Bull on the Beach Anna Nicholas, 2019-05-30 Having settled in a Mallorcan mountain idyll, Anna Nicholas, her husband the Scotsman and their son Ollie want to become as self-sufficient as possible. Anna teams up with organic farmers and smallholders to learn how to tend sheep, make cheese and honey and grind flour while the Scotsman creates havoc with his friend Pep in an attempt at winemaking, and tries to fathom what's troubling the wriggly inhabitants of his beloved wormery. However, Anna can't quite shake off her old clients from the PR world, and is persuaded by Greedy George to create a media storm for his new Spanish leather store. The story of how a giant bull ends up on a Barcelona beach is enough to make her delighted to return to Mallorca, where talking to a toad and feeding porridge to her hens seems normal by comparison.

Majorca, Paradise Not Lost Chuck Maisel, 2005 For two unforgettable years, writer Chuck Maisel and aspiring painter Carroll Graham lived the dream of a lifetime. Living in a timeless village on the Mediterranean island of Majorca, the two friends discover that fantasy can truly become reality. In this charming memoir, Chuck recalls the high humor and deep profundity of daily life on a foreign island, the heart-swelling beauty of place and people, and the wonderful events that brought him maturity, wisdom, joy, and eternal memories. Meet a captivating cast of characters that includes famous authors, painters, and a movie actress. But those most cherished are the island natives: Margarita, Toni, Pepe, Gaspar, Catalina, and others of the wise and delightful populace. Join the fun and fulfillment of an adventure crammed with the emotional warmth of *Under the Tuscan Sun*, the wit of *A Year in Provence*, and the joyous idiosyncrasies of living on an island. Enjoy a beautiful world where serendipity is the norm and still excites seekers of adventure today to Majorca island. This delightful memoir is Chuck Maisel's best argument for the thoughtful and well-planned bliss-following that is necessary at some point in each of our lives—not to escape reality but to rediscover it with enthusiasm.—Greg Sarris, Author of *Watermelon Nights* and both the novel and the screenplay of *Grand Avenue* produced by Robert Redford

Advances in Natural Hazards and Hydrological Risks: Meeting the Challenge Francisco Fernandes, Ana Malheiro, Helder I. Chaminé, 2020-01-02 This book gathers the proceedings of the 2nd International Workshop on Natural Hazards (NATHAZ'19), held in Lajes do Pico, Pico Island, Azores in 2019. Natural hazards constitute the threat of a naturally occurring event having a negative effect on human beings. These effects are often called natural

disasters. Among the natural hazards and potential disasters to be considered are: earthquakes, volcanic eruptions, landslides, subsidence, floods, droughts and coastal erosion. In addition, there are anthropogenic hazards that occur as a result of human interactions with the environment. They include technological hazards, which occur due to exposure to hazardous substances in the environment. Grasping the behaviour of natural systems requires a comprehensive understanding of climatology, geology and hydrology data and dynamics. Thus, it is important to conduct hazard and risk assessment studies for meaningful hazard mitigation. Further, the book demonstrates that an accurate understanding of natural systems and interactions between engineering and natural resources is of vital significance to the entire socio-economic sector. This volume offers an overview of natural hazards in model regions in Europe, America, and Atlantic islands. Providing new insights on the characterisation, assessment, protection and modelling of geological hazards, water systems, urban areas and coastal zones, it represents a valuable resource for all researchers and practitioners in the fields of Geosciences, Hydrology, Water Resources, Natural Hazards, Environments and Engineering. Main topics include: 1. Natural Hazards and Disasters 2. Sustainable Water Systems and Climate Change 3. Technological Hazards and Engineering Design

Endings in the Cinema Michael Walker, 2020-03-13 This book offers a new way of thinking about film endings. Whereas existing works on the subject concentrate on narrative resolution, this book explores the way film endings blend together a complex of motifs, tropes and other elements to create the sense of an ending—that is, it looks at ‘endings as endings’. Drawing on a wide range of examples taken from films of different periods and national cinemas, the author identifies three key features which structure the work: thresholds and boundaries, water, and, above all, the beach. The beach combines water and a boundary and is the most resonant of the key sites to which film endings gravitate. Although beach endings go back to at least 1910, they have increased markedly in post-classical cinema, and can be found across all genres and in films from many different countries. As the leading example of the book’s argument, they illustrate both the aesthetic richness and the structural complexity of film endings.

Handbook of Research on the Impacts, Challenges, and Policy Responses to Overtourism Ribeiro de Almeida, Cláudia, Quintano, Alfred, Simancas, Moisés, Huete, Raquel, Breda, Zélia, 2020-02-28 In recent years, the increasing

number of tourists traveling to specific urban and resort destinations has caused challenges for the effective management of tourism in these areas, with a resulting negative impact on towns, cities, and host communities. Such issues have included placing undue pressure on infrastructure; destruction of the physical, economic, and socio-cultural environment; and affecting the quality of residents' daily lives by impacting their mobility and, in some cases, the price and rent of resident accommodation, goods, and services. To achieve a certain level of balance between the interests of local residents and visitors, new regulatory measures and legislation in high tourism areas must be discussed. *The Handbook of Research on the Impacts, Challenges, and Policy Responses to Overtourism* is a collection of innovative research on best practices and legislation solutions for the management of tourism destinations suffering from overtourism, tourismophobia, or antitourism movement issues. While highlighting topics including overcrowding, social displacement, and tourism management, this book is ideally designed for local government officials, policymakers, lawmakers, researchers, entrepreneurs, industry professionals, travel agencies, hotels, academicians, and students seeking current innovative empirical research on destination-management practices and application techniques.

The Ocean of Life Callum Roberts, 2012-05-24 A Silent Spring for oceans, written by the Rachel Carson of the fish world (The New York Times) Who can forget the sense of wonder with which they discovered the creatures of the deep? In this vibrant hymn to the sea, Callum Roberts—one of the world's foremost conservation biologists—leads readers on a fascinating tour of mankind's relationship to the sea, from the earliest traces of water on earth to the oceans as we know them today. In the process, Roberts looks at how the taming of the oceans has shaped human civilization and affected marine life. We have always been fish eaters, from the dawn of civilization, but in the last twenty years we have transformed the oceans beyond recognition. Putting our exploitation of the seas into historical context, Roberts offers a devastating account of the impact of modern fishing techniques, pollution, and climate change, and reveals what it would take to steer the right course while there is still time. Like *Four Fish* and *The Omnivore's Dilemma*, The

Ocean of Life takes a long view to tell a story in which each one of us has a role to play.

Bikini Story Patrik Alac,2015-09-15 It was in 1946 that the world first came to hear of a coral atoll in the Marshall Islands called Bikini. The following year, French couturier Louis Réard borrowed the name and applied it to a bathing costume for women. Breaking from decades of conformity, Réard dared to 'undress' women's bodies in order to better emphasize what remained clothed - albeit in tiny wisps of material. By taking up the bikini as popular beachwear, women also found themselves thinking differently about their bodies. An ideal of perfection was reinforced by the appearance on the cinema screen of stars such as Marilyn Monroe, Brigitte Bardot and Ursula Andress, all of whom were featured in bikinis that accentuated their own curvaceous contours. More than a bathing costume, the bikini made its own contribution during the 1970s to the sexual revolution and to the changing relationship between men and women in general. This book investigates the history of the bikini and its effect on the evolution in the perception of women in society, as women regained responsibility for the way they look and laid claim once more to full sexual equality. A collection of images throughout this book illustrates this progression step-by-step over a period of more than 50 years.
