The Homemade Pantry Alana Chernila, 2012-04-03 "This is my kitchen. Come on in, but be prepared—it might not be quite what you expect. There is flour on the counter, oats that overflowed onto the floor, chocolate-encrusted spoons in the sink. There is Joey, the husband, exhausted by the thirty-five preschoolers who were hanging on him all day, and he is stuffing granola into his mouth to ease his five o'clock starvation. There are two little girls trying to show me cartwheels in that miniscule space between the refrigerator and the counter where I really need to be." In her debut cookbook, Alana Chernila inspires you to step inside your kitchen, take a look around, and change the way you relate to food. The *Homemade Pantry* was born of a tight budget, Alana's love for sharing recipes with her farmers' market customers, and a desire to enjoy a happy cooking and eating life with her young family. On a mission to kick their packaged-food habit, she learned that with a little determination, anything she could buy at the store could be made in her kitchen, and her homemade versions were more satisfying, easier to make than she expected, and tastier. Here are her very approachable recipes for 101 everyday staples, organized by supermarket aisle—from crackers to cheese, pesto to sauerkraut, and mayonnaise to toaster pastries. The *Homemade Pantry* is a celebration of food made by hand—warm mozzarella that is stretched, thick lasagna noodles rolled from flour and egg, fresh tomato sauce that bubbles on the stove. Whether you are trying a recipe for butter, potato chips, spice mixes, or ketchup, you will discover the magic and thrill that comes with the homemade pantry. Alana captures the humor and messiness of everyday family life, too. A true friend to the home cook, she shares her "tense moments" to help you get through your own. With stories offering patient, humble advice, tips for storing the homemade foods, and rich four-color photography throughout, *The Homemade Pantry* will quickly become the go-to source for how to make delicious staples in your home kitchen.

Revolution 2.0 Wael Ghonim, 2012-01-17 The former Google executive and political activist tells the story of the Egyptian revolution he helped ignite through the power of social media. In the summer of 2010, thirty-year-old Google executive Wael Ghonim anonymously launched a Facebook page to protest the death of an Egyptian man at the hands of security forces. The page's following expanded quickly and moved from online protests to a

nonconfrontational movement. On January 25, 2011, Tahrir Square resounded with calls for change. Yet just as the revolution began in earnest, Ghonim was captured and held for twelve days of brutal interrogation. After he was released, he gave a tearful speech on national television, and the protests grew more intense. Four days later, the president of Egypt was gone. In this riveting story, Ghonim takes us inside the movement and shares the keys to unleashing the power of crowds in the age of social networking. "A gripping chronicle of how a fear-frozen society finally topples its oppressors with the help of social media." –San Francisco Chronicle "Revolution 2.0 excels in chronicling the roiling tension in the months before the uprising, the careful organization required and the momentum it unleashed." –NPR.org

The Sciences of the Artificial, reissue of the third edition with a new introduction by John Laird Herbert A. Simon,2019-08-13 Herbert Simon's classic work on artificial intelligence in the expanded and updated third edition from 1996, with a new introduction by John E. Laird. Herbert Simon's classic and influential *The Sciences of the Artificial* declares definitively that there can be a science not only of natural phenomena but also of what is artificial. Exploring the commonalities of artificial systems, including economic systems, the business firm, artificial intelligence, complex engineering projects, and social plans, Simon argues that designed systems are a valid field of study, and he proposes a science of design. For this third edition, originally published in 1996,

Simon added new material that takes into account advances in cognitive psychology and the science of design while confirming and extending the book's basic thesis: that a physical symbol system has the necessary and sufficient means for intelligent action. Simon won the Nobel Prize for Economics in 1978 for his research into the decision-making process within economic organizations and the Turing Award (considered by some the computer science equivalent to the Nobel) with Allen Newell in 1975 for contributions to artificial intelligence, the psychology of human cognition, and list processing. The Sciences of the Artificial distills the essence of Simon's thought accessibly and coherently. This reissue of the third edition makes a pioneering work available to a new audience.
