**Fractal Analysis for Natural Hazards** Giuseppe

Cello,Bruce D. Malamud,2006 In the Earth Sciences, the concept of fractals and scale invariance is well-recognized in many natural objects. However, the use of fractals for spatial and temporal analyses of natural hazards has been less used (and accepted) in the Earth Sciences. This book brings together twelve contributions that emphasize the role of fractal analyses in natural hazard research, including landslides, wildfires, floods, catastrophic rock fractures and earthquakes. A wide variety of spatial and temporal fractal-related approaches and techniques are applied to 'natural' data, experimental data, and computer simulations. These approaches include probabilistic hazard analysis, cellular-automata models, spatial analyses, temporal variability, prediction, and self-organizing behaviour. The main aims of this volume are to present current research on fractal analyses as applied to natural hazards, and to stimulate the curiosity of advanced Earth Science students and researchers in the use of fractals analyses for the better understanding of natural hazards.

**It's All in the Head** Majella O'Donnell, 2014-10-09 In September 2013, on the Late Late Show in front of an audience of more than half a million, Majella O'Donnell had her hair shaved off and raised a phenomenal 600,000 euros for the Irish Cancer Society. It was a public declaration from a private woman, a statement of enormous courage in her fight against breast cancer. In this searingly moving and empowering memoir, Majella takes the reader on a journey through her life to that point. It begins with her childhood in the 1960s, growing up in a small town in Ireland, her early love of music and dreams of a future full of hope and excitement, only to be dashed by a broken marriage and an uphill battle with depression. Her confidence and self-

esteem at a low ebb, Majella decided to take charge of her own life and make a fresh start. Then destiny lent a hand when she met Daniel O'Donnell, and their marriage in 2002 brought her immense happiness and fulfilment. It was a decade or so later that tragedy struck, with the diagnosis of breast cancer. This is the compelling story of a woman made extraordinary by the courage with which she faced her greatest challenge. A woman who has learned about life the hard way, but who, with the love and support of her family and her husband Daniel, and the public by her side, has come through with a force of character and a deep-seated determination that will inspire us all.

*Integrated Fault Seal Analysis* S. Ogilvie,S. Dee,R.W. Wilson,W. Bailey,2020-08-03 Faults commonly trap fluids such as hydrocarbons and water and therefore are of economic significance. During hydrocarbon field development, smaller faults can provide baffles and/or conduits to flow. There are relatively simple, well established workflows to carry out a fault seal analysis for siliciclastic rocks based primarily on clay content. There are, however, outstanding challenges related to other rock types, to calibrating fault seal models (with static and dynamic data) and to handling uncertainty. The variety of studies presented here demonstrate the types of data required and workflows followed in today's environment in order to understand the uncertainties, risks and upsides associated with fault-related fluid flow. These studies span all parts of the hydrocarbon value chain from exploration to production but are also of relevance for other industries such as radioactive waste and CO2 containment.

### **Family Life in an Age of Migration and Mobility**

Majella Kilkey, Ewa Palenga-Möllenbeck, 2016-09-16 In an age of migration and mobility many aspects of contemporary family life – from biological reproduction to marriage, from child-rearing to care of the elderly - take place against a backdrop of intensified movement across a range of spatial scales from the global to the local. This insightful book analyzes the opportunities and challenges this poses for families and for academic, empirical and policy understandings of ‘the family’ on a global level, including case studies from Europe, India, the Philippines, South Korea, the United States and Australia. With chapters on international reproductive tourism, transnational parenting, ‘mail-order brides’ and ‘sunset migration’, it examines the implications of migration and mobility for families at different stages of the life course. Moreover, it brings together leading international scholars to connect a fragmented field of research, and in so doing enables an interdisciplinary exchange, generating new insights for

theory, policy and empirical analysis.

**The Modern Pilgrim** Paul Post, Paulus Gijsbertus Johannes Post, Jos Pieper, Marinus van Uden, 1998 This book is the product of a relatively long history of pilgrimage research in a Dutch theological setting. It is intended as a report for an international audience on this long-running programme. Two lines are followed in the book. The first is the track of liturgical studies, in which an historical, European ethnological and anthropological approach has predominated. The second is a social science track, with specific content coming from psychology of religion. The combination of these two lines has been extremely fruitful. In addition to results of various surveys of contemporary pilgrimage practice and the expansion of research into ritual and cultural context in which modern pilgrims find themselves, special attention is also bestowed on historiographic issues involved in orienting pilgrimage research, and its theoretical and methodological aspects. The places of pilgrimage examined here are Wittem, Dokkum and Amsterdam in The Netherlands, Banneux in Belgium, Lourdes and La Salette in France, and Santiago de Compostela in Spain. The central question which informs the whole study is to what extent one can perhaps speak of a new type of pilgrim today, the modern pilgrim.

Called to be Stewards Patrick H. McNamara, 2003 Stewardship is an increasingly widespread program for enhancing both finances and ministry involvement in Catholic parishes. Called to Be Stewards contains eight case studies of Catholic parishes that have implemented a stewardship program. Each chapter offers accounts of stewardship implementation and growth.

**Muslim Citizens in the West** Nina Markovi?, 2016-04-29 Drawing upon original case studies spanning North America, Europe and Australia, Muslim

Citizens in the West explores how Muslims have been both the excluded and the excluders within the wider societies in which they live. The book extends debates on the inclusion and exclusion of Muslim minorities beyond ideas of marginalisation to show that, while there have undoubtedly been increased incidences of Islamophobia since September 2001, some Muslim groups have played their own part in separating themselves from the wider society. The cases examined show how these tendencies span geographical, ethnic and gender divides and can be encouraged by a combination of international and national developments prompting some groups to identify wider society as the 'other'. Muslim and non-Muslim scholars and practitioners in political science, social work, history and law also highlight positive outcomes in terms of Muslim activism with relationship to their respective countries and suggest ways in which increasing tensions felt, perceived or assumed can be eased and greater emphasis given to the role Muslims can play in shaping their place in the wider communities where they live.

In Search of the Truth Michael O'Connell, 2017-05-31 The British criminal justice system is not dedicated to the truth. It is concerned only with reasonable doubt. During the British Army campaign in Northern Ireland (1969-2007),

security forces often dispensed with judge and jury, selected candidates for assassination, extracted false evidence from suspects, forced confessions from innocents and tortured citizens detained without trial. Recent inquests have disclosed a wealth of explosive, newly declassified information, which allows for a compulsive expose of abuses of power. Drawing on previously unseen material, Michael O'Connell, an experienced criminal lawyer, lays bare the chilling details of key cases in which the law was disregarded. He reveals how the truth was sacrificed to collusion, prejudice and corruption in notorious cases. Among them are the killing of Maire Drumm (Vice President of Sinn Féin), before which an army unit surrounding the hospital where she was a patient was withdrawn, and of Miriam Daly (a lecturer in Queen's University) in her home, where outgoing calls had been cut. Too often, the attitude of politicians is to leave the past behind. But without the truth and justice, there can be no reconciliation or forgiveness. In this careful examination of indisputable evidence, Michael O'Connell seeks to ensure wrongful convictions of the innocent will not be repeated
