The Other Half of Happy Rebecca Balcárcel,2019-08-20 Quijana is a girl in pieces. One-half Guatemalan, one-half American: When Quijana's Guatemalan cousins move to town, her dad seems ashamed that she doesn't know more about her family's heritage. One-half crush, one-half buddy: When Quijana meets Zuri and Jayden, she knows she's found true friends. But she can't help the growing feelings she has for Jayden. One-half kid, one-half grown-up: Quijana spends her nights Skyping with her ailing grandma and trying to figure out what's going on with her increasingly hard-to-reach brother. In the course of this immersive and beautifully written novel, Quijana must figure out which parts of herself are most important, and which pieces come together to make her whole. This lyrical debut from Rebecca Balcárcel is a heartfelt poetic portrayal of a girl growing up, fitting in, and learning what it means to belong.

A Different Sort of Normal Abigail Balfe,2021-07-22 'I REALLY love it. Buy it for your kids, your parents, your grandparents. Mostly buy it for yourself' Holly Smale, author of the Geek Girl series 'This book is what I needed as a kid! Empathetic, joyful and beautifully authentic. I loved it!' Elle McNicoll, author of *A Kind of Spark* *The beautiful true story of one girl's journey growing up autistic - and the challenges she faced in the 'normal' world* I'm not like the other children in my class . . . and that's an actual scientific FACT. Hi! My name is Abigail, and I'm autistic. But I didn't know I was autistic until I was an adult-sort-of-person*. This is my true story of growing up in the confusing 'normal' world, all the while missing some Very Important Information about myself. There'll be scary moments involving toilets and crowded trains, heart-warming tales of cats and pianos, and funny memories including my dad and a mysterious tub of ice cream. Along the way you'll also find some Very Crucial Information

about autism. If you've ever felt different, out of place, like you don't fit in . . . this book is for you. *I've never really felt like an actual-adult-person, as you'll soon discover in this book... 'Funny, fascinating . . . a rewarding and highly entertaining read' Guardian Told through the author's remarkable words, and just as remarkable illustrations, this is the book for those who've never felt quite right in the 'normal' world.

Mathematics for Machine Learning Marc Peter Deisenroth,A. Aldo Faisal,Cheng Soon Ong,2020-04-23 The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes worked examples and exercises to test understanding.

Programming tutorials are offered on the book's web site.

Blue Carbon C. Nellemann,Emily Corcoran,2009 This report explores the potential for mitigating the impacts of climate change by improved management and protection of marine ecosystems and especially the vegetated coastal habitat, or blue carbon sinks. The objective of this report is to highlight the critical role of the oceans and ocean ecosystems in maintaining our climate and in

assisting policy makers to mainstream an oceans agenda into national and international climate change initiatives. While emissions' reductions are currently at the centre of the climate change discussions, the critical role of the oceans and ocean ecosystems has been vastly overlooked.
