every page. Fun to read, too! --Joseph Janes, Ph.D., Founder, Internet Public Library
