Koloniale Straßennamen Verena Ebert,2021-02-08 Während für koloniale Straßennamen im heutigen deutschsprachigen Raum ein reges Interesse zu verzeichnen ist, das vorrangig an Diskussionen einer etwaigen Notwendigkeit ihrer Umbenennung in einzelnen Städten anknüpft, sind die sprachhistorischen Benennungen in ortsübergreifender Perspektive in Bezug auf Kolonialismus und koloniale Themen unerforscht. Die Arbeit geht den linguistischen Praktiken solcher toponymischer Namenvergabeprozesse vom Beginn der faktischen Kolonialzeit bis zur Endphase der nationalsozialistischen Herrschaft nach. Sie erhebt und analysiert strukturbezogen-funktionale Muster sowie diskursive Argumentationszusammenhänge hinsichtlich der damit versprochenen kolonisatorischen Gewissheiten. Der umfangreiche Datenbestand (über 500 Straßennamen), deren koloniale Benennungsmotivik anhand zahlreicher Quellen und Quellengattungen bis 1945 nachgewiesen werden kann, zeigt, dass die Bedeutung kolonialtoponomastischer Raumaneignung bzw. -besetzung in erheblichem Ausmaß auch auf das Deutsche Reich zurückwirkte. In der Verbindung innovativer Onomastik und Diskurslinguistik werden die globalen Verflechtungsgeschichten erstmalig anhand der Benennung des öffentlichen Raumes in der deutschen Metropole umfassend erfasst und erläutert.

Bürgerinformation im Internet Frank Falkenstein,1998-08-04 Inhaltsangabe:Zusammenfassung:

Das Internet entwickelt sich zu einer der bedeutendsten Technologien unserer Zeit. Millionen von Teilnehmern nutzen bereits die Vorteile des internationalen Netzwerkes. Zunehmend mehr Entscheidungsträger in Politik und Verwaltung erkennen die Chance, nach den Fehlschlägen des proprietären Bildschirmtextes nun durch das Internet für mehr Bürgerinformation und -beteiligung zu sorgen. Ermöglicht wird dies durch nahezu unschlagbare Aktualität, Verfügbarkeit, Multimedialität und Kommunikationsfähigkeit. Die empirische Analyse von mehr als neunzig relevanten Anbietern zeigt jedoch, daß die Wenigsten jenseits der bloßen Bereitstellung von Bürgerinformationen die wahren Möglichkeiten des Internets wirklich ausschöpfen. Die Verknüpfung von Informationen aus

verschiedenen Bereichen oder die Nutzung der interaktiven und kommunikativen Möglichkeiten werden bisher viel zu wenig akzentuiert. Aber auch bei der Qualität der Inhalte lässt sich teilweise noch ein großes Verbesserungspotential konstatieren. Einblicke in die Konzepte bereits im Internet präsenter Institutionen zu gewinnen war das Motiv für qualitative Interviews, die bei insgesamt sechzehn etablierten Anbietern durchgeführt wurden. Die Studie stellt zunächst die allgemeinen Trends dar, bevor im Sinne von Best-Practice-Analysen einzelne Organisationen in Fallstudien näher betrachtet werden. Das Engagement auf dem Internet verlangt die Entwicklung klarer Konzepte von den Anbietern. Zentraler Punkt der vorgestellten modularen Idealkonzeption stellt die Integration der verschiedenen Anbieter von Bürgerinformationen in einem Public-Private-Partnership dar, innerhalb dessen ein differenziertes Rollensystem für die Lösung der anspruchsvollen Aufgaben einer Internet-Präsenz sorgt. Die Orientierung an den Nutzern - statt an den technischen Möglichkeiten - ermöglicht die bedarfsgerechte und somit erfolgreiche Systementwicklung. Namenforschung / Name Studies / Les noms propres. 2. Halbband+Registerband Ernst

Eichler, Gerold Hilty, Heinrich Löffler, Hugo Steger, Ladislav Zgusta, 2008-07-14 All known languages of the world have special lexical units called names or proper names, whose purpose is to designate the individuality of single persons, groups of people, families, places, hills, mountains, rivers, and animals, as well as things and institutions, etc. The study of names, also called onomastics or onomatology, is not simply a subdiscipline of linguistics; several other disciplines besides traditional philology cooperate in the study. The universe of names as objects of research lacks any clear-cut limits. The interest in names can be linguistic or philosophical, historical or contemporary, theoretical or practical, legal or political, ethnographic or religious; and in each of these and other cases, interest can concentrate on a single language, a group of languages, or a family of them. The present volume is the work of more than 250 authors from 42 countries. This fact alone shows how widespread the studies are. The three languages used in the volume (English, French, German) give only a partial impression of the

supranational and transcultural character of the names and their studies. Among the main areas on which the volume concentrates are the following: Specificities of names as linguistic signs, and their systematic analysis; Idiosyncrasies of name studies in various countries in the past and present; The multiplicity of names and their properties in as many languages as was practical; Demonstration of the basic functional identity, yet endless formal variety, of names as identifiers of individual entities; The phenomena of change and assimilation that occur in contact between two or more languages; The importance of names in disciplines other than linguistics, such as history, law, philosophy, theology, geography, archeology, and many others; Names and their use in connection and interaction with other areas of human activities in society; Numerous case studies showing the variety of approaches and methods that must be applied if microanalyses of sets of data are to be used for important conclusions; Registers of names belonging to more than 50 languages of the world, which should make accessible this whole plethora of material and ideas, through their articulation (topical, onomatological, etc.) and the arrangement of material; 23 chapters which are systematically ordered according to specific characteristics of names and their study.

Spatialonomy Vít Pászto, Carsten Jürgens, Polona Tominc, Jaroslav Burian, 2019-11-06 This open access book is based on Spatialonomy – Spatial Exploration of Economic Data, an interdisciplinary and international project in the frame of ERASMUS+ funded by the European Union. The project aims to exchange interdisciplinary knowledge in the fields of economics and geomatics. For the newly introduced courses, interdisciplinary learning materials have been developed by a team of lecturers from four different universities in three countries. In a first study block, students were taught methods from the two main research fields. Afterwards, the knowledge gained had to be applied in a project. For this international project, teams were formed, consisting of one student from each university participating in the project. The achieved results were presented in a summer school a few months later. At this event, more methodological knowledge was imparted to prepare students for a final simulation game about spatial and economic decision making. In a broader sense, the chapters will present the methodological background of the project, give case studies and show how visualisation and the simulation game works.

Ansichten von Mannheim Holger Manteufel, 2019-06-19 Alte Fotografien sind selten. Alte Fotografien aus Mannheim sind extrem selten. Die Gebrüder Matter fotografierten die Stadt ab 1860 und überlieferten somit ein einzigartiges Bild von Mannheim vor der Industrialisierung. In diesem Buch werden zum ersten Mal einzigartige Fotografien gezeigt, welche lange verloren schienen. Ein Buch für alle Freunde alter Fotos, der Stadt Mannheim und der Zeit als die Stadt noch zum Großherzogtum Baden gehörte.
