Helping Developing Countries Address Public Debt Management Challenges - An IMF-World Bank Capacity Building Partnership World Bank,International Monetary Fund. Fiscal Affairs Dept.,International Monetary Fund,2013-05-03 In 2009, the Boards of the IMF and World Bank jointly endorsed a capacity building program to help developing countries strengthen their public debt management frameworks. A key aspect of the program was to help developing countries implement the framework developed by staffs to formulate an effective medium-term debt management strategy (MTDS). The Boards also supported the continued use of the complementary framework—the Debt Management Performance Assessment (DeMPA)—developed in 2007, to assess the effectiveness of the broader institutional arrangements for public debt management. This paper provides an update on the implementation of the program since its endorsement in 2009.

**The International Handbook of Public Financial Management** Richard Allen,Richard Hemming,B. Potter,2013-08-15 The Handbook is a virtual encyclopedia of public financial management, written by topmost experts, many with a background in the IMF and World Bank. It provides the first comprehensive guide to the subject that has been published in more than ten years. The book is aimed at a broad audience of academics/students, government officials, development agencies and practitioners. It covers both bread-and-butter topics such as the macroeconomic and legal framework for budgeting, budget preparation and execution, procurement, accounting, reporting, audit and oversight, as well as specialist subjects such as government payroll systems, local government finance, fiscal transparency, the management of fiscal risks, sovereign wealth funds, the management of state-owned enterprises, and political economy aspects of budgeting. The book sets out numerous examples and case studies describing good practice in public financial management, and is highly relevant for use in both advanced and developing countries.

**World Heritage Management and Human Rights** Stener Ekern,William Logan,Birgitte Sauge,Amund Sinding-Larsen,2016-03-22 This book focuses on the balance between protecting human rights and protecting world heritage sites. It concerns itself with the idea that the management of heritage properties worldwide may fail to adequately respect traditional entitlements and rights of individuals and communities living within or being affected by changes in the use of these spaces. It also explores the concept that the international heritage field has limited knowledge and awareness of this challenge. The volume argues that the dilemmas in question result from different conceptualisations of the key terms of 'rights', 'heritage' and 'community' among different groups and across political and cultural boundaries. In so far as 'culture' is what enables us to read the meanings involved, the ultimate questions are those that ask whose power is contested when one meaning is 'fixed' and the heritage of one group of humans is given the right to have its symbolic representation enjoyed and protected. The included case studies give vivid examples of this. This book was originally published as a special issue of the International Journal of Heritage Studies.

**The Routledge Companion to International Management Education** Denise Tsang, Hamid H. Kazeroony, Guy Ellis, 2013-06-19 Crises and scandals in the world of international management have brought a new spotlight onto how the subject is taught, studied and understood. There has been a plethora of literature on international management, but a lack of focus on how international management education (IME) can be shaped to respond to existing and future global business challenges. The Routledge Companion to International Management Education gathers together contributors from academia, industry and university administration involved in IME, to: introduce the domain of IME; describe the emerging state in new geographical areas; discuss the major issues and debates revolving around IME; explore the linkage of technology and international management, and shed light on the future of IME. The diverse background of the contributors provides a global perspective that challenges the dominant Anglo-American view, with up-to-date specific insights originating from their indigenous view points, which has often been neglected and inadequately covered. The volume answers important questions, such as: Do we need a vision in IME? What is the current state of IME? How has IME grown in emerging market segments? What roles does technology play in its recent development? The volume provides thought-provoking reading for educators, administrators, policy makers, human resources professionals and researchers. It will also give future international management students a glimpse of IME from a global inside-out perspective.

Management of International Institutions and NGOs Eduardo Missoni, Daniele Alesani, 2013-12-17 International Institutions (IIs), International NGOs (INGOs) and Transnational Hybrid Organizations (THOs) play a hugely important role in the modern world economy. Despite having been studied by scholars from a range of disciplines, these organizations have never before been approached from a management perspective. This ambitious book analyzes the management challenges associated with international cooperation and sheds light on how these organizations have evolved as the political, economic and business environments have changed around them. Covering an admirably broad canvas, the authors pursue two main objectives. Firstly, they explore the main management frameworks developed in the context of the corporate and national public/non-profit organizations and adapt them to the specificity of IIs and INGOs. This leads to the identification of a tailored approach to IO management based on their institutional and operational settings,

stakeholder groups, core business, staff profile, and financial arrangements. Secondly, they bring theory into practice by linking frameworks to several case studies and best practices of organizations currently experimenting with management systems and tools, with case studies including the World Bank and the Gates Foundation. This comprehensive textbook is a must-own resource for students and academics involved with studying and working with international organizations.
